INTRODUCTION

Microlog: Canadian Research Index puts all of Canada's hard-to-find government and research literature at your fingertips. This monthly indexing, abstracting and document delivery service covers all levels of government in Canada, as well as institutions receiving research grants. Most titles included in **Microlog** are available in either paper or microfiche format. Combined with a microfiche collection, the **Microlog Service** is a powerful tool for finding Canadian report publications. The unique **Microlog Accession Number** is the key to immediate retrieval of any document.

SCOPE

Among other documents, **Microlog** includes research papers in physical, natural and social sciences, policy papers, important statistics, and annual reports. Every effort is made to ensure the currency of the index. For instance, documents appearing in the Checklist of Canadian Government Publications are delivered by **Microlog** approximately two months after publication of the list.

LANGUAGE POLICY

Documents issued in English or French are indexed and abstracted in the language of publication, while bilingual documents are indexed and abstracted in both languages.

SOURCES AND COVERAGE

Federal Documents: The **Microlog** editors review all checklists issued by the Canadian Government Publishing Centre and order every document relevant to the service. Except for serials, maps, pamphlets, and manuals, all monographs covered by the Federal Depository Plan are included in the index. Also, a special effort is made to track down elusive but important titles which do not appear in the lists.

Microlog offers a special collection of documents published by the Federal Government but not issued through the Federal Depository Plan. These titles, available to subscribers as the Non-Depository Publications collection, are indicated in the Titles section by a bullet (•). **Microlog** is also the direct distributing agent for many government bodies.

Provincial Documents: Depository arrangements with several provincial libraries have been established to ensure that **Microlog** subscribers receive all publications from those provinces. Where no depository arrangement exists, all publications lists issued by the province are reviewed for acquisitions.

Municipal Documents: Since these titles are very difficult to obtain, the **Microlog** editors make special efforts to include publications from municipal sources.

ACCESS

The Index provides access by subject, corporate or individual author, and series title.

The full **Microlog** file from 1979 to date, consisting of almost 50,000 records, is available online through Can/OLE. This is an ideal way to locate hard-to-find reports which may then be ordered directly online through the Can/DOCS service. Contact: Can/OLE Client Services, CISTI, Ottawa, Ontario, K1A 0S2.

FEATURES

Microlog comprises the following sections:

1. Titles and abstracts: A full bibliographic citation and a descriptive abstract for each title.

2. Name Index: Access by personal author, corporate author, and conference name.

3. Series Titles: Lists by title and number all reports in series in the service; series are available as an ongoing subscription or retrospective collection.

4. Subject Index: Descriptors based on Library of Congress and Canadiana Subject Headings are assigned to each document. A cross-referencing structure assists searchers.

5. Microfiche collections: Lists contents of each fiche collection for quick reference. These collections can be used as current awareness lists in broad subject areas to notify users of new acquisitions. This section is included in the annual cumulation as a separate fiched product.

MICROLOG AND CANADIAN STATISTICS INDEX

Statistical Material: The **Canadian Statistics Index** (CSI) provides further access to statistical material contained in **Microlog** monographs and special or annual reports. The CSI identification number has been included with the **Microlog** citation for the convenience of subscribers to the CSI fiche collection.

Annual Reports: Storage of annual reports in a single sequence has been a problem for clients in the past. The CSI numbers for annual reports are now listed in the bibliographic citation and appear on the microfiche header of each report, to make such sequencing possible.

DOCUMENT DELIVERY

Institutions may subscribe to complete or partial collections of the documents in **Microlog**. Individual copies on microfiche or paper reprint may be ordered through Micromedia's Document Delivery Service. To order, please contact:

INTRODUCTION

Microlog: Index de recherche du Canada met à votre disposition toutes les publications du gouvernement et les travaux de recherche difficiles à se procurer. Combiné aux collections sur microfiches, le service **Microlog** constitue un outil très efficace pour retrouver les publications des différents gouvernements du Canada, ainsi que celles des organismes qui reçoivent des subventions pour la recherche. **Microlog** est aussi un service de livraison de documents, sur microfiches ou sous forme imprimée.

CONTENU

Microlog contient entre autres des recherches en sciences physiques, naturelles et sociales, des énoncés de politique, des statistiques et des rapports annuels. Par l'intermédiaire du service **Microlog,** on peut obtenir les documents qui figurent sur la Liste des publications du gouvernement du Canada environ deux mois après leur parution sur cette liste.

POLITIQUE LINGUISTIQUE

Les ouvrages publiés en français ou en anglais sont indexés et résumés dans la langue de publication; les ouvrages bilingues sont traités dans les deux langues.

SOURCES

Publications fédérales: Les rédacteurs de **Microlog** examinent les listes émises par le Centre d'édition du gouvernement du Canada et commandent les documents pertinents. En dehors des publications en série, cartes, brochures et manuels, toutes les monographies régies par le Programme de dépôt du gouvernement fédéral figurent dans l'index, ainsi que des ouvrages importants ne figurant pas sur les listes.

Microlog propose aussi une collection spéciale de publications fédérales non déposées, identifiées par un point (•) dans la section Titres et résumés. **Microlog** est aussi l'agent de diffusion de nombreux organismes gouvernementaux.

Publications provinciales: Des ententes de dépôt ont été conclues avec plusieurs bibliothèques provinciales pour que les abonnés de **Microlog** reçoivent toutes les publications de ces provinces. Lorsqu'aucune entente n'existe, les listes de publications émises par les provinces sont examinées afin d'acquérir les documents.

Publications municipales: Ces ouvrages étant difficiles à se procurer, les rédacteurs de **Microlog** redoublent d'ardeur pour les inclure dans l'index.

ACCÈS

L'index imprimé est bilingue et les publications sont répertoriées par sujet, par auteur (collectivité et personne physique) et par titre de collection.

Le fichier complet de **Microlog**, de 1979 à aujourd'hui, contient près de 50,000 notices et est accessible sur Can/OLE. Il s'agit d'un moyen idéal pour mettre la main sur des rapports difficiles à trouver qu'on peut commander par l'intermédiaire du service Can/DOCS. À ce propos, veuillez vous adresser au Service à la clientèle Can/OLE, ICIST, Ottawa (Ontario), K1A 0S2.

ORGANISATION DE L'INDEX

Microlog est divisé en cinq sections:

1. Titres et résumés: tous les titres sont catalogués et accompagnés d'un résumé descriptif.

2. Index des noms: donne un accès par auteur, collectivité-auteur et titre de conférence.

3. Titres de collections: tous les rapports publiés en série sont classés par titre et numéro. Ces collections peuvent être commandées individuellement.

4. Index des matières: les descripteurs permettent de trouver facilement les publications pertinentes; un réseau de renvois facilite la recherche.

5. Collections de microfiches: chaque collection apparaît dans une section séparée pour faciliter la recherche. Ces listes peuvent aussi servir à renseigner les usagers sur les nouveautés. Dans la refonte, cette section est insérée sous forme de microfiches.

MICROLOG ET L'INDEX DES STATISTIQUES DU CANADA

Données statistiques: **L'Index des statistiques du Canada** (CSI) constitue une autre source de référence sur les statistiques contenues dans certaines publications indexées dans **Microlog**. Celles-ci ont un numéro d'ordre spécial qui est inclus dans la référence bibliographique.

Rapports annuels: Afin de rendre le classement des rapports annuels plus facile, le numéro d'ordre CSI correspondant à ces documents figure maintenant dans les références bibliographiques et est inscrit sur les en-têtes de microfiches.

LIVRAISON DE DOCUMENTS

On peut s'abonner à l'ensemble ou à certaines des collections de documents de **Microlog**. On peut également commander des reproductions de documents sur microfiches ou sur papier par l'intermédiaire du service de livraison de documents de Micromedia. Pour commander, communiquer avec:

Micromedia Ltée

FICHE COLLECTIONS

Documents from MICROLOG are available on microfiche through various subscription plans ranging from the complete collection to subsets by level of government (jurisdiction), geographic area or subject. Listed below are all the collections available with a short explanation for each one.

JURISDICTION COLLECTIONS

CA FEDERAL: titles issued by Supply and Services Canada, or any other governmental body, about Canada or federal matters, both depository and non-depository.

PR PROVINCIAL: titles issued by provincial governments.

MU LOCAL/MUNICIPAL: titles issued by local governments, or about local jurisdictional concerns, or about specific cities or towns.

GEOGRAPHIC COLLECTIONS

Documents included in the geographic collections are published at the provincial level or cover a specific province.

AL ALBERTA

AP ATLANTIC PROVINCES: Newfoundland, Nova Scotia, New Brunswick, and PEI.

BC BRITISH COLUMBIA

MS MANITOBA - SASKATCHEWAN

NO NORTHERN REGIONS: Northwest Territories, Yukon, Arctic Regions, Native Peoples, North of 60.

ON ONTARIO

QU QUEBEC

SUBJECT COLLECTIONS

AG AGRICULTURE: all aspects of agriculture, food and beverage industries; soil sciences; water in agriculture; fur industry; hunting; animal industry; crops and climate; horticulture; wine making.

BS BEHAVIOURAL SCIENCES: human behaviour; alcoholism and drug abuse; child abuse; suicide; psychology; public opinion and survey methods.

CO COMMERCE AND ECONOMICS: business and finance; consumer affairs; free trade; marketing; tourism; insurance; pension fund administration; taxation; assessment; budget papers for Canada and provinces.

CU CULTURE, RECREATION AND HUMANITIES: arts; theatre; sports; lotteries; archaeology; history and historic sites; recreational hunting and fishing; parks; tourism related to recreation; libraries.

ED EDUCATION: curriculum; educational research; school and university funding; learning; teacher collective bargaining and pension funds; community and school.

EN ENERGY: resources, supply and demand; generation; storage; transmission; regulation; conservation; exploration; alternative resources; insulation.

EV ENVIRONMENT: pollution; environmental policy; assessment reports; natural areas and park management; environmental accidents; hazardous wastes; wildlife resources; environmental health.

EX EXTERNAL AFFAIRS: international relations; defence; aid to developing countries; international trade; free trade; immigration policy; arms control; wars and warfare.

FI FISHERIES: commercial fishing; fish resources; fish biology; aquatic resources; fish habitat; aquaculture; aquatic ecology; fish trade; law of the sea related to fisheries; fishing boat accidents.

FO FORESTRY: forest ecology; logging; forest products; wood trade; forest fires; reforestation; wood crops for energy; pulp and paper industry.

HE HEALTH AND MEDICAL CARE: public health and health services; health insurance; nutrition; vital statistics; medical ethics; diseases and hygiene; environmental health; disease aspects of occupational health.

JU JUSTICE AND LAW: crime; corrections; ombudsman; coroner; human rights; police activities; firearms; law reform.

LA LABOUR: employment; manpower; occupational health and safety; collective bargaining; vocational training and retraining; wages; compensation; strikes.

LS LIFE SCIENCES: biology; botany; zoology; genetics; biotechnology; medical sciences.

NP NATIVE PEOPLES: any material related to issues involving Canada's Native peoples.

NR NATURAL RESOURCES, EARTH SCIENCES AND MINING: land, water and mineral resources; land reclamation; flood control; hydrology; oceanography; mining; geology; economic geology; mining techniques; metallurgy.

PS PHYSICAL SCIENCES: practical sciences and technology; mathematics; physics; computer sciences; chemistry; meteorology; hydrology; geophysics; oceanography; nuclear science; metallurgy; earth sciences; engineering; astronomy; robotics; telecommunications.

PL PLANNING, HOUSING AND CONSTRUCTION INDUSTRY: planning policy and regulation; building technology; housing rehabilitation; availability; land use planning; architecture.

PA PUBLIC ADMINISTRATION: politics, government and administration; government operations; intergovernmental relations; public finance, budgets, estimates; parliamentary process; elections; ombudsman; taxation; annual reports of municipalities; privatisation.

PW PUBLIC WORKS: government management of infrastructures; public utilities; waste management; fire control; emergency services; Crown land management.

SA SOCIAL AFFAIRS: social problems; social services; alcohol and drug problems; housing and public housing; adoption; wife abuse; families; women; Native peoples; minorities; handicapped; public welfare; unemployment; demography; veterans affairs; aged.

ST STATISTICS: all material from Microlog that is included in the Canadian Statistics Index.

TE TELECOMMUNICATIONS: communications and broadcasting policy, regulation, technology; information systems; data base management; publishing; courriers and postal service; telephones; telex; communications sattelites.

TR TRANSPORTATION: all modes of transportation; traffic planning and engineering; vehicles; transporation fuels and fuel conservation; roads and highways; pipelines.

COLLECTIONS DE MICROFICHES

Les publications incluses dans MICROLOG sont en vente sur microfiches, en collection complète ou en collections plus petite regroupant des titres par juridiction, par aire géographique ou par matière. La liste ci-dessous énumère toutes les collections et en explique la portée.

COLLECTIONS GOUVERNEMENTALES

CA FÉDÉRAL: publications émises par le ministère des-Approvisionnements et Services ou une agence fédérale, régies ou non par le Programme de dépôt.

PR PROVINCIAL: publications émises par les gouvernements provinciaux.

MU LOCAL/MUNICIPAL: publications émises par les gouvernements locaux et municipaux, ou concernant une juridiction locale ou municipale.

COLLECTIONS GÉOGRAPHIQUES

Les publications incluses dans ces collections sont publiées au niveau provincial ou concerne une province en particulier

AL ALBERTA

AP PROVINCES ATLANTIQUES: Terre-Neuve, Nouvelle-Écosse, Nouveau-Brunswick, Ile-du-Prince-Édouard.

BC COLOMBIE-BRITANNIQUE

MS MANITOBA et SASKATCHEWAN

NO RÉGIONS DU NORD: Territoires du Nord-Ouest, Yukon, régions arctiques, peuples autochtones, nord du 60e.

ON ONTARIO

QU QUÉBEC

COLLECTIONS PAR MATIÈRE

AG AGRICULTURE: tous les aspects de l'agriculture; industries des breuvages et de l'alimentation; études des sols; eau en agriculture; industrie de la fourrure; bétail; cultures et climat; horticulture; viniculture.

BS SCIENCE DU COMPORTEMENT: comportement humain, alcoolisme et toxicomanie; enfance maltraitée; suicide; psychologie; criminologie; opinion publique et sondage.

CO COMMERCE ET ÉCONOMIE: affaires et finances; consommation; libre-échange; marketing; tourisme; assurance; caisses de retraite; taxe et évaluation foncière; budgets fédéral et provinciaux.

CU CULTURE, LOISIRS ET SCIENCES HUMAINES: arts; théâtre; sports; loteries; archéologie; histoire; sites historiques; chasse et pêche sportive; parcs; tourisme (aspect récréatif); linguistique; bibliothèques.

ED ÉDUCATION: guide pédagogique; financement des écoles et des universités; apprentissage; conventions collectives et caisses de retraite des enseignants; école et communauté.

EN ÉNERGIE: offre et demande; production; emmagasinage; transmission; réglementation; conservation; exploration; énergies douces; isolation.

EV ENVIRONNEMENT: pollution; politique de l'environnement; études d'impact; zones de conservation et gestion des parcs; accidents écologiques; déchets dangereux; faune; santé et environnement.

EX AFFAIRES EXTÉRIEURES: relations internationales; défense; aide aux pays en développement; commerce international (libre-échange); politique de l'immigration; contrôle des armements; guerre et armement.

FI PÊCHE: pêche commerciale; ressources halieutiques et aquatiques; biologie du poisson; aquiculture; écologie marine; commerce du poisson; loi de la mer; accidents impliquant des bateaux de pêche.

FO FORÊTS ET SYLVICULTURE: écologie et exploitation forestière; produits de la forêt; incendies de forêts; reboisement; utilisation du bois comme énergie; pâtes et papier.

HE SANTÉ ET MÉDECINE: santé publique et services de santé; assurance-maladie; nutrition; statistique médicale; déontologie médicale; maladies et hygiène; santé et environnement; santé au travail (aspect pathologique).

JU JUSTICE ET DROIT: criminalité; services correctionnels; protecteur du citoyen; coroner; droits de la personne; activités policières; armes à feu; réforme du droit.

LA TRAVAIL: emploi, main d'oeuvre; santé et sécurité au travail; conventions collectives; formation et recyclage professionnel; salaires; accidents du travail; grèves.

LS BIOLOGIE: botanique; zoologie; génétique; biotechnologie; médecine.

NP POPULATIONS AUTOCHTONES: publications ayant trait aux peuples autochtones canadiens.

NR RESSOURCES NATURELLES: ressources du sol, aquatiques et minérales; améliorations foncières; contrôle des crues; hydrologie; océanographie; mines; géologie; techniques minières; métallurgie.

PS SCIENCES PHYSIQUES: sciences appliquées et technologie; mathématiques; physique; informatique; chimie; météorologie; hydrologie; géophysique; océanographie; sciences nucléaires; métallurgie; géologie; génie; astronomie; télécommunications.

PL PLANIFICATION, LOGEMENT ET INDUSTRIE DE LA CONSTRUCTION: planification, urbanisme et zonage; construction; bâtiment; rénovation domiciliaire; utilisation du sol; architecture.

PA ADMINISTRATION PUBLIQUE: politique et gouvernement; opérations gouvernementales; relations inter-gouvernementales; finances publiques et budget; processus parlementaire; élections; protecteur du citoyen; impôt; rapports annuels municipaux; privatisation.

PW TRAVAUX PUBLICS: gestion des infrastructures; services publics; élimination des déchets; protection contre l'incendie; services d'urgence; terres de la Couronne.

SA AFFAIRES SOCIALES: problèmes sociaux; services sociaux; alcoolisme et toxicomanie; logement public; adoption; femmes battues; familles; autochtones; minorités; handicapés; bien-être social; chômage; démographie; anciens combattants; personnes âgées.

ST STATISTIQUES: publications comprises dans Microlog et aussi incorporées à l'Index des statistiques du Canada.

TE TÉLÉCOMMUNICATIONS: communications et politiques de radiodiffusion; systèmes d'information; bases de données; édition; service postal et messagerie; téléphones; télex; satellites de communication.

TR TRANSPORT: tous les moyens de transport; gestion et génie du transport; véhicules; carburants; système routier; oléoducs et gazoducs; aspect de l'environnement du transport;

Sample Microlog Search

"How can a person from a foreign country qualify for refugee status in Canada?"

The researcher can search in Microlog as in any library catalogue – by subject, author and title. Because the index is bilingual, searching can be done in English or in French.

Recherche type avec Microlog

"Comment une personne d'un pays étranger peut-elle demander le statut de réfugié au Canada?"

La méthode de recherche dans Microlog est la même que dans une bibliothèque, puisque les documents sont indexés par auteur, par sujet et par titre. L'index étant bilingue, la consultation peut se faire en français ou en anglais.

The Convention refugee determination process in Canada
by M. Young. Ottawa Library of Parliament, Research Branch, 1987 13 p. Bibliogr (Current issues review 86-26E)
French ed. (La reconnaissance au Canada) on the same fiche
ISBN 0-660-12567-6
MICROLOG 88-00800 1 fiche

The increase of refugee status claiming immigrants in Canada has led to a review of the immigration policy concerning this group. This report looks at the weaknesses of current legislation which is linked to the Geneva Convention and its Protocol, studying Canada's past adherence to the rights afforded under its protection. Also discusses public and government opinion on support for a humanitarian and generous refugee policy and questions of balancing efficiency with procedural fairness to claimants. Gives a chronology of events since 1969.

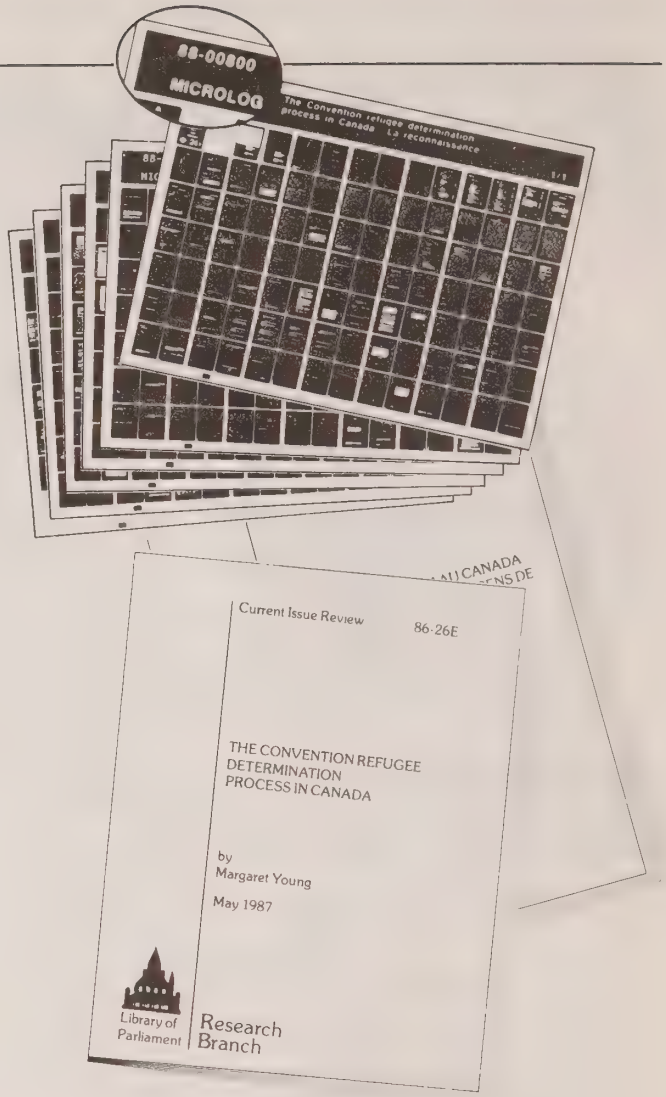
STEP 2/DEUXIÈME ÉTAPE

A unified search strategy

The search strategy should include all the monthly issues. Start with the most recent issue and work back. Monthly issues are cumulated annually.

Établir une stratégie de recherche unifiée

La stratégie de recherche doit tenir compte de toutes les publications mensuelles, à commencer par les plus récentes. Chaque année, ces publications font l'objet d'une refonte.



STEP 3/TROISIÈME ÉTAPE

Retrieve the publication

Each bibliographic citation gives a full description of the relevant document. Locate the document by the microfiche number in the library's collection or order from Micromedia. Individual publications are available for purchase on microfiche or paper. The bibliographic description provides publisher source information.

Repérer la publication

Chaque notice bibliographique comprend une description complète du document; celui-ci peut être repéré grâce au numéro de microfiche de la bibliothèque; sinon, il faut le commander à Micromedia. On peut se procurer les monographies sur microfiches ou sur papier. La description bibliographique comporte également des indications sur l'éditeur.

3-D least squares adjustment program for the adjustment and analysis of 3-D surveying networks : program methodology and user guide

by A.B. Kempe. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1988. v, 30 p. Bibliogr. (Report ; CRL 88-7(TR))
MICROLOG 88-05506 1 fiche

Paper on the development of a program for the adjustment and analysis of 3-dimensional survey networks in mining surveying, especially in control extension, control re-adjustment, and slope stability monitoring. The method of least squares is described as it applies to the reduction of redundant observations in survey networks. Mathematical models for the observation equations and their corresponding linearized forms are listed. A description of the program input and output files, program limitations, and program operation are also given.

11 years performance of 18 bituminous test sections on a major urban freeway

by K.K. Tam, R. Raciborski and D.F. Lynch. Toronto : Engineering Materials Office, Bituminous Section, 1987. 103 p. : ill. Bibliogr. (Report ; EM-84)
MICROLOG 88-02050 2 fiche

This report summarizes the experience of a field trial placed on one of the heaviest trafficked roads in North America: Hwy 401, carrying some 250,000 AADT in 1985. The trial consisted of 18 different test sections representing a comprehensive range of asphalt surface course mixes. Mix designs ranging from sand mix to high stone content mixes of various materials and compositions were involved. The conditions of the test sections were monitored periodically for eleven years and samples were obtained for laboratory testing and analysis. While the primary objective of this study was to establish the most effective mix designs for improving the frictional characteristics of the travelled surfaces for urban freeways, other parameters relating to the material properties and performance of the mix designs and their various relationships were also evaluated.

12 years to 2000 : draft discussion paper

Natural Sciences and Engineering Research Council Canada. Ottawa : The Council, 1988. ii, 19 p. *CSI 22264.202*
MICROLOG 88-05270 1 fiche

The science and engineering Phds of the year 2000 are now in high school. Their numbers, as they enter the university age group (18-24), will decline steadily to the mid 1990s. It is projected that demand for their talent must certainly increase if the Canada of the 21st century is to be a competitive, developed nation. This document describes the role of the Council in meeting these demands and in facing the other challenges of research and knowledge transfer as the 21st century approaches.

13th Avenue commercial study

Regina : Regina Planning Dept., 1985. 42 p. : maps.
MICROLOG 88-05854 1 fiche

On May 28, 1984, City Council approved a resolution that the City Administration undertake a study of commercial zoning along 13th Avenue in the Cathedral Area and present a terms of reference for Council's approval. This study develops a land use strategy for 13th Avenue area which provides for further economic development in that location. It encourages consolidation of the existing commercial area and ensures that commercial development occurs in a manner which is compatible with adjacent residential areas.

222RN and 220RN progeny relationship in Canadian underground uranium mines

by J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. ii, 14 p. : ill. (Report ; MRL 87-62(TR))
MICROLOG 88-03386 1 fiche

Radon and thoron progeny are found in some Canadian underground uranium mines. Because both contribute to dose exposure, their experimental determination is important. The relationship between radon progeny Working Level and thoron progeny Working Level was investigated in uranium mines. Experimental measurements extended over 1981-86, and consisted of about 700 measurements of each. The data were analyzed by standard linear and power function regression analysis.

MICROLOG 88-02281 1 fiche

First annual report of the Division for 1983, summarizing the research activities of the Assessment and Enhancement Section and organized on the basis of index rivers. Generally, index rivers contain a fish counting fence or a fishway where all upstream, and sometimes downstream, fish migrants are counted. Index rivers in 1983 in the Gulf region included the Bartholomew, Nepisiguit, Miramichi, and Restigouche rivers of New Brunswick; Margaree and South rivers of Nova Scotia; Morell River of Prince Edward Island; and Lomand and Torrent Rivers and Western Arm Brook of Newfoundland. All historical information on the biological characteristics of the fish migrations collected in previous year is also summarized.

The 1985 global ice impact tests on the USCGC *Polar Sea* : final report

prepared for Transportation Development Centre ; prepared by Arctec Canada Limited. Kanata, Ont. : Arctec Canada Limited, 1987. xii, 190 p. : ill. Bibliogr.
MICROLOG 88-03213 3 fiche

During September and October 1985, the USCGC 'Polar Sea' conducted ice impact tests on heavily ridged ice features in the Alaskan portion of the Beaufort Sea. Bending strain gauge measurements were used to estimate the longitudinal bending moment distribution of the 'Polar Sea' during an impact with an ice pressure ridge. Compressive strains along the stem and ship acceleration and velocity measurements were also recorded. This report describes the methodology for determining the global ice impact force, and presents the corresponding results of these tests. A comparison of the results with other available data is also presented. Hull strain and impact force time histories are presented, along with the longitudinal bending and shear distributions, during ice impact events.

The 1986/87 Public Accounts comprise three volumes. Volume 1 contains the financial statements of the Province and schedules of supporting information. Volume 2 contains the financial statements of those provincial crown corporations, boards and commissions in which the Province has a investment or which have borrowed from the Province or from others with a guarantee by the Province. Also included are selected agencies and certain significant operational agencies which are funded in whole or in part by revenues generated from their operations. Volume 3 contains the details of expenditures required by the Standing Public Accounts Committee. Statements from each ministry include data on expenditures by program and activity, and by activity and Standard Accounts Classification. Budgetary expenditures include data on salaries and wages, employee benefits, transportation and communications, service supplies and equipment, acquisition and construction of physical assets, transfer payments and other transactions. Data also include statements of budgetary revenue, repayments of loans.

1986-87 workers' compensation study : phase II

New Brunswick. Occupational Health and Safety Commission. Halifax : The Commission, 1987. 9 p. *Fiched with French ed. (Etude sur l'indemnisation...)*.
MICROLOG 88-00233 1 fiche

Document briefly traces the history of the establishment of the Commission providing a basis for the principles that guided the Commission's work in 1987. Reviews the rationale for cost-sharing between employers and employees and for instituting regulations both in private and in public industries. Recommends further coverage to include all persons engaged in income-producing activity on a twenty-four hour basis (weekly) through payroll deductions and introduces a plan for off-the-job insurance that would include both the Occupational Health and Safety Commission and the Workers' Compensation Board.

The 1987 fenitrothion monitoring study on songbird brain cholinesterase activity and balsam fir foliage

prepared for Newfoundland and Labrador Department of Forest Resources and Lands ; prepared by S. Fudge & Associates Limited. Corner Brook, Nfld. : The Dept., 1988. xiv, 80 p. : ill. Bibliogr.
MICROLOG 88-05194 2 fiche

During the summer of 1987, an aerial spray program to control an outbreak of the eastern hemlock looper was conducted in insular Newfoundland. The primary insecticide used in the spray application was fenitrothion. As a condition of the license, a monitoring study to assess the effect of fenitrothion on forest songbird populations was undertaken and involved collecting songbirds from both sprayed and unsprayed areas and analyzing the brains for cholinestrerase (CLE) activity, which were then compared with the literature. Foliage samples were also collected before and after spraying and compared with foliage deposit values and songbird CLE activity.

1987 research catch and effort data on nearshore reef-fishes in British Columbia statistical areas 12 and 13

by L.J. Richards and C.M. Hand. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iv, 59 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1958) ISSN 0706-6473
MICROLOG 88-04125 1 fiche

Summary of research catch and effort data on nearshore reef-fishes collected during 1987 as part of a stock assessment program for these fishes and a comparison of 1987 data with 1986 data from the same areas, and with data from the sport fishery. Surveys were conducted in Johnstone Strait and the Strait of Georgia in MSAs (minor statistical areas) 12 and 13 using angling techniques developed during 1984-1985. The 1987 angling work obtained research fishing data to compare with catch data from the sport fishery; compared sales-slip and logbook records from the commercial fishery: examined inter-annual variability in angling CPUE among sites; examined among-site differences that may be related to exploitation: and estimated relative abundance, species composition and the size distributions of rockfish and lingcod in these areas.

1987 West coast troll log program

by E.W. Carter and F.P. Jordan. Nanaimo, B.C. : Dept. of Fisheries and Oceans. Fisheries Research Branch. Pacific Biological Station, 1988 iii, 39 p. : ill. (Canadian data report of fisheries and aquatic sciences ; no. 698) ISSN 0706-6465
MICROLOG 88-04807 1 fiche

In 1987, the Troll Log Program involved 86 trollers from the west coast of British Columbia and 25 trollers from the Strait of Georgia to provide Catch Per Unit Effort of troll-caught salmon in different statistical areas. Fishermen were requested to record the details of location fished by map location or two Loran coordinates, number of hours fished as actual time with lines in the water, and number of salmon caught by species. Log sheets were mailed in prepaid envelopes either weekly or at the end of each fishing trip. An effort was made in the selection of boats to spread the fishing coverage along the entire coast of British Columbia to include all statistical areas.

MICROLOG 88-05872 1 fiche

This expenditure budget determines the amount of financial resources the government plans to allocate to the production of public goods and services. It displays the estimates requested by the government for the fiscal year beginning April 1, 1988. This document provides additional information on those estimates and on the budgetary expenditure. It contains a presentation of the government's spending policy with complementary notes which provide an explanation of the budgetary transactions, information on the evolution of total expenditure and estimates, their distribution by broad government mission and by domain of activity, and their distribution by expenditure category, and highlights of the estimates for 1988-1989 by department and by program.

1988-89 estimates of proposed investments : votes by project

Alberta Heritage Savings Trust Fund. Capital Projects Division. Edmonton : The Division, 1988. 17 p. : ill.
MICROLOG 88-03262 1 fiche

This booklet presents, by project, the 1988-89 Estimates of Proposed Investments. For the information of the Legislative Assembly, projects have been reported at a sub-project level, where applicable, and by object of expenditure with comparable figures from 1987-88. Expenditure control exists at the object of expenditure and sub-project level (where a sub-project breakdown exists) insofar as transfers of funds between sub-projects within the same project and between object groupings are subject to Treasury Board control.

1988-89 estimates, part I : the government expenditure plan

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1988. 53, 55 p. *Bilingual (Budget des dépenses...).* ISBN 0-660-53855-5
MICROLOG 88-02489 2 fiche

The Estimates communicate to Parliament the level and nature of the federal government's spending plans for the coming fiscal year. Part I gives Parliament an overview and situates the Estimates in the context of the overall expenditure framework. It covers the policy sector resource envelopes which include the level of resources allocated for all elements of departmental activity and defines the resources earmarked for maintaining, developing and implementing policies and programs. Focuses also on person-years and presents an overall person-year summary. Presents totals for transfer payments, payments to Crown corporations and operating and capital expenditures. Also addresses items which represent investments requiring parliamentary approval.

1988-89 estimates, part II : the main estimates

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1988. 383, 396 p. *Bilingual (Budget des dépenses...).* ISBN 0-660-53856-3
MICROLOG 88-02522 9 fiche

The Main Estimates, or Part II, is the document that directly supports the Appropriation Act. The basic structural units are the Votes and Statutory items which total the proposed expenditures under each departmental or agency program. Presentation of the estimates is by ministry, department and agency, with a statement of objectives for each program, and activity descriptions, transfer payments and revolving funds. Crown corporations are also presented. Data is shown for the previous year to provide a basis for comparison.

Canada. Dept. of Finance. Ottawa : Supply and Services Canada, Canadian Government Publishing Centre, 1988. 250, 278 p. *Bilingual (Budget des dépenses...).* ISBN 0-660-53914-4
MICROLOG 88-02566 6 fiche

This document provides Estimates detail for the department and its programs primarily in terms of the results expected and the money spent. It begins with an overview of the roles and responsibilities of the portfolio and the spending plan for the coming fiscal year. This format is followed for the department and each of the programs administered. Administrative information includes a profile of financial requirements by object, personnel requirements, capital expenditures, transfer payments, revenue, loans, investments and advances, and the net cost of the program. Details include such information as personnel requirements, by occupational group, authorized person-years, and current salary range. Program descriptions include formal programs as well as activities related to government policy.

A quand la création d'une organisation mondiale de l'espace?

par E.M. Borgese. Ottawa : Institut canadien pour la paix et la sécurité internationales, 1987. 8 p. (Opinions ; no 5) ISBN 0-662-94576-X
MICROLOG 88-01686 1 fiche

L'Union soviétique a proposé à l'Assemblée générale des Nations-Unies de créer une Organisation mondiale de l'espace qui coordonerait les activités dans l'espace extra-atmosphérique et qui y régirait notamment les entreprises menées aux fins du désarmement et du développement. Ce document examine les similitudes qui peuvent exister entre un tel organisme et l'agence qu'on avait proposé pour régir les eaux internationales en vertu du droit de la mer.

Abalone resurvey in the southeast Queen Charlotte Islands, June 1987

by W. Carolsfeld. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 90 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1966) ISSN 0706-6473
MICROLOG 88-03321 2 fiche

Survey of sampling sites selected from the 1984 survey to compare directly past and present abundances of abalone. Several new sites were also selected to develop baseline data for future reference. At each site, topography, substrate type, site exposure and dominant algae were visually identified and the percentage vegetation cover estimated and recorded. Abalone density was estimated by collecting and counting all found within a 1 square metre metal quadrat placed on the bottom in a standard 16-quadrat pattern.

Abalone survey in the Estevan Group and Aristazabal Island, June 1985

by S. Farlinger and K.T. Bates. Prince Rupert, B.C. : Dept. of Fisheries and Oceans, Field Services Branch, 1986. v, 45 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 1896) ISSN 0706-6473
MICROLOG 88-02587 1 fiche

Reductions in the commercial abalone fishery quota in recent years have been supported by surveys indicating substantial declines in the index of abalone abundance. In 1985, the Central Coast commercial fishing areas were resurveyed in response to reports of increasing availability of abalone. The survey was carried out by 3 divers, with 28 sites surveyed. Most selected sites were those that had shown a high abalone density during the 1983 survey, with 3 new sites added.

Abandoned waste disposal site study : Province of Nova Scotia

prepared for Nova Scotia Department of the Environment and Environment Canada ; prepared by Terrance J. MacPherson. Halifax : Nova Scotia Dept. of Environment ; Environment Canada, 1987. v, 59 p. Bibliogr.
MICROLOG 88-00085 1 fiche

Investigations consisted of a visual evaluation of each site, completion of a site assessment from photographs, and location of the area on a 1:50000 series topographic map. This study also identifies, but does not classify, 57 inactive gold mine tailings sites and seventy active waste disposal sites. A short overview of the geology and soils of the province is also included.

Varying ideas of morality, religion, sexuality, politics and family and social life have made abortion a controversial topic. This report traces the background and history of the abortion issue in Canada from a discussion of the legal standpoint before the abortion reform introduced into federal Parliament in 1969 to a consideration of how the Canadian Charter of Rights and Freedoms affects the law on abortion. Records all related parliamentary action.

L'Abus des drogues au Canada -- Revu

par H. McKenzie. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 17 p. Bibliogr. (Bulletin d'actualité , 87-7F) *L'éd. anglaise (Drug abuse in Canada) sur la même fiche.* ISBN 0-660-92135-9
MICROLOG 88-00828 1 fiche

A l'automne 1986, le gouvernement canadien déclarait que le trafic des drogues illicites constituait une menance grave et croissante et qu'il avait l'intention de mettre au point une stratégie nationale à cet égard. Ce bulletin, préparé à l'intention des parlementaires à Ottawa, porte sur l'étendue de l'usage des drogues illicites (cannabis, LSD, héroine, cocaine et dérivés synthétiques) au Canada, ses effets sur notre société et certaines mesures correctives qui ont été proposées. Une chronologie sur le sujet complète le document.

Access register 1987

Government of Canada. Access to Information Act. Ottawa : Supply and Services Canada, 1987. xiii, 941 p. ISBN 0-660-12621-4
MICROLOG 88-01680 11 fiche

The Register provides a current description of information held by those federal government institutions which are affected by the Access to Information Act and is designed to help members of the public exercise their rights under the same Act. The Index provides introductory information for the new user with a brief synopsis of pertinent facts about the Act and further sources of help. The Index is divided into three search categories: standard classes of records, which provides a description of information which is similar for each government institution, such as information on administration, finance, and material management; a Subject Index which is organized by general and specific search terms and locates the specific class of record being sought to its associated government institution; and, the last index is classes of records by institution. Also includes an index which shows classes of records where changes have occurred since 1986.

Accidental nuclear war : reducing the risks

by D. DeMille. Ottawa : Canadian Institute for International Peace and Security, 1988. 8 p. (Background paper ; no. 16) ISBN 0-662-15897-0
MICROLOG 88-01690 1 fiche

Paper explores the issues of accidental and inadvertent nuclear war and reviews measures that have been taken, or might be taken in the future to reduce the risk of catastrophe. Discusses superpower control over nuclear weapons with the assumption that the Soviet Union and the U.S. exercise the same amount of stringent control, but the document mainly examines the U.S. position. Discusses several components in the strategic nuclear arsenal of the superpowers, long-range bombers, submarine-launched ballistic missiles, sea-launched cruise missiles. Investigates the European nuclear theatre with assessments of accidental dangers during crises, launch on warning or under attack and the use of models to assess risks. Makes recommendations.

Acetylcholinesterase enzyme activity in fish sampled after the 1985 Newfoundland forest spray program for eastern hemlock looper using fenitrothion

by L.L. Fancey...et al. St. John's : Dept. of Fisheries and Oceans, Science Branch, 1987 iv, 10 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1579) ISSN 0706-6457
MICROLOG 88-01577 1 fiche

During the summer of 1985 two sites in insular Newfoundland were sprayed with fenitrothion by the government of Newfoundland to reduce the hemlock looper population. Two spray applications using 210 g a.i./ha were applied with 400 m buffer zones being left around streams. This report determines the effects on fish that are potentially sensitive to this type of operation. Atlantic salmon parr and juvenile brook trout were sampled at various times pre- and post-spray and assays for levels of brain acetylcholinesterase activity were carried out.

Achieving success : community economic development initiatives in northern communities

Whitehorse : Canada.Yukon Economic Development Agreement, 1987. 14 p. : ill. Bibliogr. (Community economic development ; booklet 4)
MICROLOG 88-03761 1 fiche

The concept of community economic development bases development plans on local needs and interests, catering to quality of life values desired by the local people with a broadening of goals to include regional, territorial, national and international economies. This document provides case examples of operating plans that created new jobs, developed community-owned businesses, assisted in the development of local skills, increased access and use of community, government and private resources, and contributed to the quality of life of the community. Includes two international examples. Projects profiled include the Yukon Women's Mini-Bus Society Whitehorse Transit; Yukon Indian Arts and Crafts Cooperative Limited; Mackenzie Delta Regional Development Corporation; Inuit Broadcasting Corporation-Inuit Communications Systems Limited; Suomussalmi, Finland; and, Co Chomuinn, Scotland.

Acid rain : a further estimate of the risk to Ontario's inland fisheries

by C.K. Minns. Burlington, Ont. : Canada Centre for Inland Waters, Great Lakes Fisheries Research Branch, 1986. vi, 17 p. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1874) ISSN 0706-6473
MICROLOG 88-02634 1 fiche

Minns (1981) published an analysis of the Ontario Ministry of Natural Resources lake inventory database. The database includes lake morphometry, a fish species list, and limited chemistry including conductivity and a crude field pH. Since that time, the Lake Inventory database has grown substantially and considerable effort has been put into compiling recent and reliable lake chemistry data including laboratory pH and alkalinity measures into a sensitivity database. In addition, the means of extrapolation from the database samples to the total lake population has been refined. This report provides an up-to-date estimate of the aquatic resources at risk, overall, and for particular game fish species.

Adsorption of nitrogen compounds on zeolites : final report

by L. Rodrigo and S. Kaliaguine. Québec : Université Laval, Département de génie chimique, 1987. xiii, 221 p. : ill. Bibliogr. *CANMET contract: 1ST84-00416.*
MICROLOG 88-03139 3 fiche

The heterocyclic nitrogen compounds present in crude oil cause problems such as catalyst poisoning and formation of nitrous oxides during combustion leading to environmental problems. These compounds are usually withdrawn from a given feedstock by hydrotreatment, which is a costly operation involving an expense of hydrogen at high pressure and moderately high temperature. Selective adsorption of these compounds in a packed bed may provide a simple alternative for their removal from feedstocks. The present work determines the magnitude of the parameters, such as effective diffusivities and adsorption coefficients for nitrogen compounds on zeolite adsorbents, using a chromatographic pulse response technique.

Advances in CAD/CAM and robotics : NRC contributions : commentary and bibliography

by J.H.C. Scrimgeour and F. Vernadat. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1987. ix, 27 p. Bibliogr.
MICROLOG 88-04435 1 fiche (Available on fiche only)

Work on CAD/CAM, robotics, and computer vision has been in progress at the National Research Council of Canada (NRC) at an increasing rate since 1980. This report presents highlights of more than 30 papers produced by NRC researchers and illustrates the various research and development efforts performed in the area of CAD/CAM and robotics over the last four years. Original contributions include realtime industrial computing, 3-D image acquisition and processing, CAD/CAM databases, CAM in the plastics industry, job shop scheduling and modelling, flexible manufacturing control, and CAD in building research. Provides a complete list of the papers published by NRC researchers.

Aerial spray trials with a baculovirus to control redheaded pine sawfly in Ontario in 1979 and 1980

by P. De Groot and J.C. Cunningham. Sault Ste. Marie : Canadian Forestry Service, 1983. 12 p. (Information report ; FPM-X-63) ISSN 0704-772X ISBN 0-662-12804-4
MICROLOG 88-01073 1 fiche

Aerial spray trials were conducted in 1979 to compare the efficacy of a redheaded pine sawfly baculovirus suspension formulated in water, molasses and Sandoz Shade with a suspension in water alone. In 1980, trials were conducted to compare the efficacy of the same virus dosage emitted at three application rates: 2.35, 4.70 and 9.70 L/ha and a comparison was made between the standard, lyophilized, virus-infected insect preparation and a purified virus suspension. The same virus dosage, PIBs/ha, was used in all three tests.

Affirmative action/employment equity -- Reviewed

by M. Young. Ottawa : Library of Parliament, Research Branch, 1987. 19 p. Bibliogr. (Current issue review ; 84-31E) *French ed. (L'action positive et...) on the same fiche.* ISBN 0-660-12607-9
MICROLOG 88-00795 1 fiche

This report surveys the history of the affirmative action movement including the federal human rights tribunal order that Canadian National hire women for one in four of its jobs in the St. Lawrence Region, and the 1983 mandatory affirmative action programs established in federal public service departments. Discusses the report of the Special Committee on Visible Minorities in Canadian Society entitled Equality Now, the November 1984 Royal Commission headed by Judge Rosalie Abella and her report Equality in Employment which resulted in Bill C-62, The Employment Equity Act. Considers a definition for affirmative action, reviews elements of programs, and discusses issues of reverse discrimination, the merit principle, and unintended effects. Discusses affirmative action in the context of the recession, the concept of equal pay for work of equal value, and the US experience, and documents a chronology of related parliamentary action.

Age and growth of steelhead in Vancouver Island populations

by R.S. Hooton...et al. Victoria : British Columbia, Ministry of Environment and Parks, 1987. v, 39 p. : ill., map. Bibliogr. (Fisheries technical circular ; no. 77)
MICROLOG 88-00567 1 fiche

Summarizes life history characteristics of winter and summer runs of wild and hatchery steelhead (since 1952) based on scale analysis. Where possible, annual growth rates and age structures are summarized for each stream and hatchery. To back-calculate lengths from scale measurements, the natural logarithm of scale radii vs the natural logarithm of body length for fish greater than 45 mm to adult size was used in the Fraser-Lee back-calculation procedure. Separate regression equations were calculated in systems with sufficient data, and for wild and hatchery fish. Recommendations for aging and back-calculation procedures are included with a discussion of limitations to scale analyses.

Aging of elastomers in CANDU pressure boundary service

by C.V. Berlo and J. Leidner. Ottawa : Atomic Energy Control Board, 1987. v, 155 p. : ill. Bibliogr. (Research report ; INFO-0251)
MICROLOG 88-01853 2 fiche

This report describes the properties and aging of elastomers, and examines the performance of major elastomeric components in CANDU pressure boundary service. The components examined are: vacuum building roof seals, pressure relief duct seals, airlock door seals, fuelling machine hoses, and cable penetrations. For each of these components, the design requirements, technical specifications and component testing procedures are compared with applicable standards. Information on actual and recommended monitoring and maintenance methods is presented. Operational and environmental stressors are identified. Component failure modes, causes and frequencies are described, as well as the remedial action taken. A summary of some experiences with elastomers from non-Canadian sources is contained in the last section.

Une Agrégation nouvelle des itinéraires de transport aérien (ANITA)

par R. Laferrière. Montréal : Université de Montréal, Centre de recherche sur les transports, 1988. ix, 106 p. Bibliogr. (Publication ; no. 574)
MICROLOG 88-04680 2 fiche

Cette thèse développe le modèle ANITA (Agrégation Nouvelle des Itinéraires de Transport Aérien) de la demande des déplacements aériens des personnes entre différentes paires de villes canadiennes. Après avoir défini les termes utilisés, on donne une brève description des données disponibles sur le transport aérien. Puis, on décrit le modèle ANITA et le modèle des allers sous-jacent à ce modèle pour ensuite proposer une classification des modèles des allers retrouvés dans la littérature. On étudie aussi l'agrégation des caractéristiques des voyages individuels, la fonction de vraisemblance du modèle de demande ANITA, ainsi que la banque de donnée constituée lors de la recherche. Finalement, le document présente les résultats et une discussion de ceux-ci.

An Agricultural capability rating system for reconstructed soils

by T.M. Macyk. Edmonton : Reclamation Research Technical Advisory Committee, 1987. viii, 27 p. Bibliogr. (Report ; RRTAC 87-13)
MICROLOG 88-03642 1 fiche

One of a series of reports presenting the findings of the Plains Hydrology and Reclamation Project, an interdisciplinary study focusing primarily on hydrologic aspects of reclamation of surface coal mines in the Plains of Alberta. The project involves a holistic approach to reclamation by integration of studies of geology, hydrogeology, and soils, not only in the proposed mining area, but also in the adjoining unmined areas. This report presents a system of assessing the agricultural capability of reconstructed soils based on climate, landscape, and soil factors. Criteria for placing reconstructed soils into soil capability classes for dryland agricultural uses are provided and a description of how to apply the reconstructed soil capability rating system is given.

Agricultural land base study : development opportunities for the future : agricultural inventory

Edmonton : Alberta Agriculture ; Environment ; Forestry, Lands and Wildlife ; Municipal Affairs ; Transportation, 1988. xxvi, 168 p. : ill., maps. Bibliogr. *CSI 34101.212.*
MICROLOG 88-05420 3 fiche

The Agricultural Land Base Study is an interdepartmental study designed as a long-range planning tool for future agricultural development. This report's goal is to estimate provincial and regional increases in production resulting from ten agricultural development opportunities. The ten alternatives deal only with opportunities for physical improvements in land and water management. They are green area conversion, irrigation expansion, drainage, deep plowing, liming, summerfallow reduction, range improvement, prairie range conversion, woodland conversion, and saline soil reclamation. The inventory's three primary tasks were to estimate the area, yield and crop mix for each of the development alternatives.

Agricultural land base study : executive summary

Agricultural Land Base Study (Alta.). Edmonton : The Study, 1988. 20 p. : maps.
MICROLOG 88-02765 1 fiche

Summary of a study to examine and compare a number of long-range management opportunities for expanding and intensifying agricultural production for the next 50-100 years. Resource development options examined include green area conversion, irrigation expansion, drainage, deep plowing, liming, summerfallow reduction, range improvement, prairie range conversion, woodland conversion, and saline soil reclamation, with maps showing each.

Agricultural pesticide retail inventory : Prince Edward Island, 1986

Ottawa : Environment Canada,. Conservation and Protection, Environmental Protection, Atlantic Region, 1988. vii, 19 p. (Surveillance report ; EP-5-AR-88-2) *CSI 21111.222.*
MICROLOG 88-06273 1 fiche

Agricultural chemicals play a central role in food production practices in Prince Edward Island. An assessment of use pattern and retailer user storage and handling practices were carried out in 1982. This report presents the results of a follow-up survey carried out for the 1986 calendar year to determine major existing retail sources; quantities of all pesticides sold (excluding domestic products), based on both active ingredient and total product; and storage and handling capabilities of the vendors operating. Information was collected by questionnaire, telephone canvassing, and direct interviews.

Agricultural real estate values in Alberta, 1986

Edmonton : Alberta Agriculture, Economic Services Division, Production and Resource Economics Branch, 1987. v, 43 p. : ill., maps. *CSI 34101.006.*
MICROLOG 88-02343 1 fiche

Annual report for 1986 on agricultural real estate values in rural Alberta, based on those values registered by buyers and sellers in the Land Titles Offices, and compiled as agricultural real estate values between January 1 and December 31, 1986. Land and building values are not separated. Agricultural real estate is defined to include parcels of over 60 acres (25 hectares) which record transfer values between $5.00 and $1.500.00 per acre ($12 and $3,700 per hectare) on the date of registration. Data is compiled on a provincial and municipal basis (county municipal district, improvement district or special area), excluding national parks. Comparisons are made with the previous year.

Agricultural statistics for Ontario, 1987

Ontario. Ministry of Agriculture and Food. Statistics and Surveys Unit. Toronto : The Unit, 1988. xi, 98 p. *CSI 55101.002.* ISSN 0568-2894
MICROLOG 88-06414 2 fiche

Annual compilation of data covering financial details and population; food industry; selected census data; international trade; field crops; livestock and poultry; and dairy. Also included is a profile of agriculture in the province a century ago to mark the centennial of the Ministry. Data are derived from telephone, mail-in and enumerative surveys of farmers for agricultural production; the 5-year census of agriculture, particularly those areas dealing with livestock inventory and crop area estimates; and administrative data, consisting of complete or nearly complete counts of imports, exports, and marketings of inspected or controlled commodities. Most data compares the current and previous years, but some historical information is given. Data is given for the province and Canada, and international trade data includes the United States, the United Kingdom, the European Economic Community, and Japan.

Agriculture : catégorie scientifique et professionnelle

Ottawa : Conseil du trésor du Canada, Secrétariat, 1987. 44, 42 p. (Norme de classification ; 202) *Bilingue (Agriculture : scientific...).* ISBN 0-660-53877-6
MICROLOG 88-05917 2 fiche

Cette norme décrit le système à utiliser pour la classification des postes attribués au groupe de l'agriculture. L'évaluation des emplois vise à déterminer leur valeur respective au sein de chaque groupe d'occupations. Cinq facteurs régissent l'évaluation et l'attribution d'un niveau de classification des postes: nature des travaux, complexité du travail, responsabilités professionnelles et administratives, ainsi que portée des recommandations et des activités. Le document comprend des définitions de la catégorie scientifique et professionnelle et du groupe d'occupations, la définition et les caractéristiques des facteurs, un sommaire des degrés et la description des postes-repères.

Agriculture : scientific and professional category

Ottawa : Treasury Board of Canada Secretariat, 1987. 42, 44 p. (Classification standard 202) *Bilingual (Agriculture : catégorie scientifique...).* ISBN 0-660-53877-6
MICROLOG 88-05917 2 fiche

Describes the plan to be used to classify positions allocated to the Agriculture Group. It consists of an introduction, definition of the Scientific and Professional Category and the occupational group, factor definition and characteristics, degree highlights and benchmark position descriptions. The job evaluation determines the relative values of jobs in each occupational group. A classification plan of five levels, representing significant differences in the difficulty of the work, has been established for this group. Jobs assigned to a given level are regarded as being of equal difficulty.

Aide au revenu au Nouveau-Brunswick : objectif 1990

par R. Lévesque. Fredericton : Ministère de l'aide au revenu, 1987. 148 p. : ill. Bibliogr. *L'éd. anglaise (Income assistance in...) : 88-03496/2.*
MICROLOG 88-03497 2 fiche

Pour compléter le processus d'amélioration du rendement au ministère de l'Aide au revenu, l'auteur tente, par l'examen de l'efficacité organisationnelle, de définir en termes d'exploitation quels sont les services et les programmes minimums inhérents à un programme de système de sécurité du revenu qui ne soit applicable qu'en dernier ressort. Le document contient ensuite des propositions quant à l'organisation du travail, de même que relativement aux rapports qui devraient exister entre les différents secteurs de responsabilité. A la lumière de ces nouveaux critères, l'auteur tente de déterminer quelles sont les ressources humaines minimales nécessaires pour que soient respectées des normes acceptables en ce qui a trait à la charge et au milieu de travail.

AIDS -- Reviewed

by R. Milko. Ottawa : Library of Parliament, Research Branch, 1987. 18 p. Bibliogr. (Current issue review ; 85-15E) *French ed. (Le SIDA) on the same fiche.* ISBN 0-660-12556-0
MICROLOG 88-00798 1 fiche

Since Canada's first case in February 1982, eight months after the US, the spread and numbers succumbing to AIDS has been dramatic. This report discusses the scientific and public health issues that have developed, and the resulting public fear due to the severity of AIDS, the lack of an effective treatment and its epidemic nature. Decribes the strain on existing medical care and social assistance programs because of the strong possibility that a cure or vaccine may not be developed for several years. Gives an etiology, discusses epidemiology and modes of transmission, associated diseases, its viral natural history, vaccine development and drug efficacy. Documents a chronology of events from the first US recognition of AIDS to related Canadian government activity.

Airflow determination for radiation emanation investigations of a large worked out area of a uranium mine

by S.G. Hardcastle and J. Bigu. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 23 p. Bibliogr. (Report ; MRL 87-112(TR))
MICROLOG 88-01183 1 fiche

The determination of airflow parameters, including quantity flow, average residence time and total clearance time, is crucial in determining radon emanation rates in order to model or predict underground radiation levels. Documented are two tracer gas investigations of a large area of a uranium mine comprising 19 stopes in two reefs and associated drivages. Sulphur hexafluoride, SF6, was the tracer gas employed. Measurements and analysis of SF6 were performed by a grab-sampling and later laboratory-based gas chromatography method. Pulse and continuous tracer gas injection methods were used and standard anemometry was used concurrently with both.

Airship flight dynamics analysis : final report

prepared by Transportation Development Centre, by Subsonic Aerodynamics Group, University of Toronto Institute for Aerospace Studies ; by J.D. DeLaurier, Justin Amann. Toronto : University of Toronto Institute for Aerospace Studies, Subsonic Aerodynamics Group, 1986. xiv, 37 p. Bibliogr. *TP 8101E.*
MICROLOG 88-00335 1 fiche

Report discussing a six degree of freedom nonlinear airship flight simulation program developed at the University of Toronto and tested using the Airship Industries SKYSHIP 500 as a sample airship. SKYSHIP 500 flight test data were available for a wide variety of manoeuvres and the simulation program was run for the same set of manoeuvres to see how closely predictions would match measured results. Information was modeled on a three-view drawing, maximum take-off weight and cruise speed, with weight breakdown and aerodynamic properties estimated. The simulation was used to put the SKYSHIP 500 through tests measuring trim drag, turn rate vs. rudder angle, frequency response to control inputs and transient response to throttle inputs. Frequency response tests were simulated by giving the elevator or rudder a frequency sweep and a Fournier analysis performed on the results to obtain gain and phase relationships between output and input.

An Algorithm for the decomposition of arc flows into path flows for the GSPEP

by O. Drissi-Kaitouni. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 11 p. : ill. Bibliogr. (Publication ; no. 569)
MICROLOG 88-03981 1 fiche

Paper considering the General Spatial Price Equilibrium Problem (GSPEP), which may be formulated either for path flow variables or arc flow variables for origin-destination matrices and transportation of goods. An algorithm is proposed, called conversion of arc flows into path flows (CAFPF), which is then used after the GSPEP has been solved in terms of arc flows, leading to the information on the O/D demand matrix and a transportation strategy.

An Algorithm for the design of mailbox collection routes in urban areas

by G. Laporte...et al. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 17 p. : ill. Bibliogr. (Publication ; no. 567)
MICROLOG 88-03979 1 fiche

Mailbox collection is a complex and costly operation in most postal services. This paper describes an improvement to the clustering and routing algorithm currently in use. Various traffic and union rules affecting mailbox collection in an urban context are first described and their effect on shortest distance computations is explained. This is followed by a description of the clustering and routing algorithm currently used at Canada Post Corporation (CPC). A model and a generalized travelling salesman algorithm which take the various rules into account are then presented. It is then shown how the CPC routes can sometimes be improved by using the proposed algorithm as a post-optimizer.
PS SC TR

An Algorithm for the shortest path problem with resource constraints

by M. Desrochers. Montreal : Université de Montréal, Centre de recherche sur les transports, 1986. 31 p. Bibliogr. (Publication ; no. 421A)
MICROLOG 88-00536 1 fiche

One of the most common subproblems encountered during the solution of routing, scheduling and telecommunications problems is the shortest path problem. The algorithm described in this paper was developed for the solution of subproblem encountered during the construction of work schedules for urban bus drivers using a column generation method. The algorithm presented is a primal-dual type which uses dynamic programming to calculate the shortest path in a network while respecting time window constraints of the form. A primal function and a dual function are defined at each node based on the known paths. The algorithm calculates new feasible primal and dual functions and runs in pseudo-polynomial time for problems with up to 1000 nodes and L=5 additional constraints.

Algorithms for solving crane scheduling problems

by J. Wang. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1984. xix, 125 p. : ill. Bibliogr. (Technical report ; TR-SYS-005)
MICROLOG 88-04469 2 fiche (Available on fiche only)

A mathematical description is presented for formulating crane scheduling problems. Various versions of the problem are introduced. The general crane scheduling problem and some of its special cases belong to a class of problem for which no efficient algorithms are available for their solution. In this report, efficient approximate methods are described which can find good schedules not only for crane problems with equal job processing times but also for the general crane problem.

Aliages : a system for the assignment of bus routes to garages

by J.-M. Rousseau, R. Lessard and M. Désilets. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. 10 p. Bibliogr. (Publication ; no. 531)
MICROLOG 88-03983 1 fiche

Description of a system to assign vehicle trips independently or by lines to the various garages of a transit company in order to minimize the number of vehicles required in the deadhead costs. The system can also be used to study the optimal location of new garages. A heuristic procedure is proposed for solving this problem because of the variety of operational constraints which must be respected. These constraints include the requirement for trips of a subset of routes to be assigned to a specific garage, to only one garage among a given subset, or to be split amongst no more than two or three garages. Constraint on the minimum and maximum number of buses assigned to a garage for peak and off-peak services are also imposed. The problem and solution methods are discussed in the context of the S.T.C.U.M., (the Montreal Transit Commission) where the system will be implemented.

Alive searches as complementing death searches in the epidemiological follow-up of Ontario miners

by M.E. Fair...et al. Ottawa : Atomic Energy Control Board, 1988. vi, 39 p. (Research report ; INFO-0266)
MICROLOG 88-06136 1 fiche

Alive searches were used to complement the death searches in a study of the mortality experience of a cohort of Ontario miners to develop a way of distinguishing between those who are confirmed alive at a given time, and those who are lost to follow-up. A total of 30,000 Workers' Compensation Board (WCB) records with valid Social Insurance Numbers (SIN) were used to search the income tax files by computer over two consecutive years (1977-78) representing nearly 27 million tax returns. These tax file searches using SIN numbers have provided information on the procedures to be used in, and likely success of, the corresponding searches of the tax files that could be carried out where the SIN number is not available on the work records. The latter kind of search would have to be based on names, birth dates and such, and would be probabilistic in nature.

Alkali aggregate reactions in Canada : a bibliography -- 3d ed.

by C. Rogers and S. Worton. Toronto : Engineering Materials Office., 1988. 26 p. (Report ; EM-73)
MICROLOG 88-03026 1 fiche

Copies of these documents are available from:
Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

Alkali-aggregate reactions in Portland cement concrete are becoming a greater problem than formerly suspected in some parts of Canada. This is due partly to a gradual increase in alkali contents of Canadian cements and also to the increasing diversity of rock types used as aggregate. A greater awareness of the nature of the problem and the recognition of previously unidentified alkali-reactive aggregates has also contributed to increased concern. This bibliography has been compiled to serve as a guide to existing Canadian work on these reactions. It is hoped that this will be a useful tool for further research. Papers selected for inclusion fall into three broad categories: work on Canadian reactive aggregates by Canadian researchers; work on Canadian reactive aggregates by researchers in other countries; papers on the evaluation and testing of Canadian aggregates or concrete where alkali-reactivity, or the lack of it, is briefly mentioned.

Alkyllead contaminations in the St. Lawrence River and St. Clair River, 1981-87

by P.T.S. Wong...et al. Burlington, Ont. : Great Lakes Laboratory for Fisheries and Aquatic Sciences, Bayfield Institute, 1988. x, 134 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1602)
ISSN 0706-6457
MICROLOG 88-03801 2 fiche

The environmental occurrence of alkyllead compounds is derived mainly from anthropogenic sources such as effluents from alkyllead production plants. There were 2 plants in Ontario in 1981: DuPont Canada Inc. in Maitland (St. Lawrence River) and Ethyl Canada Inc. in Corunna (St. Clair River). A survey was conducted of the extent of alkyllead contamination in environmental samples (fish, clams, macrophytes, sediments and water) in areas upstream and downstream from these sources of alkylleads. For comparison, fish were taken from Lake St. Lawrence and Lake St. Francis, 76 and 112 km respectively downstream of Maitland. Alkylleads were determined by a gas chromatograph-atomic absorption spectrometer method with detection limits for biota (8 ug/Kg), sediment (15 ug/Kg) and water (8 ug/L).

Allometry, growth, yield, and prices for aspen in the Temiscouata region of Quebec

by R. Zarnovican and D. Ouellet. Sainte-Foy, Que. : Canadian Forestry Service, Laurentian Forestry Centre, 1987. xii, 44 p. : ill. Bibliogr. (Information report ; LAU-X-78E)
ISSN 0835-1570 ISBN 0-662-15847-4
MICROLOG 88-04958 1 fiche

Conversion of forest stands oblige the forest manager to have a thorough knowledge of several aspects of yield, silvicultural practices and market prices of wood products for both existing species and those of the future. This report deals with problems raised by the conversion of private aspen-forest lands in the Lower St. Lawrence, specifically the Temiscouata region. The study focused on allometric and temporal relationships to track the principal growth-related parameters, establish volume tables, stand structure and tree morphology, and determine the yield of wood that is suitable for various purposes. The findings concerning assortment are related to price changes affecting activity on private forest lands.

Alter-Harmony : control of a PUMA robot from the chorus multiprocessor

by D.H. O'Hara, S. Elgazzar and G. The. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1987. v, 34 p. Bibliogr.
MICROLOG 88-04449 1 fiche (Available on fiche only)

The PUMA family of robots may be controlled through an external channel for realtime path modification, called ALTER control. As conceived by the manufacturer, this link transmits data to the controller to modify a preprogrammed path. As described here, ALTER is used to specify the total motion of the robot. A capability is provided for Cartesian motions in workspace coordinates, i.e., full control of position and orientation. Two methods of specifying orientation are used. Angle specification in VAL II programs uses the Euler angle nomenclature whereas ALTER uses the roll-pitch-yaw description. The relationship between these two and their relationship to the homogeneous transformation for describing position and orientation are described.

L'Altération des dispositifs antipollution des véhicules automobiles

par D.L. Cope. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1988. vi, 26, viii, 24 p. : ill. Bibliogr. (Rapport ; SPE 2/TS/6) *Bilingue (Vehicle emissions control...).* ISBN 0-662-94825-4
MICROLOG 88-03673 1 fiche

Dans le cadre d'un effort visant à limiter les effets délétères des polluants émis par les véhicules automobiles, le gouvernement fédéral a réglementé les émissions d'hydrocarbures imbrûlés, de monoxyde de carbone et d'oxyde d'azote par les véhicules légers. Pour vérifier

l'efficacité des normes antipollution dans leur pays respectif, le gouvernement du Canada et celui des Etats-Unis ont autorisé la tenue d'essais portant sur des véhicules déterminés qui composent le parc automobile de chaque pays. L'objet de ce rapport est d'obtenir une vue d'ensemble du problème que pose l'altération des dispositifs antipollution des véhicules légers. Il définit cette pratique, en examine la fréquence et les répercussions sur le dégagement de polluants par les véhicules non conformes ainsi que les répercussions sur la qualité de l'air à la grandeur du pays; il recommande aussi des méthodes de contrôle visant à limiter cette pratique.

Aluminum alloy castings : production routes for optimum fracture toughness

by G. Bellamy. Toronto : Ontario Hydro, Research Division, 1987. i, 19, 4 p. : ill. (Report ; no. 87-172-K)
MICROLOG 88-00140 1 fiche

Most specifications for aluminum alloy castings are particularly undemanding. Despite this many suppliers are unable to meet minumum ductility requirements and the fracture toughness of their products is extremely poor. A research program was carried out to determine why the castings perform so poorly and to demonstrate how considerable improvements may be obtained. This report defines the impact and importance of alloy composition, melting technique, pouring temperature, mould material and temperature and heat treatment in provision of high integrity castings for transmission related structures. The successful techniques developed are applicable to processes involving use of sand, plaster or permanent metal moulds.

L'Aménagement forestier au Canada -- Revu

par J.-P. Amyot. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 10 p. Bibliogr. (Bulletin d'actualité ; 87-1F) *L'éd. anglaise (Forest management in Canada) sur la même fiche.* ISBN 0-660-92129-4
MICROLOG 88-00834 1 fiche

Ayant longtemps souffert de grandes lacunes au niveau du reboisement et de la mise en oeuvre de pratiques sylvicoles apropriées, les forêts du pays ne suffisent plus à satisfaire à la demande croissante de leurs utilisateurs. Dans ce bulletin préparé à l'intention des parlementaires à Ottawa, on fait état succinctement des changements et des faits nouveaux qui se produisent en ce qui concerne la gestion des forêts et l'aménagement forestier par le gouvernement canadien. La description des actions du gouvernement fédéral est précédée d'un aperçu général sur les ressources forestières.

Amendement à la charte du Collège Militaire Royal de Saint-Jean pour lui permettre de décerner des diplômes de deuxième et de troisième cycles

avis du Conseil des universités au ministre de l'Enseignement supérieur et de la Science. Québec : Conseil des universités, 1988. 8 p. *Code: 2301-0095. Avis no 87.13.* ISSN 0709-3985 ISBN 2-550-18598-6
MICROLOG 88-02996 1 fiche

En mai 1985, le Conseil des universités adressait au ministre de l'Enseignement supérieur, de la Science et de la Technologie un avis qui recommandait l'octroi d'une charte universitaire au Collège militaire Royal de Saint-Jean. Le Conseil recommande maintenant de modifier la loi de 1985 pour y inclure des programmes de 2e et 3e cycle. Le Conseil est d'avis qu'une telle modification consoliderait la position du Collège militaire Royal de Sain-Jean, seul établissement universitaire francophone au sein des Forces armées, et lui donnerait un statut équivalent à celui des autres collèges militaires canadiens.

Ammoniacal copper arsenate wood preservation facilities : recommendations for design and operation

by D.E. Konasewich and F.A. Henning. Ottawa : Environment Canada, Environmental Protection Service, 1988. xii, 88 p. : ill. Bibliogr. (Report ; EPS 2/WP/4) *French ed. (Installations de préservation...)* : *88-03692/2.*
ISBN 0-662-16126-2
MICROLOG 88-03691 2 fiche

Wood preservation is the pressure or thermal impregnation of chemicals into wood to a depth that will provide effective long-term resistance to attack by fungi, insects, and marine borers. The chemicals predominantly used in Canada for wood preservation are pentachlorophenol, creosote, and aqueous formulations of arsenic, copper, chromium or ammonia. The wood preservation process deposits or fixes these chemicals in the wood, and the toxic nature of the chemicals effectively prevents the attack of living organisms on the wood. Because the chemicals are also toxic in varying degrees to humans and aquatic organisms, their use in industry must be carefully controlled. This document provides guidelines for the design and operation of wood preservation facilities in a manner that will protect workers and the environment from harmful exposure to wood preservation chemicals.

Anaerobic technology : a review of research, development and demonstration activity in the agrifood and pulp and paper industries

by H.M. Brewer. Ottawa : Environment Canada, Environmental Protection Service, 1988. xiv, 105 p. Bibliogr. (Report ; EPS 4/AN/1) *Bilingual (Technologie anaérobie : compte...).* ISBN 0-662-55802-2
MICROLOG 88-04774 2 fiche

An overview of research, development and demonstration of anaerobic technology for the Agrifood and pulp and paper industries was researched for this report. The anaerobic activities in specific sectors of these industries is outlined and a brief summary of anaerobic fundamentals is presented. Information on effectiveness of the anaerobic process, as well as economics and energy related matters is included. The information presented in this review is the result of an extensive literature search in which relevant papers and published reports dating from 1975 to the present were collected. The review is not a source of engineering detail or operational data but is an observation of the development activity occuring in the field of anaerobic technology. Specific coverage includes: an introduction to high-rate reactor configurations, identification of waste sources and treatability characteristics, description of the process systems employed, comments regarding the effectiveness of the technology, and discussion of the energy and economic implications.

An Analog analysis of delay-lock tracking of stochastic signals

by C.M.G. Zwarts. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1985. viii, 102 p. : ill. Bibliogr. (Technical report ; TR-RW-003)
MICROLOG 88-04474 2 fiche (Available on fiche only)

Theory developed to obtain a better understanding of a delay-locked loop instrument designed to measure accurately velocities of rail vehicles. The report discusses the non-contacting measurement of velocity, length and distance with a delay-locked loop and analyzed the non-linear behaviour of the loop for both inherent system noise and externally generated noise. As well, analytical methods are developed to analyse the non-linear behaviour for both small and large amplitude time-delay perturbations.

Analysis of Ottawa River suspended sediments and related water fractions for toxicity, fecal sterols and various microbiological parameters

by B.J. Dutka and R.C. McCrea. Burlington, Ont. . Canada Centre for Inland Waters. National Water Research Institute, 1986. 11 p. Bibliogr. (NWRI contribution : 86-159)
MICROLOG 88-04723 1 fiche

Toxic metals and organic contaminants are often associated with particulates and bottom sediments in aquatic systems. In rivers, particulate matter can play an important role in the fate and transport of these substances. This study was initiated to investigate the potential and practicality of using suspended sediments for the estimation of toxicant and genotoxic chemical concentrations as measured by microbial screening tests. This investigation also provided an opportunity to evaluate fecal sterol concentration estimations as well as the estimation of the traditional health hazard microbial indicators, fecal coliforms, E. coli and coliphage in suspended sediments.

Analysis of some elements of forest production in the Chic-Chocs Management Unit (western section)

by R. Zarnovican. Sainte-Foy, Quebec Larentian Forestry Centre, 1987. viii, 30 p. Bibliogr. (Information report ; LAU-X-74E)
ISSN 0835-1570 ISBN 0-662-15185-2
MICROLOG 88-00720 1 fiche

Rational forest management to produce wood in quantity and quality calls for detailed knowledge of the production capacities of trees and stands. In Quebec, this capacity is evaluated on the basis of the site index: the height at a given age, the forest's flora, or the volume increment, none of which are very efficient. This study analyzed the different growth data, together with the interrelations among them, in order to establish quantitative criteria suited for the classification of stands. Growth data were taken from sample plots identified during 1978 and 1979 summer projects concentrated around Lake Joffre, and sample plots identified in 1984 in the west of the management unit's territory.

An Analysis of the information content of alternative credit aggregates

by L. Milton. Ottawa : Bank of Canada, 1988. ii, 42 p. Bibliogr. (Technical report ; no. 49)
MICROLOG 88-05104 1 fiche

This report evaluates the information content of 25 measures of credit with respect to 3 macroeconomic variables: nominal spending, real spending and prices. Initially, descriptive techniques are used to assess the contemporaneous and leading relationships between the credit aggregates and the 3 goal variables. Next, bivariate vector autoregression models are constructed by regressing each of the goal variables on its own past values, then adding contemporaneous and lagged values of the credit aggregates. Multivariate models are developed by introducing other financial variables into the simple bivariate equations as explanatory variables. The models using different measures of credit are compared with one another and with models using various monetary aggregates.

Analysis of water chemistry data for 28 rivers in Atlantic Canada

by P.E.J. Green...et al. Moncton, N.B. : Environment Canada, Water Quality Branch, Inland Waters Directorate, Atlantic Region, 1986. 2 v. : ill. Bibliogr. *CSI 21111.215.*
MICROLOG 88-04746 5 fiche

In recent years, there has been much concern over the potential or realized environmental impacts of the long-range transport of acidifying substances in the atmosphere, and several studies done in Atlantic Canada have reported changes in water chemistry in recent decades. This research report presents the results of a statistical analysis of water quality data for 28 rivers in Atlantic Canada (13 in Nova Scotia, 4 in New Brunswick, 2 in Prince Edward Island and 9 in Newfoundland). For some of the rivers, data are available from 1966-85, with sample sizes that exceed 200 dates over that period. The data was examined for longer-term temporal trends in water chemistry, as well as for identification of shorter-term events of relatively high or low concentration.

The Anemiacean, Schizaeacean and related spores : an index to genera and species

by E.H. Davies. Dartmouth, N.S. : Bedford Institute of Oceanography, 1985. vii, 217 p. Bibliogr. (Canadian technical report of hydrography and ocean sciences ; no. 67)
ISSN 0711-6774
MICROLOG 88-02388 3 fiche

Mesozoic and Cenzoic fossil spores with cicatricose, canaliculate, costate or striate ornament form a coherent morphological group with close phylogenetic affinities. Previously proposed phylogentic classification schemes for the Schizaeales were based mainly on characteristics of recent taxa. A modified phylygentic classification is proposed to incorporate data from the fossil spore record. A 5-part index of genera and species for costate spores, reticulate monolete spores, biorecords, implicated spores and pollen, macrofossils and recent plants is ordered alphabetically and includes 1843 entries, 177 new combinations, 11 new names, and 3 changes of rank.

ANEVENT : an interactive computer modelling package based on discrete event simulation : Pascal version program documentation

by C. Angers and P.W.U. Graefe. Ottawa National Research Council Canada, Division of Mechanical Engineering, 1983. iv, 45 p. : ill. Bibliogr. (Technical report ; TR-SYS-001)
MICROLOG 88-04470 1 fiche (Available on fiche only)

The Division has been collaborating with industry in the modelling and simulation of industrial plants. The models developed addressed themselves to investigations of current plant operations, equipment evaluations, impact of proposed plant expansions or the design of new plants or transportation systems, modelled as either discrete processes or a mixture of discrete and continuous processes. Out of these activities and the simulation language GASP II the ANEVENT simulation package (ANEVENT= ANalysis laboratory discrete EVENT) has evolved, providing a structure for building interactive, discrete event computer models and providing a number of problem independent subroutines to be used in the model building. This document describes the overall structure of these discrete event models, interactive or otherwise, and documents the purpose and use of all routines available with the ANEVENT simulation package.

Anisotropic properties studies of Lac Du Bonnet granite specimens : report no. 3

by R. Jackson. Ottawa : Canada Centre for Mineral and Energy Technology, 1986. vi, 88 p. Bibliogr. (Report ; M&ET MRL 86-142(TR))
MICROLOG 88-01176 1 fiche

As part of the Canadian Nuclear Fuel Waste Management Project, Atomic Energy of Canada Limited is characterizing various rock formations to determine their suitability for long term disposal of high level wastes. The program included the construction of an underground research laboratory near Pinawa, Manitoba to provide an opportunity for extensive in situ investigations. Biaxial testing conducted on core obtained during the construction phase has indicated that the rock may be anisotropic in terms of modulus of elasticity. This report presents the third of a series of reports. Compressive and shear wave velocity measurements, as well as uniaxial compression testing, were conducted on samples from boreholes located in the Lac du Bonnet batholith. A final report containing a detailed analysis of the results will be written after all the samples have been tested.

Annual crops for forage in the Alberta parklands

by B. Berkenkamp and J. Meeres. Ottawa : Agriculture Canada, Research Branch, 1988. v, 38 p. (Technical bulletin ; 1988-1E) *CSI 21100.002.* ISBN 0-662-15764-8
MICROLOG 88-06198 1 fiche

The annuals for forage program was begun in 1979, completed in 1983. It was designed to cover the black and grey wooded soil-climate zones, establish the potential of various species for forage production and evaluate cultivars from diverse sources. All annuals were seeded in small plots (1.2m X 6.0m) and harvested to determine fresh weight; a subsample was oven-dried to determine dry weight yield as kilograms per hectare. The dried samples were used to determine protein content and acid detergent fibre, from which digestible energy content was estimated. The report gives the results of that program, for oats, barley, wheat, rye, triticale, sunflower, faba bean, pea, corn, proso and foxtail millet, Italian ryegrass, winter cereal pastures, and Brassica species.

Annual per capita consumption of food in Canada, 1985, 1986

Winnipeg : Manitoba Agriculture, Economics Branch, 1988. 4 p. (Agriculture statistics) *CSI 41100.010.*
MICROLOG 88-02120 1 fiche

Release summarizes relative importance of selected foods in the consumptive patterns of Canadian consumers. The data, derived from the net food supply statistics, are the difference between gross food supply (production, imports, initial stocks) and food exports and ending stocks with adjustments for manufacturing inputs, seed, livestock feed and wastage. Per capita consumption estimates do not indicate the amount of food actually consumed, but the amount of food that is available for consumption, on the average, by July 1, 1985 and 1986. Data for 1986 are preliminary and may be subject to revisions.

Anthropomorphic phantom radiation dosimetry at the NATO standard reference point at Aberdeen Proving Ground

by T. Cousins and L.P. Rushton. Ottawa : Defence Research Establisment Ottawa, 1987. iii, 28 p. : ill. Bibliogr. (Report : no. 968)
MICROLOG 88-01581 1 fiche

The need to establish the relationship between the measured dose from a military dosimeter, worn at a particular location on a soldier's body, and the corresponding expected biological effects is apparent. As part of the NATO Dosimetry Intercomparison Project, a series of experiments were conducted at Aberdeen Proving Ground in September 1986 to determine neutron and gamma-ray doses delivered to various internal and external locations on an anthropomorphic phantom from fission sources. The results are to be used to validate computer simulations of the Aberdeen environment to understand completely the correlation between dosimeter reading and bone marrow dose, or other parameters relating to performance decrement.

Aperçu de l'industrie canadienne des traitements de surface : état de l'industrie et mesures de lutte contre la pollution

Canada. Conservation et la protection. Division des industries chimiques. Ottawa : Environnement Canada, Service de la protection de l'environnement, 1987. xi, 117, 5 p. : ill. Bibliogr. (Rapport ; SPE 2/SF/1)
MICROLOG 88-02071 2 fiche

Les procédés de traitement de surface produisent des eaux usées chargées de polluants potentiellement toxiques comme des métaux et des solvants organiques ainsi que des acides qui, s'ils sont rejetés dans les réseaux d'égouts municipaux, peuvent corroder les canalisations et endommager les installations électriques. Le présent rapport expose les résultats d'une enquête nationale, réalisée en 1983-1984, sur les procédés de traitement de surface; la production et le traitement des déchets solides, liquides et gazeux; et les règlements et l'application des règlements aux paliers fédéral, provincial et municipal. Le principal objectif était d'identifier les problèmes environnementaux potentiels et de recommander des mesures préventives ou correctives.

Application of Centrax Separation Process to liquid products from ten different coprocessing slurry samples : final report

by Sandwell Technologies. s.l. : Sandwell, 1985. 100 p. : ill. Bibliogr. *CANMET contract: OSQ84-00237.*
MICROLOG 88-03129 2 fiche

The Centrax Process was applied to ten different slurry samples from CANMET coprocessing. The slurry samples were characterized as to physical and chemical properties including concentration of oil, asphaltenes, pre-asphaltenes, unconverted coal and ash, boiling point distributions and visual observations. Preliminary separations/extractions were carried out in a batch mode to investigate the effect of temperature of separation, amount of extractant and type of extractant on ash removal and liquid product recoveries. Based on these preliminary investigations a multi-stage counter-current process configuration was developed. Separation/extractions simulating this process were carried out. Material balance flow diagrams were constructed from the results of these simulations. A discussion of the scale-up is presented.

Application of stress-property-deformation relation (SPDR) integrated method in determining surface mine stability : final report

Serata Geomechanics, Inc.. Richmond, Calif. : Serata Geomechanics, 1987. ii, 113 p. : ill. Bibliogr. *CANMET contract: 69021-01-SQ.*
MICROLOG 88-03394 2 fiche

Project to develop a method for quantitatively assessing the stability of slopes in an open pit mine by developing a site-specific finite element model of the ground in Pit 3 of the Highvale mine. The stress-property-deformation relation (SPDR method) is used as a tool to quantify the geomechanical behaviour of the mine ground. This phase of the project applies the model developed in the previous phase with accuracy of the predictions made by the model ascertained by referring to geotechnical studies made in the mine. The site-specific model will then be applied to a variety of different designs to ascertain sensitivity of the model to variations in input reflecting different excavation parameters.

Approximate formulas for the computation of connection delays under capacity restrictions in rail freight transportation

by T.G. Crainic and M. Gendreau. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. 23 p. Bibliogr. (Publication : no. 438) *Presented at the fourth World Conference on Transport Research, May 11-15, 1986.*
MICROLOG 88-00465 1 fiche

Understanding terminal operations and controlling yard delays may have a very significant impact on the system performance. The objective is to propose a good connection delay model which integrates the important factor of the train service capacity and to derive accurate delay formulas that may be integrated into a global network optimization model. The main yard operations and delays are described and previous connection delay and network models are reviewed. The queueing model for the connection operation and the formulas used to estimate the resulting average connection delay are then presented, with the integration of this model into a network model and an examination of the consequent variation in the performance of the network model.

Aquaculture : a discussion paper

Victoria : Office of the Ombudsman, 1987. 24 p. Bibliogr.
MICROLOG 88-04599 1 fiche

Aquaculture presents exciting and yet potentially controversial challenges as one of B.C.'s newest industries and may hold great promise for the future of the coastal economy. This report is one element of a two part process currently being undertaken by the Ombudsman's office. The first component deals with investigation of specific complaints brought by individuals with respect to the practice of salmon farming and its regulation by provincial ministries. The second component is a systems study of aquaculture regulation and administrative process of which this discussion paper is a part. This study reflects a preventive approach to administrative fairness, and has as its goal the creation of constructive recommendations which will enhance the fairness of the administration of those who use, share, and allocate coastal land and waters.

Guide to two genera of aradid bugs known to occur in Canada and adjacent states of the United States. For each species, information is given on synonyms, a brief diagnosis, distribution, and associated plants. Almost all species are illustrated by habitus photographs and line drawings of antennae, pronota, and posterior abdominal segments. A distribution map is given for most species, and a key to subfamilies and genera in Canada is also included.

Archaeological investigations at the Saint-Louis Curtain and Ursuline Bastion, Quebec City : preliminary results

by G. Pédalue. Ottawa : Environment Canada, Parks, 1988. 6 p. : ill. Bibliogr. (Research bulletin ; no. 263) *French ed. (Interventions archéologiques à...) on the same fiche.* ISSN 0228-1228
MICROLOG 88-02641 1 fiche

The fortification that surrounds the old city of Quebec has undergone, since 1971, systematic restoration in order to check the deterioration of its components. In 1986 Environment Canada (Parks) proceeded with the stabilization of the section of wall located between Saint-Louis Gate and Kent gate on the western front, the details of which are described in this document.

Archean lode gold deposits in Ontario

by A.C. Colvine...et al. Toronto : Ministry of Northern Development and Mines, Mines and Minerals Division, 1988. xii, 136 p. : ill. Bibliogr. (Ontario Geological Survey miscellaneous paper ; 139) ISSN 0704-2752
MICROLOG 88-06086 2 fiche

In the 4 years since the publication of a preliminary version of this report, extensive new descriptive data on Archean lode gold deposits has been generated and research into the genesis of gold deposits has also increased. Part I expands on the premise discussed in Colvine et al. (1984) that most, if not all, Archean lode gold deposits and mining camps are drawn together into a composite depositional model which attempts to explain the variability in many of the inherent characteristics of gold deposits by the interaction of a defined set of fundamental geological variables. Part II discussed the more fundamental problems of where gold came from and how it was transported into its depositional sites and examines the crustal scale processes which were temporarily related to the gold mineralizing event.

Arctic arms control : constraints and opportunities

by R.G. Purver. Ottawa : Canadian Institute for International Peace and Security, 1988. 80 p. : ill. Bibliogr. (Occasional papers ; no. 3) ISBN 0-662-15900-4
MICROLOG 88-02714 1 fiche

Responding to heightened military interest and the call for arms control in the Arctic, an area which only received attention when long-range bombers and the defences against them were of strategic importance to the Superpowers, this paper examines a variety of past proposals for such arms control measures. Details the lack of interest among governments concerned, and determines feasability and desirablitiy of enhancing security in the Arctic. Discusses the concept of nuclear weapon-free zone as has been often proposed for the Arctic, especially one that would include most of Northern Europe. Addresses the issue of demilitarization, as carried out in Antarctica, and the type of arms control known as confidence-building measures, with reference to two specific proposals of stand-off zones through aerial and submarine surveillance. Also discusses the prospects of ballistic missile submarine sanctuaries designed to enhance the survivability of the sea-based deterrent.

Arctic data compilation and appraisal, volume 13 : Northwest Passage : biological oceanography : whales, 1820 to 1984

by P. Norton, L. de March and B.D. Smiley. Sidney, B.C. : Dept. of Fisheries and Oceans, Institute of Ocean Sciences, 1987. 2 v. Bibliogr. (Canadian data report of hydrography and ocean sciences ; no. 5, vol. 13) ISSN 0711-6721
MICROLOG 88-01538 8 fiche

An inventory of measurements and observations of narwhal, white whales and killer whales in the Northwest Passage, detailing numbers, identification, movements, reproduction, food and colour. Organization is by data set (measurements and observations made by one group of people for a particular purpose, generally within 1 year). Times and locations of sampling efforts are listed and shown on computer-drawn maps. Sampling methodology and intensity, whale measurements and observations obtained by species, and concurrent biological, physical, and chemical measurements are described. A 5-level rating system, based on sampling methodology, is outlined and was applied to each measurement in each data set. Data sets are indexed by geographic coverage, study methods, species, specific measurements and observations made, and published references. The form, location, and availability of original data is given if known.

MICROLOG 88-04973 1 fiche

The Canadian Environmental Assessment Research Council (CEARC) was established in January 1984 to advise government, industry and universities on ways to improve the scientific, technical and procedural basis for environmental impact assessment (EIA). CEARC is undertaking research in several areas related to improving the practice of environmental assessment. The Council has chosen cumulative effects assessment (CEA) as one important focus of research and this prospectus describes CEARC's approach to possible research activities in this field. This paper draws on the results of commissioned research, and sets out the directions for further work the Council will pursue in consultation with other organizations. It is also intended to encourage a broader dialogue between the CEA Committee of Council and the wider EIA community.

An Assessment of four upper Fraser River chinook salmon sport fisheries, 1986

by N.D. Schubert. New Westminster, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, 1988. x, 52 p. : ill., maps (Canadian manuscript report of fisheries and aquatic sciences ; no. 1890) ISSN 0706-6473
MICROLOG 88-02849 1 fiche

The retention of chinook salmon adults in Fraser River system sport fisheries was eliminated in 1980 in response to escapment declines. By 1986, improved escapements permitted the reopening of sport fisheries for chinook adults in the Bowron, Clearwater, Quesnel and Shuswap rivers. Each fishery was evaluated using either a roving or a hybrid on-site survey. This report describes the study design and field procedures and documents the results of the 1986 sport fishery studies. The report presents estimates of angler effort, harvest and release by species and mark type, and angler characteristics, concluding with a discussion of results and recommendations for changes in the management of future fisheries.

An Assessment of ground deposits from aerial spray operations in the Kamloops forest region of British Columbia

by K. Wallace and R. Jahren. Regina : Saskatchewan Research Council, 1988. v, 37 p. : ill. Bibliogr. (SRC technical report ; no. 200) (SRC publication ; no. E-906-1-B-88)
MICROLOG 88-02198 1 fiche

Over the past several years, the Kamloops forest region has faced a problem of Douglas fir needle defoliations by the western spruce budworm. A program of aerial spraying with a formulation of Bacillus thuringensis (B.t.) was begun in 1986. In 1987 the deposit from spraying was measured by 40 Kromekote cards and petri dishes for 5 different spray blocks providing analysis on cover density (number of drops per square centimeter) and deposit density (billion international units of B.t. per square meter). The results of the 1987 spray trials are compared with the 1986 results, with alternative sampling procedures recommended where necessary.

Assessment of impacts from intensive-use on alpine tundra vegetation and soils in Cathedral Park, B.C., 1984

by J.W. Van Barnefeld, R.C. Kowall and R.J. Williams. Victoria : Ministry of Environment and Parks, 1987. xx, 173 p. : ill. Bibliogr. (MOEP technical report ; 26) ISSN 0835-4286 ISBN 0-7718-8567-9
MICROLOG 88-01086 2 fiche

In 1984, parts of a feature motion picture were filmed in the near-alpine vegetation in Cathedral Lakes Park at 2225 m altitude. To minimize trampling effects, platforms and ramps were installed, with ramps being constructed so that 20% of the incident light could reach the plants underneath. As a condition of the Park-use permit, the movie company was required to support, financially and through the provision of transportation facilities, the initiation of an environmental impact and monitoring study. This report presents the development of impact assessment techniques, the masurements and observations taken in the spring and summer of 1984, and the conclusions reached from the analysis. Recommendations are presented. Detailed analysis of soils and vegetation and the impact on them is also included.

An Assessment of Landsat-5 thematic mapper data for mapping and monitoring wetlands : summary report

by G.F. Tomlins and W.S. Boyd. Ottawa Canadian Wildlife Service, Pacific and Yukon Region, 1988. vii, 51 p. : ill. Bibliogr. (Technical report series ; no. 46) ISSN 0831-6481 ISBN 0-662-16466-0
MICROLOG 88-06254 1 fiche

Summary of a previous, more detailed report. Three study areas in British Columbia, were selected: the Estuarine system, at the mouth of the Fraser River in south-west B.C.; the Riverine system, a stretch of the upper Columbia River floodplain in south-east B.C.; and the Palustrine system, an area on the Fraser Plateau, in central B.C. For each study area, 1984 spring and fall TM data were registered together. Field surveys were undertaken in spring and fall of that year to identify seasonal changes. Plant cover characteristics and other relevant information were collected from over 900 wetland and upland polygons. A comprehensive analysis of digital classification methods and variables was performed, using field survey data to quantify classification inaccuracies. Results were optimized by development of a classification mask used to delimit the area classified.

Assessment of occupational shortages in Ontario's manufacturing and construction industries

Toronto : Ministry of Skills Development, Labour Market Research, 1987. 26 p. : ill. Bibliogr.
MICROLOG 88-01134 1 fiche

Persistent labour shortages for high skill occupations can constrain economic growth and overall expansion in employment. The emphasis in this paper is on reviewing the demand for labour in two key sectors of Ontario's economy--manufacturing and construction--and on identifying occupations in which potential shortages exist. Gives a brief contextual overview of recent employment trends in Ontario's manufacturing and construction industries.

Assessment of potential sites of recoverable oil shale in New Brunswick

by C. St. Peter. Fredericton : New Brunswick Dept. of Natural Resources and Energy, Minerals and Energy Division, 1988. ii, 70 p. : ill. Bibliogr. (Geoscience report ; 88-2) ISSN 0838-0265
MICROLOG 88-03953 2 fiche

An assessment of organic matter and available calcium content in Albert Formation lacustrine oil shales was initiated following recent laboratory and pilot-scale tests which demonstrated that calcium-bearing oil shales are an effective sulphur sorbent when combusted with high-sulphur coal. Drilling was conducted in the Rosevale, Dover, and Albert Mines areas and the cores analyzed for calcium content as well as the geological disposition.

An Assessment of source contributions to the ozone concentrations in Southern Ontario, 1979-1985

by D. Yap, D.T. Ning and W. Dong. Rexdale, Ont. : Ontario Ministry of the Environment, Air Resources Branch, 1987. 28 p. : ill. (Report ; ARB-101-87) ISBN 0-7729-2487-2
MICROLOG 88-00075 1 fiche

Elevated surface ozone concentrations in southern Ontario have been of concern to the agricultural communities since the early 1960s. There is a network of over 30 ozone monitoring sites in southern Ontario to investigate the potential of long-range transport of ozone into Ontario, and to provide information to assess the damage to crops such as white beans. This report presents an assessment of source contributions to the surface ozone concentrations in southern Ontario from 1979-85. A study of ozone levels during cloud-free summer days from 1981-85 gave local background levels, both daily and hourly.

Assessment of storm water related chlorophenol releases from wood protection facilities in B.C.

by P.K. Krahn, J.A. Shrimpton and R.D. Glue. Ottawa : Environment Canada, Conservation and Protection, Environmental Protection Service, Pacific and Yukon Region, 1987. xvii, 109 p. : ill. Bibliogr. (Regional program report ; 87-14) *Summary report (13 p.) laid in.*
MICROLOG 88-03007 2 fiche

Storm water runoff from sawmills and lumber export terminals was suspected as a significant source of chlorophenols to adjacent water courses based on a 1978 Environment Canada Study. During 1986 and 1987, a four-month field study was conducted at five sawmills and two lumber export terminals. The sites represented typical lumber handling and treatment methods including dip tanks, low pressure and high pressure spray systems. Leachate dripping directly from the wood and yard runoff was analyzed for 2,3,4,6-tetrachlorophenol and pentachlorophenol using a gas chromatography method.

Assessment of the acidification potential of selected Lower Mainland and Vancouver Island, British Columbia streams

by M.A. Sullivan and S.C. Samis. Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Branch, Habitat Management Division, 1988. vii, 106 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1599) ISSN 0706-6457
MICROLOG 88-03326 2 fiche

Studies investigating the sensitivity of British Columbia salmon streams to acidic precipitation were jointly initiated in 1981 by the Department of Fisheries and Oceans (DFO), Pacific Region and the then International Pacific Salmon Fisheries Commission (IPSFC). The original impetus for those studies was a B.C. Hydro and Power Authority proposal to develop a coal-fired electric generating plant in the Hat Creek valley in south-central B.C. Surface water samples from 36 streams on the Lower Mainland and Vancouver Island were collected between January 1985 and July 1986 and analyzed for pH, alkalinity, conductivity, colour, sulfate, nitrate, chloride and total and dissolved metals.

An Assessment of the current impact and potential risks of acid deposition on small-mouth bass populations in Ontario

by J.E. Matuszek. Toronto : Ontario, Ministry of Natural Resources, 1987. 29 p. Bibliogr. (Ontario fisheries acidification report series ; no. 87-09) ISSN 0832-7629 ISBN 0-7729-2536-4
MICROLOG 88-00959 1 fiche

The smallmouth bass has for many years been a major contributor to the sport fishery in Ontario. However, many smallmouth bass lakes are being subjected to high levels of acid loading. In this study, estimates are calculated of the current status of the smallmouth bass resource with respect to acidification, and of the potential risks resulting from continued deposition at current or increased levels. The distribution of known smallmouth bass lakes is examined for current patterns of acidic deposition in the province, and the tolerance of the bass to acidic water is assessed by reviewing completed field and laboratory tests.

Assessment of the non-destructive technology required for inspecting offshore structures : final report

Det norske Veritas (Canada) Ltd., Ottawa : Canada Centre for Mineral and Energy Technology, 1984. 2 v. : ill. Bibliogr. *CANMET contract: OSQ83-00035.*
MICROLOG 88-04575 4 fiche

Report of a study evaluating the current state-of-the-art in non-destructive evaluation techniques for the inspection of offshore structures, evaluating the capabilities of Canadian and foreign inspection organizations for offshore work, and proposing recommendations for future development work on the most promising methods and equipment. Both currently used and prospective techniques were reviewed, including visual inspection by divers and remotely operated vehicles, methods based on electromagnetism such as magnetic inspection, magnetography and the eddy current technique, AC potential drop measurement, ultrasonic testing, radiographic testing, acoustical holography, and ultrasonic tomography. The principal components of equipment for each method were also described and their specifications given. The assessment of inspection methods used was based on such criteria as cost-effectiveness, quality, reliability and applicability as to water depth.

Energy Mines and Resources relative to both 'conventional' high pressure hydrogenation and comparatively low pressure nickel catalyst hydrogenation. Supporting data were drawn from catalyst developers, catalyst vendor contracts and the technical literature. CANMET studied the nickel route as one approach to offset the high and rising cost of platinum used in other low pressure processes and as an alternate to the high pressure conventional nickel molybdenum and nickel tungsten catalyst routes. The CANMET work to date has used catalysts currently commercially available. This study investigates the Canadian setting for middle distillate aromatic saturation to note relative economics and prospective applications, and to develop recommendations for future research and development activities.

The operation of the Bruce NGS"A" licensing requirements are enforced by the AECB project staff resident at the station. To assess operation in accordance with licensing requirements, the project staff, with appropriate support from other AECB personnel, monitors operation of the four reactors, witnesses important activities, conducts audits, carries out inspections, and reviews station documents and reports as appropriate. This report presents AECB project staff's review of major licensing issues and of the operational performance of the station during 1987. Ontario Hydro reports and official correspondence and observations of AECB staff at site have been taken into consideration. The report is limited to aspects of the station performance that AECB staff considers to have safety significance.

An Attempt at assessing abundance and distribution of pink salmon *Oncorhynchus gorbuscha* prior to their entry of spawning streams

by J.R.M. Kelso and R.H. Collins. Burlington, Ont. : Canada Centre for Inland Waters, Great Lakes Fisheries Research Branch, 1984. iv, 16 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1772) ISSN 0706-6473
MICROLOG 88-04963 1 fiche

Pink salmon from the North Pacific Ocean were introduced into Lake Superior at Thunder Bay in 1956. Very little is known about the life history of this species beyond observations made in the spawning stream. This study was conducted to determine the distribution of pink salmon and their migration in open water prior to entry of spawning streams. The North Channel of Lake Huron was sampled using acoustic techniques, trawling and experimental gill nets.

An Automated computer-based water quality analytical laboratory data capture/management system (AWQUALABS)

by F.J. Philbert. Burlington, Ont. : Inland Waters/Lands Directorate, National Water Research Institute, Canada Centre for Inland Waters, 1987. v, 16 p. : ill. (Technical bulletin : no. 149) *French ed (Système informatisé de saisie...) on the same fiche.* ISBN 0-662-15594-7
MICROLOG 88-04771 1 fiche

AWQUALABS is a computer-based data capture/management system used for the real-time capture, pre-processing and analysis of raw data and for the organization, management, storage and reporting of results of a series of multi-parameter chemical and physical analyses in a medium-sized water chemistry analytical laboratory. The system provides facilities for entering sample identification information, analytical results (both manually and from automated on-line instruments), operational quantities (test costs, time) and quality control data (seasonal limits, etc.). It maintains records for all samples received, allows inspection and flagging of data for re-cheching of results and produces work sheets for the analysts while maintaining archives of past analyses and quality control information from specified check sums such as duplicates, spikes, references and blanks. This report presents information on information flow, system data organization and system program organization.

Automatic device for density measurement in polyethylene

by L. Piché, A. Hamel and P.Y. Kelly. Ottawa : National Research Council Canada, 1988. 10 p. : ill. Bibliogr.
MICROLOG 88-04485 1 fiche (Available on fiche only)

Both low density (LDPE) and high density (HDPE) polyethylene are one of the most important products of the plastics industry. It is of primary importance for the manufacturer and the processor to have means of characterizing the material. The most commonly used and accepted method for the determination of density is the "Density Gradient Column" defined by ASTM D1505 standard. The sample is placed in a column of liquid which exhibits a known density

Pour des copies de ces publications, contacter:
Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

gradient; after the sample has sunk to its equilibrium, the density is obtained from the reading of its position in the column. A method and technique based on the propagation of ultrasound which allows for an accurate and reliable determination of density is proposed. The technique is simple and can be used in an uncontrolled environment; the measurement is quick and can be made automatic.

Automatic Omega station and LOP selection

by J.C. McMillan. Ottawa : Defence Research Establishment Ottawa, 1987. ix, 124 p. : ill. Bibliogr. (Report ; no. 976)
MICROLOG 88-02838 2 fiche

Omega is a worldwide navigation system based on 8 VLF transmitting stations dispersed widely around the globe. The phase difference between the signals of any two Omega stations can provide a line of position (LOP) on the earth's surface. Two such LOPs intersect to provide a position fix. Generally several LOPs are selected to improve the accuracy and reliability of a fix, either by using a least squares technique, or as in MINS (Marine Integrated Navigation System), a more sophisticated Kalman filter technique. The resulting accuracy and reliability depends on many factors such as geometry and signal strength. This report describes these factors and how they can be evaluated. It also describes a set of algorithms used by MINS to automatically select a best choice of 5 Omega stations and 4 LOPs. This includes a modal interference predictor and multi-LOP position accuracy calculations for both least squares and Kalman filter solutions.

An Automatic vehicle status, location, and allocation system for surface mines

by E.J. Krakiwsky. Ottawa : Canada Centre for Mineral and Energy Technology, Coal Research Laboratories, 1987. v, 22 p. Bibliogr. (Report ; CRL 87-124(OP,TR))
MICROLOG 88-02142 1 fiche

One of the problems presently facing the efficient operation of a surface mine is the real-time status and position of a vehicle in the mine, not usually known to the dispatcher. In addition, efficient vehicle allocation is difficult because the positions of the vehicles are not being related to the existing route networks within the mine area. This report presents a description of an Automatic Vehicle Location system, composed of hardware (computer, input-output devices, positioning devices, etc.), software (database management, best-route selection, etc.), and positioning systems which are a combination of dead reckoning devices and GPS satellite receivers. The combination of these positioning devices yield real-time 3D vehicle coordinates accurate to a few meters, which are then related to an electronic map of the area and to a 3D Digital Terrain Model.

Automatic water quality monitoring of two lotic ecosystems in the Atlantic Region

by S.C. Roussell, G.D. Howell and T.A. Springer. Moncton, N.B. : Inland Waters/Lands Directorate, Atlantic Region, Water Quality Branch, 1988. vi, 158 p. : ill. Bibliogr. *Technical bulletin IW/L-AR-WQB-88-134.*
MICROLOG 88-03017 2 fiche

Automatic Water Quality Monitors (AWQMs) provide high frequency surveillance of aquatic systems. AWQMs were installed at the Big Presque Isle Stream (N.B.) from May to September 1986 and at the Mersey River (N.S.) from October 1986 to April 1987. Parameters measured at the Big Presque Isle Stream included dissolved oxygen, pH, specific conductance, water temperature, air temperature and photosynthetic active radiation, while at the Mersey River, they were limited to pH, conductivity, water temperature and air temperature. The ability of AWQMs to collect reliable data in two different lotic ecosystems, exposed to many inclemencies such as algal growth, ice formation and cold water temperature, was also evaluated.

Automobile misfueling study : results of a national public opinion survey

by Optima Applied Social Research Inc.: for Environmental Protection Service, Environment Canada. Ottawa : Environment Canada, Environmental Protection Service, 1986. 137 p. : ill. *CSI 21111.210.*
MICROLOG 88-02241 2 fiche

An increasing proportion of passenger vehicles on the road are designed to use unleaded gasoline. This report presents the results of an observation study to establish the actual incidence of misfueling and assesses the degree of misfueling; determines the prevalent manner in which misfueling takes place (nozzle substitution, inlet restrictor tampering, slow fill, nozzle adaptor or use of funnel); observes factors which affect the rate of fuel switching; ascertains any trends in fuel switching based on the results of previous studies done in 1978, 1984 and 1985; and determines the reasons why people misfuel. Data collection was conducted in Vancouver, Calgary, Regina, Winnipeg, Toronto, Sudbury, Ottawa, Montreal, Trois-Rivières and Halifax at approximately 510 service stations and 4,300 vehicular observations.

Winter travellers in mountains are frequently exposed to avalanche hazards for considerable periods of time, but seldom observe avalanches in motion or the destruction they cause. Descriptions of accidents and the circumstances leading to them, however, can be useful in alerting people to potential dangers and stimulate concern for safety measures. The present publication describes 47 avalanches that resulted in death, injury, or property damage between 1978 and 1984, plus two major disasters of previous years, 1910 and 1950. The circumstances, rescue operations, snow and weather conditions, and avalanche data are described. Skiers, mountain climbers, snowmobile operators, workers, and various structures were involved. Statistics of avalanche accidents in Canada from 1978 to 1985 are included.

L'Avenir du français aux Etats-Unis

par C. Veltman et B. Lacrois. Québec : Conseil de la langue française, Service des communications, 1987. 259 p. Bibliogr. (Documentation du Conseil de la langue française ; 27) ISBN 2-551-08872-0
MICROLOG 88-01650 3 fiche

Cette recherche s'insère dans le cadre d'un projet plus vaste visant à évaluer l'état de la langue française dans le monde. Elle examine les caractéristiques de la population franco-américaine et les conséquences de ses contacts multiples avec l'environnement anglo-américain. Elle s'inspire de 4 enquêtes menées entre 1975 et 1980 par des organismes fédéraux. On y traite de la taille, de la structure et de l'évolution du groupe franco-américain, de l'impact de la durée du séjour aux Etats-Unis sur l'usage linguistique, des dimensions urbaines et régionales de la francophonie, de la jeunesse franco-américaine, de l'enseignement du français et des prévisions des effectifs francophones de 1976 à 2001.

Aviation occurence reports, issue 3

Canadian Aviation Safety Board. Ottawa : The Board, 1987. vii, 245 p.
MICROLOG 88-03057 3 fiche

In accordance with the CASB Act, part of the Board's objective is to report publicly on its investigations, on the related findings, and on any recommendations designed to eliminate or reduce safety deficiencies. This publication presents reports on CASB investigations, findings, and recommendations as adopted by the Board. The reports are grouped by broad category of aircraft type and by type of operation within each group, then presented chronologically (by the date of occurrence) within each subgroup. Each report gives information on the aircraft, the occurrence report number, pilot hours, injuries, a summary report narrative, findings, safety action and recommendations.

Airborne gamma-ray data from Malawi were used to develop an automated system for computing on-line atmospheric background radioactivity. The atmospheric backgrounds were calculated using lead-shielded upward-looking detectors calibrated from airborne measurements over a large lake and areas with varying proportions of uranium and thorium. The method was tested by producing atmospheric uranium background maps and background corrected uranium count rate maps from two different areas.

Background paper : the national science and technology policy

Canada. Ottawa : Government of Canada, 1987. 11, 11 p. *Bilingual (Document explicative...)*.
MICROLOG 88-00008 1 fiche

All governments in Canada formally recognized a need for a National Policy on Science and Technology in February, 1985, when federal, provincial and territorial Ministers responsible for science and technology met for the first time since 1978. At that meeting, Ministers formally committed themselves to producing a comprehensive policy designed to build upon provincial and territorial economic opportunities and priorities. This National Policy will provide a basis for optimization of current and future action by governments and by the other sectors. It responds directly to the inputs of industry, labour, universities and colleges as stated at the June 1986 National Science and Technology Policy Forum. Key objectives and strategic directions are identified and areas for action in policy implementation are presented.

Basement condensation : field study of new homes in Winnipeg

Unies Ltd.. Ottawa : Canada Mortgage and Housing Corporation, Project Implementation Division, 1987. 94 p. : ill.
MICROLOG 88-06478 2 fiche

A field investigation of Winnipeg houses was carried out to determine the causes of excessive basement condensation in new homes, to recommend appropriate remedial action, and suggest construction practices which would avoid or reduce such problems. Fourteen houses which either exhibited a moisture problem, or some detail relevant to the condensation question, were examined. Visual inspections of the grounds, exterior and interior of each house were made, particular attention being directed to drainage, the foundation, the basement interior, and the condensation problem. Spot measurements and continuous monitoring records of air temperature and moisture levels outdoors were compared to concrete wall and floor surface temperatures and to the locations of surfaces where condensation was occurring.

This report summarized data for all fish captured with beach seines during 1984 in Masset Inlet and Masset Sound, Queen Charlotte Islands, B.C. This sampling was conducted as part of a larger study designed to investigate the mortality of pink and chum salmon during early sea life. In 1984, beach seining was routinely conducted at 11 locations at approximately seven-day intervals from 1 May to 29 June. Although the primary purpose of this sampling program was to collect juvenile pink and chum salmon, a variety of other species were caught incidentally.

Bear deterrent study : Cape Churchill, Manitoba, 1985

by P.L. Clarkson. Yellowknife : Government of the Northwest Territories, Dept. of Renewable Resources, 1987. ix, 57 p. Bibliogr. (File report : no. 66)
MICROLOG 88-00274 1 fiche

Report of research conducted at Cape Churchill, Manitoba in 1985 to test a number of non-lethal bear deterrent techniques: 12-gauge Ferret slug, Bear Thumper, Cart-a-balls, sound deterrent, flashlight-siren, electric fence. Deterrent testing was conducted from October 5-November 2, 1985, mainly during daylight. Bears approaching the test site were classified as experimental (used to test various deterrents) or control (not deterred) bears and their behaviour was compared on entrance and exit times and return visits to the bait site.

technical basis for the design, operation and evaluation of a comprehensive and defensible environmental research and monitoring program to accompany phased hydrocarbon development in the Beaufort Sea. This document describes the results of two workshops held during the fourth year of the project and presents a review of research programs that are relevant to one or more BEMP impact hypotheses. The first two workshops examined Hypothesis No. 20, which focuses on the effects of discharge of cuttings contaminated with oil-based drilling muds on fish, birds and marine mammals. The second workshop involved the evaluation of two hypotheses related to the effects of hydrocarbon development on the western Arctic population of bowhead whales. These hypotheses were examined by separate working groups. The first reviewed new information relevant to the original bowhead whale hypothesis (Hypothesis No. 1) and the second examined a new hypothesis related to the westward transport of oil from the region.

Beaufort Sea ocean dumpsite characterization

prepared for Environment Protection, Conservation and Protection, Environment Canada . by Arctic Laboratories Ltd. and LGL Limited. Inuvik, N.W.T. : Artic Laboratories Ltd., 1987. xi, 229 p. : ill. Bibliogr.
MICROLOG 88-06210 3 fiche

As a preliminary investigation of potential sites for dumping inert solid wastes, this study reports on the physical and chemical character of sediments in the dumpsite areas. The seabed at two potential Beaufort Sea dumpsites was profiled by sonar, bathymetry, sub-bottom profiling, surficial sediment particle size, surficial sediment trace metal and hydrocarbon content, and infaunal benthic community species and density. Within each dumpsite, Otter trawls were carried out to qualitatively sample for epibenthos and bottom fish. At each location, two grab samples were taken. One was sieved for macrobenthos, the second sub-sampled for trace metals, hydrocarbon and particle size analyses. A total of 30 locations were sampled in and around each dumpsite.

The Behaviour of oil in freezing situations

by D.G. Wilson and D. Mackay. Ottawa : Environment Canada, Environmental Protection Directorate, River Road Environmental Technology Centre, 1987. iv, 65 p. : ill. Bibliogr. (Report ; EE-92)
MICROLOG 88-02078 1 fiche

The exploration and development of the Arctic as an important petroleum producing region has resulted in a number of significant research programs pertaining to the presence of oil in the Arctic environment. This study investigates and quantifies the nature of the oil and developing ice field interactions, and whether, and how, oil may become incorporated within the developing or 'grease' ice, thereby removing it from sight and from access by most conventional recovery processes. The report consists of a review of the literature, a description of the experimental work, the results of these experiments and a field observation at Matane, Quebec.

Bench-scale beneficiation tests of New Brunswick oil shale

by J. White...et al. Sydney, N.S. : Atlantic Coal Institute, 1988. 279 p. : ill. Bibliogr. (Open file report : 88-12) *Project funded under the Canada-New Brunswick Mineral Development Agreement.* ISSN 0712-4562
MICROLOG 88-05302 3 fiche

Oil shales from the Albert Formation in New Brunswick were studied by way of a series of bench scale beneficiation tests to determine their beneficiation potential. Tests completed include: size analysis, float-sink analysis, concentrating table, jigging tests, froth flotation, magnetic separation, air classification, and oil agglomeration tests. Attempts were made to concentrate the organic-rich fraction (for retorting) and a carbon-rich fraction (to act as a sulphur scavenger when co-combusted with coal). A scanning electron microscope equipped with an energy dispersive X-ray detector and digital beam control was used to characterize the mineral assemblages present in the oil shale by way of both manual and computer automated analysis.

Beneficiation of staurolite from Barrie Township, south eastern Ontario

by P.R.A. Andrews and W. Kelly. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 9 p. (Report : MSL 87-154(IR)) *Project 30.21.02 beneficiation of industrial minerals.*
MICROLOG 88-03173 1 fiche

Selected split drill core samples (BQ) weighing approximately 15 kg from the Hardie property, Barrie Township, Frontenac county, Southeastern Ontario were supplied by Sar-O-Lite Exploration Ltd. A preliminary investigation was requested to explore the possibility of obtaining a product suitable for the sandblasting market. A representative head sample obtained from the crushed drill core was submitted for X-ray diffraction. The head sample was subsequently sized and each fraction examined optically to determine mineral identity, association and liberation. Core samples were stage-crushed by jaw and roll crushing to 2.4 mm. Further size reduction to 420 um, the estimated liberation size, was effected by hammer milling and ring pulverizing.

Beneficiation of two drill core samples of kaolinised sand from Black Island, Manitoba

by P.R.A. Andrews. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 12 p. : ill. (Report ; MSL 87-142(IR))
MICROLOG 88-03896 1 fiche

Earlier beneficiation of Black Island kaolin had indicated that kaolin could be upgraded to between 34% and 36% Al2O3, which would indicate filler grade quality. Brightness values were, however, relatively low at 67.3% which would imply only low-grade filler quality. It was recommended that further testwork be conducted on representative material from different parts of the deposit, and that the samples be transported in a dry state in plastic bags. Two samples were processed by a combination of scrubbing, washing, classification and flotation to remove the coarse silica and concentrate the kaolin. Two products of concentrated kaolin were produced from each sample and analysed.

Benthic invertebrates collected from Ungava Bay, Canada, 1947-1951

by J.W. Wacasey and E.G. Atkinson. Ste-Anne-de-Bellevue, Que. : Dept. of Fisheries and Oceans, Arctic Biological Station, 1987. v, 68 p. : ill. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1537) ISSN 0706-6457
MICROLOG 88-02284 1 fiche

Ungava Bay, located in an area of well mixed waters, has a diverse benthic fauna with many widespread species and may be one of the more productive areas of northern Canada. The Eastern Arctic Investigations of the Fisheries Research Board of Canada made extensive collections of marine invertebrates in Ungava Bay, between 1947 and 1951. Benthic invertebrates are tabulated for 77 of the 153 stations that were occupied. The tabulations were derived from published reports of major taxa and from identification of specimens of minor taxa and previously unsorted collections. The 411 identified species are mostly macrobenthos (1 mm).

Beyond the bottom line : management in government

by T.W. Plumptre. Halifax : Institute for Research on Public Policy, 1988. xx, 466 p. Bibliogr. ISBN 0-88645-069-1
MICROLOG 88-04120 6 fiche

This book is primarily directed toward the management community. From the perspective of the literature on management, it explores whether and how management principles can be deployed in mobilizing and managing resources in the public sector, while recognizing the institutional structures and conventions developed to provide a framework for conflict resolution and accountability in the exercise of the powers delegated to government by voters. The present volume provides a survey of some principles of broad applicability in public sector organization, and an overall framework into which more detailed work on structure, systems and values can be fitted.

Bibliography of CANMET publications on coprocessing

Energy Research Laboratories (Canada). Coal Processing Section. Ottawa : Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1988. iii, 44 p. (Report ; ERP/ERL 88-20(TR))
MICROLOG 88-04571 1 fiche

Coprocessing refers to the processing of mixtures of coal and oil with the objective of liquefying the coal and upgrading the oil simultaneously. World-wide interest in the concept has recently increased. Active R&D programs are now underway in the U.S., West Germany, Japan and the U.K. This bibliography has been prepared to provide a one-source reference to the reports and publications generated to date at CANMET on coprocessing technology. All entries are listed chronologically under each major subheading, and each entry includes a brief abstract highlighting significant aspects.

Birth and death statistics by health units of Alberta, 1985

Edmonton : Alberta Community and Occupational Health, Management Support Services, 1987. 165 p. : maps. *CSI 36018.003.*
MICROLOG 88-01963 2 fiche

Summary of natality and mortality patterns at the health unit level, with birth and death statistics and related indices for 1985. Statistics on live births include data on female population (for child bearing age groups 10-49), live births, birth order, birth weight, live births to single mothers, teenage mothers, single and married. Stillbirths and infant mortality statistics includes data on distribution among single and married females, and perinatal deaths. Death statistics are disaggregated by sex and include analysis by cause (including specific types of cancer and heart disease, accidents and suicides).

Bison ecology in relation to agricultural development in the Slave River lowlands, NWT

edited by H.W. Reynolds, A.W.L. Hawley. Ottawa : Canadian Wildlife Service, 1987. 74 p. : maps Bibliogr. (Occasional paper ; no. 63) ISSN 0576-6370 ISBN 0-662-15322-7
MICROLOG 88-00406 1 fiche

In the 1970s public interest in the Slave River lowlands was focused on its potential for livestock production and revitalization of a declining resident hybrid bison population (cross between wood bison and plains bison). This report is a compilation of 8 research projects conducted on the ecology of bison and forage potential of the Slave River lowlands for livestock production. Consideration was also given to the biological potential of the area for production of native wild bison as opposed to the production of domestic livestock.

Black Creek Corridor Feasibility Study : phase I report : background research and analysis

Macaulay Shiomi Howson Ltd...et al. York, Ont. : City of York, 1987. iv, 199 p. : maps.
MICROLOG 88-06266 3 fiche

The Black Creek Corridor Feasibility Study was commissioned by the City of York to address the market potential and development feasibility of this strategically important area. On the basis of these considerations, this consulting exercise is also to recommend a policy and implementation framework which will facilitate creation of the City's desired corporate/civic centre in the Black Creek Corridor. This report contains the findings of the first phase of the Study, which was concerned with background research and analysis in the four component areas of consulting review - market, transportation, geotechnical and planning. Reports conducted on the market potential and development feasibility, the transportation component, the geotechnical investigation, and the planning review done by consultants are included.

A Block demodulator for frequency division mulitiplexed NCFSK signals

by M.D. Shaw, J.L. Pearce and J.S. Wight. Ottawa : Government of Canada, Dept. of Communications, Communications Research Centre, 1987. xvii, 110 p. : ill. Bibliogr. (CRC report , no. 1427)
MICROLOG 88-04301 2 fiche

Block demodulation, in which several signals are demodulated by a common processor, is a requirement for some multiple access communication systems. One application where block demodulation is needed is for satellite systems which use spread spectrum communications and processing onboard the satellite to provide protection against interference. These systems would use frequency shift keying (FSK) for data modulation and the various users' signals multiplexed in frequency. In this report, a block demodulator designed to provide demodulation for several FSK signals multiplexed in frequency is described. The demodulator makes use of digital signal processing techniques and is implemented with commercial microprocessors and digital electronics.

Bottle glass from a privy at Fort George Military Reserve, Ontario

by P.R. Beaudet. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1981. 206 p. : ill. Bibliogr. (History and archaeology ; 45) *Bound with: Eighteenth-century container glass from the Roma Site, Prince Edward Island / Jeanne Alyluia -- Glassware excavated from Fort Anne, Nova Scotia / Jane E. Harris.* ISBN 0-660-10734-1
MICROLOG 88-04061 3 fiche

Sixty significant bottle glass artifacts were excavated from the large privy constructed in 1835 at the rear of the commandant's quarters at Fort George Military Reserve. They included numerous types of liquor bottles, egg-shaped soft drink bottles, oil and sauce containers, medicine vials and panelled rectangular bottles. The purpose of this report was to identify, group, describe and discuss all glass bottles or significant fragments discarded in the privy during the entire period of its existence (1835 to 1853). The period is of particular interest from the point of view of glass technology as new bottle-manufacturing techniques were being introduced while old ones were being abandoned or phased out.

Breaking new ground : by investing in people, Ontario's Training Strategy will help strengthen our competitive position, world-wide

Toronto : Ministry of Skills Development, 1986. vi, 38 p. : ill. ISBN 0-7729-2491-0
MICROLOG 88-05874 1 fiche

The Government of Canada's support in the training field has been concentrated on in-school training, long-term training, and wage subsidies for unemployed individuals. Little attention has been directed towards the critical need to upgrade and modernize the skills of the employed workforce. This provides for the Government of Ontario both an opportunity and a responsibility to assume leadership in workplace training. This document presents the five components of the training strategy: the establishment of a Training Consulting Service, the provision of incentives to business to invest in training, and the establishment of a Trades Updating program, Training Access programs, and an Institute for Skills Training.

British Columbia seabird colony inventory, report no. 3 : census of glaucous-winged gulls, pelagic cormorants, black oystercatchers and pigeon guillemots in the Queen Charlotte Islands, 1986

by M.S. Rodway. Ottawa : Canadian Wildlife Service, Pacific and Yukon Region, 1988. iii, 95 p. : maps. Bibliogr. (Technical report series ; no. 43) ISSN 0831-6481 ISBN 0-662-16283-8
MICROLOG 88-06255 2 fiche

In 1977 and 1986, seabird populations in the Queen Charlotte Islands were surveyed. All islands were explored and total nest counts for surface-nesting species such as pelagic cormorant, black oysterchatcher, and glaucous-winged gull gave accurate population estimates. All gull and oysterchatcher nests were counted, including empty nests, unless they were inaccessible due to topography or weather. For cormorants, nests were counted from the water, except on Langara Island, Tian Inlets and Kunghit Island, where all nests were counted from land. Each island survey is listed in the geographic sequence. Following each island code, name, and NTS map grid location is a list of the specific area surveyed (for large islands only: observers; date and time of survey; weather; and comments about survey methods). Results are summarized on a species basis and compared with total population estimates of 1977.

British Columbia's public libraries : a new approach : the final report of the New Approaches Ministerial Task Force on Public Libraries

British Columbia. New Approaches Task Force. Victoria : Ministry of Tourism, Recreation and Culture, 1988. 26 p. *Cover title. Interim report : 88-02103/1.* ISBN 0-7726-0813-X
MICROLOG 88-04598 1 fiche

The Task Force was established to review the provision and delivery of public library services in the province. It conducted a process of public consultation directed at five areas for proposals for improvement: funding; organization and regulation; the Library Services Branch; a provincial resource library; and continuing opportunities for joint development. This report contains recommendations for implementation of proposals.

Brown waters : relative importance of external and internal sources of acidification on catchment biota : review of existing knowledge

prepared for Environment Canada and Department of Fisheries and Oceans ; by Michael L. Jones...et al. Ottawa : Environment Canada . Dept. of Fisheries and Oceans, 1986. xi, 85 p. Bibliogr.
MICROLOG 88-04714 2 fiche

The review presented in this document is based on an assessment of past and current literature, and a 3 day workshop involving 38 scientists, including hydrologists, soil and water chemists, and biologists. The review concentrates on the closely related questions: are there important local sources of surface water acidity that are not governed by atmospheric deposition of mineral acidity; what role do wetlands play in surface water acidification, in what ways is surface water chemistry affected differently by organic acids than by mineral acids; and do biota respond differently to changes in surface water chemistry associated with organic acidity than to changes associated with mineral acidity.

Bruce GS 'B' dump site study : 1982 results and summary report for 1977-1985

by L.P. King and R.W. Sheehan. Toronto . Ontario Hydro, Research Division, 1987. v, 37 p. : fold. chart. Bibliogr. (Report ; no. 87-174-K)
MICROLOG 88-00138 1 fiche

The Ontario Ministry of Natural Resources requested Ontario Hydro to monitor the fish community response to the deposition of excavation material at the Bruce Generating Station 'B' disposal site as a condition for disposal approval. To satisfy this request, dump site studies were commenced south of the actual disposal area. Four pre-dump surveys and four post-dump surveys were planned. Water quality, sedimentation, substrate compostion, and benthos and fish communities at the biological sampling area and at a control site 2 km south of the sampling area were monitored during the surveys. This report presents the results of the post-dump survey and summarizes the results of the dump site studies, with a discussion of the effects of dumping excavated material in relation to the pre-dumping environment and biological sampling location.

Bruce GS 'B' preoperational biological study summary, 1979 to 1983

by H. Balesic and I.D. Martin. Toronto : Ontario Hydro, Research Division, 1987. vii, 92 p. : ill. Bibliogr. (Report ; no. 87-185-K)
MICROLOG 88-01748 2 fiche

Preoperational environmental studies for Bruce Generating Station B were carried out from May 1979 to February 1983 to describe the aquatic environment of the site in sufficient depth that comparison with subsequent commissioning and post-operational studies could show the nature and magnitude of environmental alterations attributable to station construction and operation. The environmental study program was extensive in scope in 1979 and 1981, limited in 1980 and supplementary in 1982-83. A wide range of physical and biological characteristics of the environment were investigated, with the major emphasis placed on fish populations. The study area extended from Douglas Point in the north to MacRae Point in the south, a distance of approximately 8 km.

Bruce heavy water plant N2 compressor : vibration and torque analyses

by F. Perricone, N.A. Jagan and J.D. Lindsay. Toronto : Ontario Hydro, Research Division, 1987. ii, 40 p. (Report ; no. 87-153-K)
MICROLOG 88-00144 1 fiche

Routine vibration measurements carried out by Bruce Heavy Water Plant maintenance personnel indicated that the N2 compressor-motor system was operating with high vibration levels and was drawing more power than its rated capacity. Investigations were begun to measure and determine the severity of the vibration levels, determine the cause of the high vibrations, measure the compressor motor's output power, and provide recommendations. This report presents the result of those investigations.

Bubbling fluidized bed combustion of Syncrude coke

by E.J. Anthony...et al. Ottawa Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1987. 44 p. : ill. Bibliogr. (Report ; ERL 87-87(TR)) *Paper presented at Oil and Gas Conversion Contractors' Review Meeting, November 20-22, 1985.*
MICROLOG 88-04569 1 fiche

The plant operated by Suncrude Canada Ltd. at Fort McMurray, Alberta, is Canada's largest oil sands extraction plant. The byproduct coke is high in sulphur and vanadium, contains a high proportion of unreactive forms of carbon, and is low in volatiles. Since it is unsuitable for combustion by established technologies, the entire production of over 2000 t/d is being stockpiled. Trials were performed on the burning of Syncrude coke in an atmospheric fluidized bed combustion (AFBC) pilot plant, with an Athabaska limestone usd as the SO2 sorbent. Mean coke particle diameter was 0.26 mm; mean limestone particle diameter 0.34-0.94 mm; fluidizing velocity 0.8-1.3 m/s; excess air up to 7%; recycle ratio (fraction of cyclone catch recycled) 0-0.83; Ca/S mole ratio 1.7-2.9; bed temperature 966-1105C. Also tested was the fate of the vanadium present in the coke and conversion of fuel nitrogen to NOx.

Micromedia Ltd., 165 Hôtel de Ville, Hull PQ J8X 3X2
(819) 770-9928 FAX (819) 770-9265

The Buchans mine, with reserves exhausted, was closed in 1984 after 57 years of production from high average grade and contained metals ore. A number of projects were carried out from 1982-84 to improve the geological understanding of the Buchan deposits, to aid in exploration, and to take advantage of the last underground access to the MacLean Extension Orebody where more detailed geological and geophysical studies were done to help in the location of similar orebodies. This volume brings together the main findings of the work carried out, as well as related studies done by the company and other authors. Some information is also presented on the geology of the main Lucky Strike areas.

British Columbia. Ministry of Finance and Corporate Relations. Victoria : the Ministry, 1988. 80 p. : ill. *CSI 37106.002.*
MICROLOG 88-02872 1 fiche

Document contains full text of budget speech given by the Honourable Mel Couvelier (Minister of Finance and Corporate Relations) on March 24, 1988. Reviews the economic performance of the previous year including specific goals of labour relations, industrial diversification and increased connections with the Pacific Rim. This budget contains provisions for continuing these goals as well as measures directed at enhancing social services through increasing services for the disabled, increasing the Ministry of Health's expenditures, a new community based integrated health delivery service, and increased spending for substance abuse prevention. The Budget also gives provisions for improving the competitive position of British Columbia business through reduced corporation taxes and personal income taxes, a new forest policy, mining initiatives (focusing on taxation, infrastructure and research), improved securities' regulations, and as well, budgetary restraint measures.

Builders' guide to energy efficiency in new housing -- 3rd ed

Toronto : Ontario Ministry of Energy ; Canadian Home Builders' Association, 1987. ix, 129 p. : ill.
MICROLOG 88-00751 2 fiche

Guide for builders on practical steps which can be taken to improve energy efficiency in new housing, including planning, designing and building. The guide provides advice on energy efficient techniques suitable for low-rise housing such as singles, semis and duplexes, row housing, and walk-up three-storey apartments. Provisions of the 1983 Ontario Building Code were taken as the basis upon which to develop and evaluate improvements. Detailed instructions on air infiltration, air changes and moisture, the building shell, space heating and cooling systems, domestic hot water heating, lighting and appliances, energy efficiency in the complete dwelling, and marketing energy conservation features in new housing are included.

Building a community economic development organization

Whitehorse : Canada/Yukon Economic Development Agreement, 1987. 14 p. : ill. Bibliogr. (Community economic development ; booklet 3)
MICROLOG 88-03762 1 fiche

The concept of community development bases development plans on local needs and interests, catering to quality of life values desired by the local people with a broadening of goals to include regional, territorial, national and international economies. This document lists examples of operating principles that planning organizations have adopted and provides guidelines on how to develop an organization including the stages of developing a statement of purpose and creating an action plan. Also discusses the following common structure types: development organizations; community economic development associations; community enterprises; community cooperatives; community enterprise centres, and, community development corporations. Includes a list of publications providing additional information.

Building benefits for homemakers

a report to the Minister of National Health and Welfare . from the Canada Pension Plan Advisory Board. Ottawa : The Board, 1987. 14, 13 p. *Bilingual (Prestations pour les...).*
MICROLOG 88-01122 1 fiche

The Advisory Board reviews the operation of the Canada Pension Plan, the state of the Canada Pension Plan Investment Fund and the adequacy of coverage and benefits payable under the Plan. This report reviews measures of the 1983 report More Effective Participation of Homemakers in the Canada Pension Plan bringing to light inconsistencies from attempting to put an imputed economic value to the work that homemakers do. Recommendations include an as-you-go credit splitting system, cross-subsidization, and a discussion of the earnings-benefit link.

Building blocks, vol. 7 : the final report of the Task Force to Review COU Space Standards

Task Force to Review COU Space Standards. Toronto : Council of Ontario Universities, 1988. iii, 90, 43 p. ISBN 0-88799-222-6
MICROLOG 88-02265 2 fiche

The Task Force to Review the Council of Universities (COU) Space Standards began its work in January 1985. In August 1986, it issued an interim report in the form of a second edition of Building Blocks, Volume 6. The space guidelines in the interim report were approved by Council on October 10, 1986. The 1986-87 survey of physical facilities collected data, including some new input measures, which were used to test the recommendations of the interim report. The present report contains in Part I the 1987 Refinements to the COU Space Standards, with the deliberations and recommendations of the Task Force, and in Part II, the 1986-87 Survey of Physical Facilities.

edited by Maureen Farrow and Alan M. Rugman. Toronto : C.D. Howe Institute, 1988. vi, 99 p. : ill. Bibliogr. (Policy study ; no. 5) ISSN 0832-7912 ISBN 0-88806-231-1
MICROLOG 88-04866 2 fiche

Document presents papers prepared for the January, 1988 conference entitled 'Business Strategies and Free Trade' held in Toronto, where Canadian business leaders met to discuss how Canadian businesses should respond and adapt to the Free Trade Agreement. General themes expressed in the papers include acknowledging that businesses must learn to adjust if they are to prosper in the international business environment of the 1990s and that the adjustment process should be viewed as a continuous exercise in the development of new products, the streamlining of facilities, the adoption of new technologies and the development of new markets.

Butane stripping of organic contaminants from water : phase 1

Pan Canadian Consultants Limited. Ottawa : Environment Canada, Environmental Protection Directorate, 1988. 71 p. : ill. Bibliogr. (Report ; EE-101)
MICROLOG 88-03667 1 fiche

This project arose from a request from Environment Canada for information from companies interested in participating in a project to utilize steam stripping as an environmental emergency countermeasure. The proposed steam stripping project was directed towards the removal of volatile organic chemicals (for example, ethylene dichloride) from groundwater sources. The process proposed by PCCL was the solvent stripping of water using a volatile solvent (n-butane) that was immiscible with water, yet would be an effective solvent for organics with very low toxicity. A laboratory test apparatus was designed and developed, and a test program was completed on a range of Priority Pollutants specified by Environment Canada. The test program entailed liquid-liquid extraction of the specified pollutants from water using liquid n-butane at 20 C and about 240 kPa.

C'est arrivé par chez-nous : tourisme, chasse, pêche, loisir : l'histoire d'un ministère dans l'Est du Québec

par P. Lemieux. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction régionale du Bas-Saint-Laurent - Gaspésie - Iles-de-la-Madeleine, 1986. 325 p. : ill., cartes géogr. Bibliogr. ISBN 2-550-16247-1
MICROLOG 88-04112 4 fiche

A travers la vision et les interventions du ministère du Loisir, Chasse et Pêche et de ses prédécesseurs, ce livre retrace l'histoire de la chasse, de la pêche, du tourisme et du loisir dans l'Est du Québec. On y découvre le passé des parcs et des réserves, on assiste à l'arrivée des premiers touristes et on constate l'avènement de la civilisation du loisir dans l'Est. Le livre permet de bien saisir le rôle d'acteur de premier plan joué par le Ministère, depuis ses débuts en 1880, dans le développement du Bas-Saint-Laurent et de la Gaspésie.

Cadre comptable rectangulaire et estimation de matrices input-output interrégionales -- Rév.

par M. Los. Montréal : Université de Montréal, Centre de recherche sur les transports, 1980. 21 p. Bibliogr. (Publication ; no. 160) (Cahier ; no 8005)
MICROLOG 88-06432 1 fiche

Cet article propose une méthode d'estimation d'une matrice 'input-output' interrégionale à partir d'un cadre comptable rectangulaire tel que celui qui existe pour le Canada. La méthode repose sur l'utilisation des informations statistiques suivantes pour une année de base: matrices régionales des utilisations de biens ou services par les différents secteurs productifs, matrices régionales des productions de biens ou services par les différents secteurs productifs, matrices des exportations internationales de biens et services à partir des régions, matrices d'importations internationales de biens et services par les différentes régions, demandes finales régionalisées pour chaque bien ou service et matrices de flux interrégionaux de biens et services. La méthodologie proposée s'appuie sur une représentation explicite des flux intersectoriels de biens ou services et sur la théorie de l'information.

Can aggregate direct travel demand models work?

by M.G. Dagenais and M.J.I. Gaudry. Montreal : Université de Montréal, Centre de recherche sur les transports, 1986. 13 p. Bibliogr. (Publication ; no. 442) (Cahier ; 8603)
MICROLOG 88-00463 1 fiche

Applications of aggregate spatial direct demand models to interzonal urban transportation are seldom discussed in the literature and few attempts to build such models have been made, probably because of difficulties in calibration. This report suggests that adequate parameter interpretation of the network variables and appropriate functional form selection may produce satisfactory results, illustrated by an application of the demand for interzonal work trips, by car and public transit, in the autumn of 1970 in Metropolitan Montreal, of a one-equation model. Alternate specifications are also suggested, among them the Tobit model for limited dependent variables.

MICROLOG 88-04655 1 fiche

The purpose of the Farm Improvement Loans Act is to encourage the provision of intermediate-term and short-term credit to farmers for the improvement and development of farms and for the improvement of living conditions thereon. The act authorizes the Minister of Agriculture to guarantee, against loss, term loans made to farmers by chartered banks, Alberta Treasury branches and other lenders designated by the Minister. This report includes a review of 1986 lending and table showing loans and repayment to lenders, loans classified by province and lender, and by province and purpose, and loans for implements, construction, repair and alteration of farm houses and buildings.

MICROLOG 88-02882 2 fiche

The Canada Health Act, the federal legislative framework for Canada's health care system, constitutes a series of interprovincial plans which entitles the provinces to federal financial support. The annual report reviews the specific criteria and regulations allowing federal transfers, federal contributions and payments to the provinces with additional data on provincial entitlements, cash payments, deductions, extra billing (user charges) for the fiscal year 1986/7. Also reviews operations of each provincial health care insurance plan.

Canada. Immigration Appeal Board : Annual report 1987

Ottawa : The Board, 1988. vii, 29, vii, 30 p. : ill. *Bilingual. CSI 22149.001.* ISBN 0-662-55719-0
MICROLOG 88-03361 1 fiche

The Immigration Appeal Board has two major objectives: to serve as an independent court, to which people who have been denied entry to, or ordered removed from, Canada may appeal, as can Canadian citizens and permanent residents whose relatives have been refused landing in Canada by Employment and Immigration Canada; and to redetermine refugee claims which have been refused by the Minister of Employment and Immigration. This report gives a corporate profile, a description of the organization of the board and its mandate, then discusses the important decisions of the Board. It concludes with a section of statistical reports on caseload, disposition of appeals, disposition of applications for redetermination, and pending caseload by region.

MICROLOG 88-02877 6 fiche

Describes the three main goals of the Commission in incorporating both French and English into the cultural identity of Canada. These goals are: the equality that is proclaimed by the Constitution and the Official Languages Act; the quality of service, education and financial management all citizens are entitled to receive from government; and continuity of programs as well as consistency of motivations to ensuring the existence of these programs. The report discusses official languages from a national agenda perspective, with a look at affairs of state, Bill C-72, language rights, government policies and programs, and the work of the Standing Joint Committee. Analyses equality of services to the public, and the right to work in the language of one's choice. The report also evaluates equality of language rights in federal institutions, increased minority participation in equality rights as well as fair representation in the media. Also discusses the promotion of official language use in education in public shcools and post-secondary educational institutions.

MICROLOG 88-01497 2 fiche

Cette revue annuelle porte sur les activités du ministère du Travail du Canada et les services dispensés pour l'année se terminant le 31 mars 1987. Elle se compose de 3 sections principales. La première donne une vue d'ensemble des programmes et présente un répertoire des services ainsi que les coordonnées qui s'y rapportent. Dans la deuxième section, on explique comment ces services ont été dispensés; on décrit entre autres les activités du Service fédéral de médiation et conciliation. La troisième section précise certaines orientations et questions que le Ministère considère comme déterminantes pour l'avenir du pays.

Le ministère doit gérer les biens immobiliers de l'administration fédérale et fournir divers services: planification, conception, construction et immobilier. Pendant l'exercice, il a amorcé l'application d'une politique fédérale qui doit permettre de rationaliser la gestion des biens immobiliers et de lui confier tous les services à impartir dans les domaines de l'architecture, du génie et de l'immobilier, ainsi que toutes les installations à usage général, les autres étant transférées aux clients compétents. Ce rapport annuel décrit les programmes et les services du ministère, les grands projets terminées et projets en cours 1986-87, et présente les données financières pour l'année.

Canada Brick Quarry ground water survey fifth annual report, 1986-87

by E. Quarshie. Toronto : Ontario Hydro, Research Division, 1987. i, 143 p. (Report ; no. 87-273-K)
MICROLOG 88-02028 2 fiche

Fly ash from Lakeview Thermal Generating Station was used as a landfill material at the Canada Brick Quarry, Mississauga, since December 1981. One of the conditions set by the Ontario Ministry of the Environment involved regular sampling and testing of the ground water quality in the vicinity of the landfill. Up-gradient, on-site and down-gradient piezometers were installed. The up-gradient wells are monitored annually, the on-site wells 4 times annually and the down-gradient wells 3 times annually. A piezometric head survey is also carried out 4 times annually. This report covers the September 1986 to June 1987 analysis. The analytical data reported includes previous ground water surveys as well as surveys carried out in the 1986/7 sampling year.

Since December, 1981, fly ash from Lakeview Thermal Generating Station has been disposed of as landfill at Canada Brick Quarry, Mississauga, in accordance with a Provisional Certificate of Approval issued by the Ontario Ministry of the Environment . One of the conditions set in the certificate required regular monitoring of local surface water and ground water in and around the Canada Brick Quarry property. Mary Fix Creek, which traverses the Canada Brick Quary ash disposal site was sampled on October 8, 1986, and April 3 and June 25, 1987.

Le Canada et le développement durable : notre avenir à tous : rapport de la Commission mondiale sur l'environnement et le développement, et sa portée pour le Canada

Commission mondiale sur l'environnement et le développement. Ottawa : Conseil consultatif canadien de l'environnement, 1987. viii, 107 p. Bibliogr. ISBN 0-662-94748-7
MICROLOG 88-03757 2 fiche

Ce document révèle les résultats d'un examen entrepris par le Conseil sur "Notre avenir à tous", rapport de la Commission mondiale sur l'environnement et le développement (CMED). La 1re partie du commentaire passe en revue les concepts fondamentaux associés à l'environnement et au développement. Les parties suivantes examinent les conditions essentielles que le Canada devra remplir s'il veut progresser vers le développement durable. Ces trois conditions sont: la création d'une base de données; la mise en place de structures institutionnelles faisant en sorte que les structures de prise de décision en matière d'environnement assurent la responsabilisation des décideurs et les obligent à rendre des comptes; la sensibilisation de la population aux principes écologiques qui sous-tendent l'activité humaine sur notre planète..

Canada's economic prospects : looking ahead to the 1990's

Michael H. Wilson. Ottawa : Dept. of Finance, 1988. 44, 50 p. *At head of title: Securing economic renewal. Bilingual (Perspectives économiques...).*
MICROLOG 88-01782 2 fiche

Reviews the factors underlying the emergence of international imbalances, discusses the Budget policy and economic developments necessary to curtail the determined imbalances and considers progress being made. Sets out the Finance Department's projection for the international economy assuming reduced US fiscal deficit and expansionary demand management in other major industrial countries, with a realignment of exchange rates. Reviews the performance of the Canadian economy in recent years, with particular emphasis on 1987 with analysis of output, business inventories, inflation, and corporate and consumer debt burden. Sets out the Department's short-term which incorporates the fiscal measures announced in the 1988 budget, the first stage of tax reform and the US-Canada Free Trade Agreement. Also presents a projection of Canada's economic prospects over the medium term.

Canada-Quebec agreement on water quality monitoring

by L.N. Martel and C. Langlois. Quebec Environment Canada, Inland Waters Directorate, 1986. 19 p. : maps.
MICROLOG 88-04716 1 fiche

As the threats to water quality grew, so did Canada's need for an effective monitoring system. In September 1980, a task force was set up to examine the possibility of negotiating water quality monitoring agreements with the provinces. Negotiations with Quebec began in July 1982 and the first agreement was signed in May 1984, retroactive to April 1, 1983. This report indicates the administration of the agreement, renegotiation of the agreement in 1985 and the details of that renegotiation for federal and provincial responsibilities and costs, administration, station categories, watershed selection criteria, sampling stations, water quality, toxic substances, acid precipitation, and toxic substances parameters.

The Canada-U.S. Free Trade Agreement : an economic assessment

Ottawa : Canada Dept. of Finance, 1988. 66, 73 p. *Bilingual (Accord de libre-echange...). Bilingual summary (11, 13 p.) laid in. CSI 21104.200.*
MICROLOG 88-01956 2 fiche

The free trade agreement between Canada and the US was designed to eliminate barriers to trade in goods and services between the two countries, to facilitate fair competition and liberalize cross-border investment while also ensuring effective procedures for the joint administration of its provision and the resolution of disputes. This report provides an analysis of the economic impacts with reference to gains expected in Canadian real income and increased purchasing power on both a regional and personal basis. Includes discussion of expected job creation, export and import penetration of major manufacturing sectors, rates of price protection, bilateral contingent protection measures taken by Canada and the US from 1980 to mid-1987, as well as after the signing of the agreement.

The Canada-U.S. Free Trade Agreement : possible implications on Canada's health care systems

by P. Manga. Ottawa : Economic Council of Canada, 1988. viii, 59 p. : ill. Bibliogr. (Discussion paper ; no. 348) ISSN 0225-8013
MICROLOG 88-04094 1 fiche (Available on fiche only)

The discussion paper speculates on the possible effects of the Free Trade Agreement on Canada's health care policies and programs. The lack of debate and discussion on these issues is noted and decried. The possible effects of the free trade deal are founded on a comparison of the basic features of the health care systems in Canada and the United States. The differences in the role of the government in financing health care services and the extent and nature of the role of the private sector are emphasized. The principal differences in health policy are also described. It is suggested that the free trade deal need not be viewed as a threat to Medicare as a health policy or as a program.

For the past 50 years Canada has been seeking to reduce barriers to trade through bilateral and multilateral negotiations since Canada's export trade accounts for approximately 30% of its income. The new Agreement is discussed in terms of how it secures and improves access to the US market, and new opportunities for trade in financial services, investment, agriculture, fisheries, energy, cultural industries, wine and liquor, and the automotive trade.

Canadian automotive repair and service industry : a human resource study

Woods Gordon, Management Consultants. Ottawa : Canadian Occupational Projection System, 1988. v, 107 p. : ill. *French ed (Industrie des services...) : 88-04648/2 CSI 21126.207.*
MICROLOG 88-04647 2 fiche

This study was commissioned by Employment and Immigration Canada to examine the training and human resource planning needs of today's automotive service, repair and parts distribution industry. This study profiles the impact of technological changes on the automotive service sector, and examines the training requirements for preparing new technicians. A Steering Committee with representatives from the industry - including manufacturers and importers of vehicles, wholesalers, retailers, dealers, independent garages, community colleges, provincial governments, and the federal government - was formed to direct this work, and Woods Gordon was commissioned to undertake the research and analysis. This study presents the results of a research program involving a review of published reports, data and articles on the issues, and interviews with over 200 people from all sectors of this industry.

Canadian railway motive power options and development priorities

prepared for Transportation Development Centre ; by G.W. English, et al. Kingston, Ont. : Canadian Institute of Guided Ground Transport, 1987. xvi, 215 p. : ill. Bibliogr. ISBN 0-88911-053-0
MICROLOG 88-03192 3 fiche

Canada's two major railways face a period of extensive motive power renewal to the end of this century. This report includes assessing system options, technical developments, improvements in performance reliability, first costs (in current-dollar terms), relative fuel costs (over a range of energy prices), and maintenance costs for various locomotives (and "hybrids") for freight railways to 2000. The study is primarily concerned with the application of technology which is currently in use elsewhere or emerging but well along in development. Engines, fuels, transmission systems and trucks are assessed both for the establishment of the relative economic value of enhancing the performance of individual components of the existing diesel electric locomotive and as a review of the technological options available for realization of the performance improvements.

Canadian reaction to Palestinian self-determination -- Reviewed

by G Purves. Ottawa : Library of Parliament, Research Branch, 1987. 16 p. Bibliogr. (Current issue review : 82-19E) *French ed (La réaction du Canada...) on the same fiche.* ISBN 0-660-12597-8
MICROLOG 88-00934 1 fiche

Since the 1948 proclamation of the state of Israel in Palestine, many issues have been associated with what is referred to as the Middle East Conflict or more specifically as the Arab-Israeli Conflict. Issues discussed in this paper deal with the right to self-determination and eventual statehood and recognition of the organization most likely to dominate, initially at least, any independent or quasi-independent Palestian entity--the Palestine Liberation Organization. Discussed from a national policy stance of the federal government.

Canadian regional economic development : a historical review, 1961-1986

Winnipeg : Manitoba Bureau of Statistics, 1988. 59 p. : ill. *CSI 42108.216.*
MICROLOG 88-05760 1 fiche

The primary purpose of the economic statistics program of the Manitoba Bureau of Statistics (MBS) is to provide economic information to policy analysts and other interested users. An integral element of the program is the periodic publishing of background information on various economic issues in the form of topical reports. This MBS report examines the issue of economic disparity in Canada and Manitoba's relative position within that disparity by analyzing various production and income measures (which have been adjusted for inflation and for regional differences in the cost of living).

Capital punishment in Canada -- Reviewed

by H. McKenzie. Ottawa : Library of Parliament, Research Branch, 1987. 16 p. Bibliogr. (Current issue review ; 79-36E) *French ed. (La peine capitale...) on the same fiche.* ISBN 0-660-12587-0
MICROLOG 88-00810 1 fiche

Abolished in 1976, recently there have been renewed efforts toward the reinstatement of capital punishment. This review considers the arguments for and against capital punishment and briefly outlines the issue's history in Canada. Arguments considered include deterrence, retribution and where public opinion stands. The report also considers the opinions of guardians of the justice system and inmates who claim that in effect capital punishment may increase the dangerousness of a criminal given a life sentence in the light of the fact he knows he will eventually be released. Arguments against capital punishment include a discussion of its morality, a refutation of the deterrence theory, risks to the innocent, inequality of justice and other arguments. Records all related parliamentary action.

Le Caribou du Parc de la Gaspésie : synthèse des connaissances et recommandations sur la gestion du troupeau

étude réalisée pour le compte du Ministère du loisir, de la chasse et de la pêche ; par François Messier, Jean Ferron et Jean-Pierre Ouellet. Québec : Ministère du loisir, de la chasse et de la pêche, 1987. x, 63 p. Bibliogr.
MICROLOG 88-03218 1 fiche

L'aire de répartition du caribou a régressé au Québec depuis un siècle. Au sud du St-Laurent, les caribous sont confinés dans la péninsule le Gaspésienne, où un seul troupeau persiste dans les monts Chic-Chocs. Dans ce rapport, on tente de dégager la problématique d'ensemble de la sauvegarde de cette population et de prescrire un plan de gestion. Les objectifs de la recherche sont: synthétiser l'information biologique et socio-économique concernant le troupeau; offrir une critique la plus objective possible des résultats et des interprétations qui y sont rattachées; dégager les perspectives d'avenir de la conservation du troupeau; et proposer des recommandations de gestion.

Report describing caribou habitats and evaluating habitat units and seasonal caribou distribution for the Horseshoe Range and the Level Mountain Range in northern British Columbia. This is an accompanying report to a project to assess the impact of wolf predation on the production and survival of caribou by comparing treated (wolves reduced) and untreated (monitored only) areas similar in ecology. The predation study was conducted mainly from 1977-81 with less intensive monitoring of both caribou and wolves continuing to the present.

Caring and commitment : interim report on the concerns of nurses regarding their role in the hospital and nursing home system

Alberta. Premier's Commission on Future Health Care for Albertans. Edmonton : The Commission, 1988. iii, 52 p. : ill. Bibliogr. *CSI 35225.200.* ISBN 0-7732-0049-5
MICROLOG 88-05079 1 fiche

The Commission was established in February 1988 to ascertain facts and make recommendations as to the concerns of nurses regarding their role in the Alberta hospital and nursing home system. Public discussion meetings were conducted in Edmonton and Calgary with 14 province-wide associations representing nurses and other related groups, written submissions were considered from a wide variety of concerned groups, and relevant literature was reviewed. Terms of reference included education and the rewards received for excellence: the dangers involved; and staffing and job description. A list of submissions is included.

Caring and responsibility : a statement of social policy for Alberta

by N. Crawford. Edmonton : Alberta, 1988. 24 p. : ill. *Minister of Special Projects: Neil Crawford.*
MICROLOG 88-03643 1 fiche

The Government of Alberta spends approximately 77% of its annual budget on social programs which include educational, health care, employment training, child care, cultural, multicultural and leisure services and programs. This report sets out the government's commitment to providing social programs for the province with an attempt to show how social and economic policy support each other. The statement reviews, coordinates and develops programs for the people of the province. Includes an explanation of the role of government, its responsibilities, and a review of historical, current and future expenditures on social programs in relation to population growth, GDP, employment levels, and family income levels

Caring for our elderly : an inquiry into working and living conditions in Alberta nursing homes : submission to the Alberta Minister of Hospitals and Medical Care

Christian Labour Association of Canada. Alberta Health Care Task Force. Edmonton : The Task Force, 1988. 33 p.
MICROLOG 88-05395 1 fiche

The Association is an independent trade union representing workers in health care, service, transportation, manufacturing, construction, and resource industries and bases its mode of operation and its activities on the biblical principles of social justice and love for the neighbour. This inquiry recommends changes in the health care system that will bring about acceptable working conditions for the staff and ensure that elderly, often disabled citizens have a home where they can live their last years with dignity and respect. These changes include proper inspections, improved safety conditions, increased funding and staffing levels, and workable dispute resolution mechanisms to ensure just treatment for both residents and employees of these institutions.

Carleton Place District fisheries management plan : background information and optional management strategies, 1985-2000 : a summary

Ontario. Ministry of Natural Resources. Carleton Place, Ont. : The Ministry, 1987. 51 p. : maps. *Résumé in French (13 p.) on same fiche.* ISBN 0-7729-2183-0
MICROLOG 88-00559 1 fiche

The Ministry has initiated a planning process to identify how the fisheries resource within the province should be managed. This background document presents a sumary of fisheries resource information and options for management within the Carleton Place Administrative District. Following public review, a draft Fisheries Management Plan will be developed to identify both long term direction (year 2000) and specific short term programs to be carried out over the next five years. All waters in the District have been considered in this plan, including White, Silver and Brooks Lakes in their entirety, but excluding Bobs Lake. Only the Lanark County and R.M.O.C. portions of the Ottawa River, the Rideau River, Big Rideau Lake and Lower Rideau Lake are included.

Casting of steel strip using a single roll caster

by M. Sahoo, G. Morin and D. Cousineau. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 22 p. : ill. Bibliogr. (Report ; MTL 88-40(TR))
MICROLOG 88-06065 1 fiche

Steel industries around the world are looking at different approaches to moving directly from the liquid steel stage to the final product. The direct casting of thin metal strip is one such approach since it offers a great decrease in the cost of the final product by eliminating the usual slab casting, conditioning, reheating, roughing, and hot finishing. The Canadian steel industry has proposed a business plan to develop a made-in-Canada-strip-casting-technology. This report describes the design of a simple strip-casting machine to produce strips of steel ranging in thickness from 0.5-2.0 mm. A brief description of the casting machine is given, with the results achieved in producing strip from various non-ferrous and ferrous metals.

Catalogue of rockburst literature

by D.G.F. Hedley. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 32 p. (Report ; MRL 87-50(LS))
MICROLOG 88-00472 1 fiche

Although mining has been carried out for at least a couple of millenia, rockbursts have occurred only over the last century, since improvements in mining technology, especially in explosives, hoisting, pumping and ventilation, allowed mines to go deeper into an increasing stress environment. In this review only readily available English literature has been consulted, and only in respect to hard rock mines. Consequently, most of the literature is concerned with South African gold mines, metal mines in northern Ontario, the Kolar Gold Fields in India, and the Coeur d'Alene mining district in Idaho. The articles have been divided into categories as follows: general reviews and text books; mechanics; seismic monitoring and source location; seismology; alleviation; controlling damage and destressing; prediction; and case histories. For each category the literature is listed chronologically, then alphabetically within each year.

Catalytic hydrogasification of wood

prepared for Bioenergy Development Program, Renewable Energy Branch, Energy, Mines and Resources Canada ; prepared by Donald S. Scott. Ottawa : Energy, Mines and Resources Canada, 1986. xxix, 179 p. : ill. Bibliogr.
ISBN 0-662-15615-3
MICROLOG 88-01583 3 fiche

Previous work had shown that wood could be catalytically methanated at temperatures from 400C-600C at one atmosphere of hydrogen pressure. High yields of methane were obtained in the few experiments conducted. This study attempts to verify these results and investigates the variables affecting the yield of methane and other products during the low-pressure low-temperature catalytic hydrogasification of poplar wood. From the results, a concept for an integrated gasification system was to be developed based on steam reforming of methane to yield a synthesis gas, and the recycling of some product has to yield the necessary hydrogen stream. This report is confined to the study of the first stage, since the steam reforming and diffusional separation steps represent known technology.

Catalytic two-stage liquefaction of Nova Scotia coals : final report

by J.J. Starzomski and D.M. Jay. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1987. vi, 105 p. : ill. Bibliogr.
CANMET contract: 69046-01-SQ.
MICROLOG 88-00765 2 fiche

Work concentrated on testing three Sydney area coals with a nickel-molybdenum catalyst. Experiments were carried out in a once-through processing mode using a continuous-flow bench unit. A total of fourteen catalytic two-stage experiments were conducted using hydrogenated coal-derived oil as reaction solvent. Amocat 1C, a nickel-molybdenum catalyst with a bimodal pore size distribution, was used in both reactors. Experiments were carried out with Lingan Harbour, Prince Hub and Donkin Harbour seam coals to assess coal reactivity and the effects of first-stage reactor temperature, pressure and catallyst age on raw product yields. Illinois No. 6 coal was tested as a benchmark feedstock. High coal conversions, 90-94 wt.%, were achieved in the catalytic two-stage processing mode.
AP CA CM EN PS SC

Catalytic two-stage liquefaction of Nova Scotia coals, part II : final report

by J.J. Starzomski and D.M. Jay. Dartmouth, N.S. : Nova Scotia Research Foundation Corporation, 1988. vii, 99 p. Bibliogr.
CANMET contract: 7-9034/01-SQ.
MICROLOG 88-05989 2 fiche

Test work was focused on catalyst performance and coal space velocity in the first-stage reaction zone. Experiments were carried out in a once-through processing mode using a continuous-flow bench unit. During the first phase a nickel-molybdenum bimodal catalyst was tested. On completion of this work a bimodal catalyst with higher nickel-molybdenum loading and larger mean mesopore and macropore diameters was tested in the first-stage reactor. A total of ten experiments were carried out with the Harshaw/Filtrol catalyst using three Sydney area coals and Illinois No. 6, a benchmark American coal. After completion of experimental work with the Harshaw/Filtrol catalyst, a larger first-stage reactor was installed in the bench unit to provide one-half the slurry space velocity employed in earlier tests. Eleven experiments were conducted with Amocat 1C to assess coal reactivity and the effects of reaction temperature and catalyst age.

Cellulase from the white-rot fungus *Polyporus anceps*

by A.E. Reade. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1987. xiv, 64 p. : ill. Bibliogr.
MICROLOG 88-06247 1 fiche

Conversion of lignocellulosics to liquid fuels is one way of exploiting biomass as a renewable energy source. A key step in the conversion is the enzymatic hydrolysis of cellulose to sugar. To do this economically, large amounts of inexpensive and highly effective cellulase are needed. *Polyporus anceps*, a cellulolytic wood-degrading fungus, gave indications of an ability to hydrolyse substantial amounts of poplar shavings to sugar. The present study was undertaken to assess the cellulolytic potential of *P. anceps* by comparing it to *Trichoderma reesei* RUT-C30, one of the best known producers of fungal cellulase. The activities of the various components of the cellulase complex were monitored in culture filtrates from submerged fermentations of the two fungi growing on purified cellulose or milled poplar.

Cement-based materials for use in the disposal of low-level and medium-level radioactive wastes : literature review

by J.J. Deans and H.M. Andre. Toronto : Ontario Hydro, Research Division, 1987. iv, 66 p. (Report ; no. 87-108-K)
MICROLOG 88-00137 1 fiche

This report contains the findings of a literature review on the use of cement-based materials in the disposal of low- and medium-level radioactive waste. The desirable performance characteristics of these materials are outlined. The effect of various mix components on the mechanical, hydraulic, chemical, thermal and emplacement properties is discussed. Information on cement-based materials both from within Ontario Hydro and from external sources has been reviewed. A small number of basic mix components are recommended for study in the development of a grout for low-medium-level radioactive waste storage.

The Ceramics of Lower Fort Garry : operations 1 to 31

by L. Sussman. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1979. 339 p. : ill. Bibliogr. (History and archaeology ; 24) ISBN 0-660-10179-3
MICROLOG 88-04084 4 fiche

The ceramics from Lower Fort Garry were retrieved from 31 operations, most of which represent individual structures. The variety of ceramic objects includes tableware, commercial containers, storage vessels, kitchen ware, flowerpots, decorative objects, dolls and toy dishes. The largest group, represented by the tableware, was manufactured in England and dates from ca. 1836 to the beginning of the 20th century. A large percentage of this pottery was made by the Spode/Copeland company of Staffordshire. With the exception of several commercial containers manufactured in England, the remainder of the collection is unmarked. On the basis of their function, decoration and manufacturing techniques, they are dated to the second half of the 19th century. Their country of origin is not known, though many of the decorative articles appear to be continental. All the pottery discussed in this report is believed to have been associated with the fort during its Hudson's Bay Company occupation.

The Changing Canadian family

by M. Baker. Ottawa : Library of Parliament. Research Branch, 1986. 21 p. Bibliogr. (Backgrounder ; BP-158E) *French ed (L'évolution de la famille...) on the same fiche.* ISBN 0-660-12447-5
MICROLOG 88-00695 1 fiche

Falling birthrates, rising life expectancies, the completion of childbearing at an earlier stage and other demographic trends have changed the institution of the family in the last 20 years. This report looks at the concept of the family and how these factors and others such as the trends in labour market demands coinciding with the expansion of the service sector, the widespread entrance of married women into the workforce, the consequent need for paid childcare, and the rise in family violence, have precipitated changes in family structure and life. Implications for policies discussed include equality issues, equality within the home, and modifying the work environment.

Characteristics of the lobster fishery on the oceanic coast of Nova Scotia

by R.E. Duggan. Halifax : Dept. of Fisheries and Oceans, Scotia-Fundy Region, Fisheries Research Branch, Halifax Fisheries Research Laboratory, 1985. v, 37 p. : map. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1883) ISSN 0706-6473
MICROLOG 88-02262 1 fiche

The lobster fishery in Eastern Canada is one of the country's oldest, continuously managed fisheries and has consisently provided the highest dollar value of all species in the Maritimes. Fifteen percent of licensed lobster fishermen on Nova Scotia's oceanic coast [Lobster Fishing Districts (LFD) 4B-6B] were interviewed by Department of Fisheries and Oceans personnel during February and March of 1983. Responses to a questionnaire provided detailed information on characteristics of the fishery in 1982 such as vessel length, age, and construction, on-board equipment and accessories, fishing gear, fishing experience, fishing effort, manpower, and bait for each LFD in the study area.

Characteristics of the St. Mary's Bay lobster stock in relation to scallop gear impact

by D.A. Robichaud, A.M. Williamson and D.E. Graham. Ottawa : Fisheries and Oceans, Biological Station, Invertebrates, Plants and Environmental Ecology Division, 1987. iv, 17 p. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1955)
ISSN 0706-6473
MICROLOG 88-01466 1 fiche

An assessment of the impact of scallop fishing on the lobster fishery in St. Marys Bay, Nova Scotia was undertaken to help alleviate a conflict that recently arose between the two fisheries. This report determines the distribution of catch and effort of the lobster and scallop fishery in the Bay, estimated scallop and lobster densities and distribution in local areas by scuba diving, and determines the movement of tagged lobsters in the Bay. Lobsters were examined for injuries of missing claws during the December 1986 sea sampling.

Characteristics of three and four-wheeled all-terrain vehicle accidents in Quebec

by A. Delisle, C. Laberge-Nadeau and B. Brown. Montréal : Université de Montréal, Centre de recherche sur les transports, 1988. 25 p. Bibliogr. (Publication ; no 563)
MICROLOG 88-02272 1 fiche

During the past 5 years, 3 and 4-wheeled all-terrain vehicles (A.T.V.s) have gained widespread popularity for recreational purposes. Associated with this, the number of vehicles and injuries have risen dramatically. This report presents the results of a survey of A.T.V. accident victims identified from emergency room records from 10 regional hospitals in rural Quebec from May 1-November 30, 1985. The number and severity of injuries requiring emergency room treatment are presented as well as characteristics of the involved drivers and victims, the vehicles used and the circumstances of the accident.

Characterization of liquid fuels from spouted bed pyrolysis of Canadian coals : annual report, August 16, 1982-August 15, 1983

by K.C. Teo and A.P. Watkinson. Ottawa : Canada Centre for Mineral and Energy Technology, 1983. iii, 53 p. : ill. Bibliogr. *CANMET contract: ISU82-00248.*
MICROLOG 88-03906 1 fiche

Description of work conducted in 1982-83. A miniature 2.5 cm dia. spouted bed reactor with a continuous feed rate of 2.5-30 g/hr was developed to study the rapid pyrolysis of Canadian coal. A series of modifications from the original design were made to accommodate caking and non-caking coals of various sizes. The pyrolysis of Sukunka coal from the Peace River coal field was investigated with a vapor residence time of 0.4 second over a temperature range of 500-759 C. A method for classification of coal tars into major solvent-derived fractions was developed.

Characterization of salmonid over-wintering habitat within seasonally flooded land on the Carnation Creek flood-plain

by T.G. Brown. Nanaimo, B.C. : Ministry of Forests and Lands, Research Branch, 1987. vi, 42 p. : ill., maps. Bibliogr. (Land management report ; no. 44) ISSN 0702-9861 ISBN 0-7718-8580-6
MICROLOG 88-00565 1 fiche

Forestry activities on west coast alluvial flood-plains have the potential of altering juvenile salmonid over-wintering habitat associated with small ephemeral swamps and intermittent tributaries (off-stream habitat). A freshwater residence of at least 1 year is required for completion of the coho salmon life cycle. In winter within the Carnation Creek watershed, coho juveniles occupy both main-stream habitat (side pools, undercut banks, and debris piles) and off-stream habitat (ephemeral swamps and intermittent tributaries). The purpose of this study is to provide watershed managers with a guide to recognizing potential coho and trout winter habitat. In characterizing the flooded areas located on the Carnation Creek flood-plain, this study used botanic, pedologic and hydrologic parameters to develop habitat unit descriptions.

La Charte des droits : libertés fondamentales et liberté de circulation et d'établissement -- Rev.

par B. Carson. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 25 p. Bibliogr. (Bulletin d'actualité ; 84-16F) *L'éd. anglaise (The Charter of Rights...) sur la même fiche.* ISBN 0-660-92162-6
MICROLOG 88-00793 1 fiche

La Charte canadienne des droits et libertés contient deux articles sur les libertés fondamentales (article 2) et la liberté de circulation et d'établissement (article 6). L'article 2 énonce que chacun a les libertés fondamentales suivantes: liberté de conscience et de religion, liberté de pensée, de croyance, d'opinion et d'expression, y compris la liberté de la presse et des autres moyens de communication. L'article 6 donne à tout citoyen canadien le droit d'entrer au Canada, d'y demeurer ou d'en sortir, et établir sa résidence dans toute province. Ce document expose diverses interprétations que pourraient avoir les articles 2 et 6 et celles que les tribunaux en ont données jusqu' à maintenant.

The Charter of Rights : fundamental freedoms and mobility rights -- Reviewed

by B. Carson. Ottawa : Library of Parliament, Research Branch, 1987. 22 p. Bibliogr. (Current issue review : 84-16E) *French ed. (La Charte des droits...) on the same fiche.* ISBN 0-660-12605-2
MICROLOG 88-00793 1 fiche

The Canadian Charter of Rights and Freedoms came into effect on April 17, 1982. This analysis concentrates on sections of the Charter which deal with fundamental freedoms: conscience and religion; thought, belief, opinion, expression, including freedom of the press and other media of communication. The report discusses the aspects of the Charter that allows for free travel by Canadian citizens in and out of Canada and between the provinces. Issues are discussed in terms of how they have been tested before the courts with respect to other Acts that were in effect before the Charter and that seem to contradict or infringe upon the spirit of the Charter.

Charting a clear course for a national older workers' program

a paper presented to the Minister of Employment and Immigration ; by the Canada Employment and Immigration Advisory Council. Ottawa : The Council, 1986. 16, 18 p. *Bilingual (Grandes lignes d'un...).*
MICROLOG 88-05193 1 fiche

In August 1985, the Advisory Council presented the Minister of Employment and Immigration with a report describing the deteriorating position of older workers in the labour market. This paper updates that report and describes the current situation with regard to unemployed older workers affected by current economic adjustmen. It identifies the group most seriously affected as begin those aged 55 to 64 and outlines criteria for their assistance. It proposes a program structure which would concentrate on reintegrating these workers into the labour force and applying existing labour market adjustment programs to their needs. As a last resort, it proposes an income maintenance safety net. The paper also describes a more simplified approach to the delivery of these programs.

Chemical and physical characteristics of snow in the Kejimkujik National Park area, II : winter 1984-85

by T.A. Clair. Moncton, N.B. : Inland Waters Directorate, Atlantic Region, Water Quality Branch, 1986. 56 p. Bibliogr.
MICROLOG 88-04717 1 fiche

Snowmelt has been identified as one of the most important modifiers of stream and river chemistry in temperate and boreal regions of North America and Europe. Evidence from stream chemistry in southwestern Nova Scotia also shows similar effects, as ions deposited in the snowpack are released into streams during snowmelts and thus change ion concentrations over a short period of time. The Kejimkujik National Park area of Nova Scotia was the focus of a number of studies dealing with the chemical quality of local streams and lakes. This report summarizes the results of the evaluation of snowpack water content and chemistry in the upper Mersey basin during the winter of 1984-1985.

MICROLOG 88-06402 2 fiche

Absorption systems are widely used in industrial refrigeration cycles and domestic propane driven refrigerators, but their use in North America for chemical pump applications are rare. This study was initiated to develop a more detailed basis for design and cost estimates, using Polysar (Corunna) as host, and screening all qualified vendors to determine their interest and capability. The study presents a description of the chemical absorption heat pump and its operation; a discussion of installed cost estimates, return on investment, cost comparison, and technology transfer benefits; a report on the international survey of heat pump vendors; detailed specifications from Stearns Catalytic; and a report of a 500F absorption heat pump under development.

Les Cheminements particuliers de formation : guide d'organisation et de planification pédagogique

Québec : Ministère de l'éducation, Direction générale des programmes, Direction de l'adaptation scolaire et des services et des services complémentaires, 1987. 324 p. : ill. Bibliogr. ISBN 2-550-13701-9
MICROLOG 88-03115 4 fiche

Les cheminements particuliers sont un mode d'organisation de l'enseignement pour les élèves de l'école secondaire qui présentent un retard scolaire. Ce guide se veut un outil mis à la disposition des agents d'éducation des commissions scolaires et des écoles, afin de faciliter la mise en oeuvre des cheminements particuliers de formation. La 1re partie vise à définir d'une manière opérationnelle les cheminements particuliers de formation. La 2e partie présente différents modèles d'organisation tandis que la 3e soumet une démarche de planification pédagogique touchant les programmes d'études de français (langue maternelle), de mathématique et d'anglais (langue seconde).

Chromated copper arsenate wood preservation facilities : recommendations for design and operation

by D.E. Konasewich and F.A. Henning. Ottawa : Environment Canada, Environmental Protection Service, 1988. xi, 81 p. : ill. Bibliogr. (Report ; EPS 2/WP/3) *French ed. (Installations de préservation...) : 88-03690/1.*
ISBN 0-662-16125-4
MICROLOG 88-03689 1 fiche

Wood preservation is the pressure or thermal impregnation of chemicals into wood to a depth that will provide effective long-term resistance to attack by fungi, insects, and marine borers. The chemicals predominantly used in Canada for wood preservation are pentachlorophenol, creosote, and aqueous formulations of arsenic, copper, chromium or ammonia. The wood preservation process deposits or fixes these chemicals in the wood, and the toxic nature of the chemicals effectively prevents the attack of living organisms on the wood. Because the chemicals are also toxic in varying degrees to human and aquatic organisms, their use in industry must be carefully controlled. This document provides guidelines for the design and operation of wood preservation facilities in a manner that will protect workers and the environment from harmful exposure to wood preservation chemicals.

Clay tobacco-pipes, with particular reference to the Bristol industry

by I.C. Walker. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1977. 4 v. : ill. Bibliogr. (History and archaeology ; 11) (Histoire et archéologie ; 11) ISBN 0-660-00869-6
MICROLOG 88-04052 20 fiche

This study considers clay tobacco-pipe manufacture with specific reference to the industry in Bristol. As a background, the basic archaeological usefulness of clay pipes as a means to date sites is outlined, the introduction of tobacco to Europeans considered, and the various methods of tobacco-taking over the centuries examined. An extensive examination of clay-pipe manufacturing processes in France, The Netherlands, Belgium, Germany, Denmark, Sweden, Great Britain and the US is made, along with a history of the pipe industry in most of these countries. The pipemaking industries in five centres; Liverpool, Chester, Glasgow, Montreal, and East London, are considered and related to the Bristol situation. Also considers production costs for clay pipes and wages earned by pipemakers. The origins, rise, decline, re-emergence, and final demise of the Bristol clay-pipe industry is examined in detail in the light of documentary and archaeological evidence. Trends are noted from the apprenticeship rolls, burgess books, poll-books, and trade directories and the interrelationships of the evidence are evaluated. Also considers the historical and socio-economic background of the ghetto of St. Jude's, a pipemaking area.

Climate of Yukon

by H.E. Wahl...et al. Ottawa : Environment Canada, Atmospheric Environment Service, 1987. xxii, 323 p. : ill. Bibliogr. (Climatological studies ; no. 40) ISBN 0-660-12415-7
MICROLOG 88-03665 4 fiche

Broad overview of Yukon climate, classified as sub-arctic continental. Climatic regions are defined although data are too sparse from the high country to allow rigorous specification of regional differences. Traditional climatological analyses are presented for temperature, wind, precipitation, humidity, cloud, thunderstorms, visibility and obstructions to vision. Normal circulation patterns are depicted and four common synoptic-weather patterns are defined. Analysis includes probability estimates of extremes and duration statistics for maximum and minimum temperatures, daily precipitation and wind speed. The subjects of air pollution potential, wind energy and climatic change are discussed in summary rather than in depth.

Climatic change in Canada, 4 : annotated bibliography of quaternary climatic change in Canada

edited by C.R. Harington and G. Rice ; compiled by Anne B. Smithers, Linda Ghanimé and C.R. Harington. Ottawa : National Museums of Canada, National Museum of Natural Sciences, 1984. 357 p. (Syllogeus ; no. 51) ISSN 0704-576X
MICROLOG 88-03281 4 fiche

Since its beginnings in 1977, a basic aim of the Museum's climatic change project was to compile a comprehensive, annotated bibliography on Quarternary paleoclimates in Canada, in addition to supporting research in the field and publishing paleobiological, historical and meteorological data of significance to the study of climatic change in Canada since the peak of the last glaciation some 20,000 years ago. Records are listed alphabetically by author and include a complete citation of the source with annotation. Indices are organized by geographical region, geological time, and subject. Published material is covered to early 1983. Substantial published papers with references were given priority over published abstracts and unpublished material such as theses.
CA PS SC

Climatic change in Canada, 5 : critical periods in the quaternary climatic history of northern North America

edited by C.R. Harington. Ottawa : National Museums of Canada, National Museum of Natural Sciences, 1985. 482 p. : ill. Bibliogr. (Syllogeus ; no. 55) ISSN 0704-576X
MICROLOG 88-03282 6 fiche

Papers presented at a symposium on critical periods in the Quarternary climatic history of northern North America, the postglacial melting about 10,000 years ago, the Hypsithermal, the Little Climatic Optimum about 1000 A.D., the Little Ice Age about 1500-1850 A.D., times of major volcanic eruptions and years of extreme cold, and drought to clarify their nature, causes and impacts as viewed from various fields. Papers are organized by topic: bibliographies; instrumental records; historic records; prehistory; tree rings; fossil pollen; glacial geology and geochronology; and paleoclimatology and glaciology. Papers are usually based on late-glacial and Holocene fossil pollen analysis and on studies of historical

records, and deal with all regions of Canada, particularly Hudson Bay and the Arctic. New England, Alaska and Greenland are also mentioned.

L'influence du climat de la région de la Capitale nationale (RCN) sur les modes de loisirs de plein air, y compris la nature des activités et le type de personnes qui les pratiquent, a été délimitée dans ce rapport. Celui-ci décrit et analyse les liens fondamentaux existant entre le temps et l'homme ainsi que les nombreux climats retrouvés au sein de la RCN. Des saisons de plein air sont déterminées et la qualité du temps qu'elles connaissent est évaluée pour plusieurs groupes d'activités récréatives. Certaines techniques d'intégration du temps et du climat aux processus de prise de décision sont décrites pour les principaux groupes d'utilisateurs.

Close range acoustic ice hazard detection, phase II

produced by P. de Heering and P. Sutcliff ; produced for Canartic Shipping Company Ltd. ; sponsored by Transportation Development Centre. Ottawa : Canartic, 1987. 2 v. : ill. Bibliogr. *TP 8186E.*
MICROLOG 88-00332 3 fiche

An evaluation of sonar as a means of detecting icebergs in open and ice-covered waters was undertaken during July 1986 in the Lancaster Sound and Baffin Bay regions of the Canadian Arctic. For this purpose, a specially calibrated C-Tech CDS-40A, 36 kHz fish-finding sonar, mounted in the hull of the icebreaking freighter M.V. Arctic, was used in orer to obtain acoustic data on the icebergs and the environment. The sonar trials took place during a 48-hour period on a commercial voyage of the M.V. Arctic between Nanisivik on Baffin Island and Antwerp, Belgium.

Co-operative development strategy for Prince Edward Island

Charlottetown : Prince Edward Island, Dept. of Industry, 1988. 22 p. : ill. *French ed. (Stratégie de développement...) on the same fiche.*
MICROLOG 88-02628 1 fiche

The primary goal of the strategy is to create stuctures and programs that will help stimulate the process of social and economic development in Island communities through a co-operative approach. Includes reviews of co-operatives and their structures relative to Prince Edward Island and identifies areas that warrant more work. Calls for joint public and co-operative sector effort to: encourage local investment; encourage further development and testing of the worker co-operative model as applied to appropriate scale projects at the community level; and strengthen the infrastructure for co-operative development at both the provincial and local levels.

Coal ash as structural fill with special reference to Ontario experience

by P.S. Toth and H.T. Chan. Toronto : Ontario Hydro, Research Division, 1987. iv, 41 p. : ill. Bibliogr. (Report ; no. 87-184-K)
MICROLOG 88-01716 1 fiche

Fly ash and bottom ash from coal-fired generating stations can be used as alternatives to natural materials for the construction of structural fills. This report discusses the relevant engineering properties of coal ash in relation to their expected behaviour in structural fills and 4 case studies of fly ash used as structural fill are presented. The performance of fly ash structural fills were evaluated during and after construction and groundwater monitoring data from existing fly ash fills are presented.

Coarse earthenwares from the Fortress of Louisbourg

by K.J. Barton and E.A. Smith. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1981. 266 p. : ill. Bibliogr. (History and archaeology ; 55) *Bound with: Glassware from a reputed 1745 siege debris context at the Fortress of Louisbourg / E. Ann Smith.*
ISBN 0-660-11079-2
MICROLOG 88-04082 3 fiche

This paper identifies and attempts to evaluate 39 groups of wares derived from an examination of 58,737 sherds of pottery. These wares were discovered as a result of the extensive excavations that have taken place at Louisbourg in the past 20 years. They comprise coarse earthenwares only - the fine wares are the subject of separate attention. The French wares were probably derived from two sources, the west coast naval base of Rochefort and the south coast port and naval supply base of Marseilles. Both places attracted goods from some distance for northern French material occurs here as do northern Italian wares. The colonial wares are varied and suggest several sources: there are also ephemeral groups of wares from England and the Orient.

Coded-wire tag recoveries from Vancouver Island sport caught steelhead, 1982-1986

byby M.G. Lirette andand R.S. Hooton. Victoria : Province of British Columbia, Ministry of Environment and Parks, 1988. i, 20 p. : maps. Bibliogr. (Fisheries management report , no. 92) ISSN 0705-5390
ISBN 0-7726-0837-7
MICROLOG 88-05965 1 fiche

Since the start of steelhead enhancement through hatchery propagation, it has been the policy to mark all hatchery steelhead smolts and, whenever possible, to utilize native wild brood stock. Between 1972 and 1983, virtually all hatchery reared steelhead smolts released into Vancouver Island streams were both adipose fin clipped and coded-wire tagged, providing the means to evaluate a variety of hatchery steelhead rearing and release strategies, commercial interception rates, and hatchery fish contribution to the sport fishery within and outside the release streams. After 1981, sport fishermen were encouraged to voluntarily turn in heads from hatchery steelhead taken from Vancouver Island between 1982-86 and, in particular, from 6 watersheds where stocking levels and angler cooperation were relatively high.

Coho salmon *Oncorhynchus kisutch* utilization of tributary lakes and streams in the Keogh River drainage, British Columbia

by N.T. Johnston, J.R. Irvine and C.J. Perrin. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Biological Sciences Branch, West Vancouver Laboratory, 1987. iv, 54 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences : no. 1973)
ISSN 0706-6473
MICROLOG 88-05832 1 fiche

Small tributary streams and lakes may be important habitats for the production of juvenile coho, with autumnal migrations into smaller tributary streams and small lakes well-documented and considered to be a mechanism to increase winter survival by avoiding unfavourable winter conditions in mainstream rearing habitats. Juvenile coho are occasionally reported as being present in lakes during the summer but there are few data on the spring and summer movements. The data presented in this report were collected to document the use of small tributaries and lakes by juvenile coho and other salmonids throughout the year.

Cold load pickup experience at MEA utilities

by S.L. Cress. Toronto : Ontario Hydro, Research Division, 1987. 43 p. (Report ; no. 87-52-K)
MICROLOG 88-00136 1 fiche

Cold load pickup refers to the temporary overload that occurs when load is restored to a distribution system after a prolonged outage. It needs to be taken into account when sizing distribution transformers and their fuses in order to avoid damage to these components and unnecessary outages. In choosing the appropriate size of transformer for any installation, it is necessary to know the magnitude and duration of the pickup, which is dependent on the size and type of connected load, the duration of the outage, pre-outage conditions, ambient temperature and the amount of transformer loss-of-life that is acceptable to the utility. This report presents the results of a survey of selected Ontario utilities and a susequent analysis of the nature of loads on utility distribution transformers, present transformer and fuse sizing practices, outage information, problems associated with cold load pickup, and requirements for future guidelines.

Collection, conditioning, immobilization and encapsulation of the airborne radioactive nuclides from a CANDU fuel reprocessing plant

by S.-D. Chang. Toronto : Ontario Hydro, Research Division, 1987. vi, 31, 19 p. Bibliogr. (Report ; no. 87-44-K)
MICROLOG 88-00135 1 fiche

Irradiated fuel from CANDU stations contains depleted uranium, plutonium, and waste fission products. Separation of the fissile plutonium would provide a valuable energy resource. Several processes are available for reprocessing of irradiated fuel: Purex process, Amine process, and TBP co-processing. Regardless of the process selected, the head-end operations are the same: mechanical fuel disassembly, shearing, and fuel dissolution. These operations result in two off-gas streams, the head-end off-gas (HOG) and the dissolver off-gas (DOG), which contain radionuclides such as iodine-129, carbon-14, krypton-85, and tritium. This report consists of an evaluation and selection of treatment processes for collection and immobilization of the gaseous radionuclides, with flowsheets, and mass and energy balances for the selected processes.

Collective bargaining over technological change in Canada : a quantitative and historical analysis

by J.C. Peirce. Ottawa : Economic Council of Canada, 1987. 1 (Discussion paper ; no. 338) ISSN 0225-8013
MICROLOG 88-00961 2 fiche (Available on fiche only)

Worker involvement in the technological change process can take many forms. This paper emphasizes the type of involvement afforded by formal collective bargaining in order to discover how frequently certain key technological change clauses occur in Canadian agreements and whether the incidence of these types of clauses has changed appreciably over time with particular reference to Manitoba, Saskatchewan, British Columbia and the federal jurisdiction where technological change legislation is in force. Also discussed is the concern that more than half of Canada's workers are not unionized, suggesting the need for supplemental policy approaches to formal agreements that would include all workers.

Depuis 1975, la production bovine au Québec a connu une progression régulière qui a permis à l'ensemble de la production de se structurer et de s'organiser. Le Colloque sur la viande bovine, tenu en mars 1987, a abordé les sujets suivants: la compétitivité de la production québécoise, les ajustements des producteurs aux besoins du marché, l'avenir de la production bovine au Québec et la supplémentation des ensilages à la farine de poisson pour la croissance et l'engraissement. Ce document contient les textes des conférences prononcées lors du colloque.

Colloquium on research on racial discrimination

Colloquium on Research on Racial Discrimination (1986 : Ottawa, Ont.). Ottawa : Canadian Human Rights Commission, 1986. 62 p. *French ed. (Colloque sur la recherche...) on the same fiche.*
MICROLOG 88-05190 2 fiche

The Canadian Human Rights Act prohibits all discrimination based on race, colour, and national or ethnic origin in the areas of employment and provision of services. Although the subject of several descriptive studies, racial discrimination had never before been the topic of discussion for a whole group of researchers, practitioners and representatives of various human rights commissions gathered together in a single location. This meeting enabled all the participants to take stock of Canadian research in the field, and provided a forum for the presentation of two studies: a study on visible and ethnic minorities in Montreal; and an action-research project, Human Rights and the Asian Community of Montreal.

Colonization of basket samplers by macroinvertebrates in riffle areas of 10 Newfoundland river systems

by J.-P. Thonney, R.J. Gibson and K.G. Hillier. St. John's : Dept. of Fisheries and Oceans, Science Branch, 1987. v, 43 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1558)
ISSN 0706-6457
MICROLOG 88-01058 1 fiche

In the river systems of insular Newfoundland, there is a sparse faunal assemblage compared to the continental land mass due to geographic isolation. This study characterizes the aquatic invertebrate faunal assemblages and compares their relative abundances in 10 insular rivers located in 5 main areas on the island. Samples were taken in various stations from 1982-84 with colonization baskets and then sorted and classified.

Combattre le bruit de la circulation routière : techniques d'aménagement et interventions municipales

Québec : Ministère des transports, 1987. viii, 96 p. : ill. Bibliogr. ISBN 2-551-08600-0
MICROLOG 88-05152 2 fiche

Une des principales formes de pollution de l'environnement urbain est sans contredit le bruit causé par les différents modes de transport et particulièrement celui provenant de la circulation routière. L'objectif de ce guide est d'informer tous les intervenants oeuvrant dans les domaines de l'aménagement et du développement du territoire des différentes techniques pour amoindrir le bruit de la circulation routière. Ces techniques concernent aussi bien l'aménagement du territoire, l'architecture des bâtiments que la gestion des sources émettrices de pollution.

Combined residential location and transportation models -- Rev.

by M. Los. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 52 p. Bibliogr. (Publication ; no. 95) (Cahier ; no 7802)
MICROLOG 88-06368 1 fiche

This paper presents predictive models which combine residential location with transportation. These models predict residential location and the use and performance of the transportation system for exogenously given total housing stock and employment locations. They are formulated as mathematical programs generalizing the Herbert-Stevens model of residential location to include previously proposed equilibrium models of trip assignment, trip distribution and modal choice. A solution methodology is proposed for prediction and calibration.

Combustion testing of ceramic coal-water (C.W.F.) atomizers in unit no. 1 Chatham, New Brunswick generating station : final report

New Brunswick Electric Power Commission.

Ottawa : Energy Mines and Resources Canada ; New Brunswick Electric Power Commission, 1986. 2 v. *Contents: vol. 1 : N.R.C. burner demonstration.-- vol. 2 : Baghouse demonstration. CANMET contract: 0SQ84-00423.*
MICROLOG 88-02036 6 fiche

In April 1982, an agreement was signed between Energy, Mines and Resources, N.B. Power and the Cape Breton Development Corporation which resulted in the construction of a coal-water fuel production plant at Sydney, Nova Scotia. The product from this plant was used for the testing of prototype coal-water fuel burners at N.B. Power's Chatham Generating Station in New Brunswick. From the demonstrations that have been completed to date, it has been shown that the short life of the burner atomizer (tip of the gun), and poor burner performance are major problems. The new NRC, coal-water fuel gun/atomizer had overcome these problems.

La Commission de la frontière internationale a pour mandat d'inspecter la frontière entre le Canada et les Etats-Unis, de réparer les repères endommagés, d'assurer l'exactitude de la ligne de démarcation et de définir toute partie de la frontière que peut contester l'un ou l'autre des gouvernements. Ce document contient le rapport annuel conjoint (Canada-Etats-Unis) pour 1986. Les sujets suivants sont abordés: les activités sur le terrain en 1986, l'histoire de la frontière entre les 2 pays, les travaux de réglementation de la Commission, les frais d'exploitation, la liste des Commissaires depuis 1904 et le personnel de la Commission. Une bibliographie complète le document.

Commissioner : W.D. Parker. Ottawa : The Commission, 1987. xvii, 461 p. Bibliogr. *French ed. (Commision d'enquête sur les faits...) : 88-01700/5.* ISBN 0-660-12649-4
MICROLOG 88-01699 5 fiche

Sinclair Stevens resigned from the federal cabinet in May 1986, in the wake of conflict of interest allegations in reference to his private financial dealings with Magna International Inc., the Canada Development Investment Corporation, some Bay Street (Toronto) investment firms, Hyundai Corporation and his failure to comply with Conflict of Interest Guidelines. Report summarizes the allegations, Mr. Stevens private business interests before he became Minister, and his Ministerial duties. Contains descriptions of York Centre group of companies, and of the steps taken by the Minister in September 1984 to comply with Guidelines. Examines the role, nature and extent of communication Shirley Walker and Noreen Stevens had with the Minister and discusses at length the allegations and the extent to which Mr. Stevens was still involved in private business matters. Makes general recommendations for reforming the Guidelines.

Common bus lines -- Rev.

by C. Chriqui and P. Robillard. Montreal : Université de Montréal, Centre de recherche sur les transports, 1974. 13 p. Bibliogr. (Publication ; no. 10) (Publication ; no 180)
MICROLOG 88-06298 1 fiche

In the operational planning of a public transit network, the network must be loaded in the most precise way. The problem of routes used becomes more difficult in cases where routes share a common section. Most computer packages code the section as a unique link and disregard the precise assignment of the passengers on the distinct routes. This paper gives a solution to the operation assignment based on the perceived travel time and formulated as an optimization problem within a probabilistic context. A more detailed treatment on uniform and exponential cases for the time of the first vehicle to arrive on a route concludes the paper.

Communication and transportation networks reliability using routing models

by B. Sanso and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. i, 24 p. Bibliogr. (Publication : no. 548)
MICROLOG 88-01668 1 fiche

Paper introducing a procedure to find a measure of reliability that could effectively evaluate the performance of any kind of network flow, specifically communication, electric power, vehicular, bus, and air transportation. A measure of "static" reliability (failure duration is not considered) is proposed that takes into account several models for routing decision procedures and the general methodology is outlined. Within a specific system, there is a discussion of the mathematical way of describing the system and the measure of reliability to be considered, how failures in the physical system must be managed so as to use the general methodology shown in the paper, and available routing models.

Les Communications au XXIe siècle : médias et messages à l'ère de l'information

Canada. Ministère des communications. Ottawa : Communications Canada, 1987. 101 p. : ill. *Sommaire bilingue (26, 22 p.) inclus. L'éd anglaise (Communications for the twenty-first...) : 88-00298/2.* ISBN 0-662-95470-0
MICROLOG 88-00299 2 fiche

Le but principal de ce document est d'ouvrir un débat sur les mesures qui devraient être prises au cours des prochaines années pour corriger les faiblesses dans le domaine des communications. Ces faiblesses sont de divers ordres: le manque de vigueur des industries qui produisent les ressources informationnelles; les efforts dispersés visant à réglementer nos réseaux de télécommunications; le rythme relativement lent auquel nous appliquons les nouvelles technologies; et le développement inégal de notre effort national de recherches en télécommunications.

Communications for the twenty-first century : media and messages in the information age

Canada. Dept. of Communications. Ottawa : Communications Canada, 1987. 92 p. : ill. *Bilingual summary (22, 26 p.) on same fiche. French ed. (Les communications au XXIe...) : 88-00299/2.* ISBN 0-662-15730-3
MICROLOG 88-00298 2 fiche

The aim of this paper is to open a discussion on the measures that should be taken over the next few years to deal with the weaknesses in the role of communications and computers in Canada. These weaknesses are found in the industries that produce the information resources on which our economic and social welfare increasingly depend, in our fragmented arrangements for regulating our communications networks, in the relatively slow rate at which we take up and apply new technologies and in the uneven development of our national communications research effort.

Community policing in the 1980's : recent advances in police programs

edited by D.J. Loree and C. Murphy. Ottawa : Solicitor General Canada, 1987. v, 154 p. *Conference sponsored by the Canadian Police College and the Secretariat of the Ministry of the Solicitor General of Canada., French ed. (La police et...) : 88-02094/2.* ISBN 0-662-15807-5
MICROLOG 88-02093 2 fiche

The text of conference proceedings focusing on general issues in community policy, management of community policing, operational issues and the role of research. General issues include a review of the changing function of urban police within an historical and political context of community policing. Discusses the current climate of Canadian policing and considers prospects for change. Draws upon the London (England) Metropolitan Police Force's experience in implementing operational and organizational changes, and the neighbourhood patrol strategies of Flint, Michigan. Discusses the role and management of criminal investigations in the community and the the role of research in providing effective policing.

Community right-to-know legislation in Canada : implications for public health units

by B.A. Reeder. Hamilton, Ont. : Canadian Centre for Occupational Health and Safety, 1987. ii, 11 p. Bibliogr. ISBN 0-660-12659-1
MICROLOG 88-02173 1 fiche

In North America during the past decade, workers and communities have increasingly demanded to know the hazards present in their work and neighbourhood environments. Pertinent legislation has been passed in numerous American jurisdictions and has been presented in several Canadian ones. The "worker right-to-know" legislation, as this legislation is termed, will have its primary impact on the occupational setting, whereas "community right-to-know" legislation may have broader implications. This paper focuses upon the implications that community right-to-know legislation might have specifically on health units in Canada.

A Comparative analysis of drop-outs and non drop-outs in Ontario secondary schools : a report to the Ontario Study of the Relevance of Education and the Issue of Dropouts

by M. Sullivan. Toronto : Ontario Ministry of Education, 1988. 68 p. (Student retention and transition series) *CSI 56207.202.* ISBN 0-7729-3790-7
MICROLOG 88-04758 1 fiche

This report by Decima Research analyses attitudinal and situational differences between drop-outs and non drop-outs from Ontario's secondary school system. The analysis is based on results of telephone interviews with 1400 Ontario residents who attended secondary school in the provinces and are between the ages of 18 and 30. Discusses the long-term financial and employment effects of dropping out, the reasons for dropping out, the extent to which drop-outs return to school, variable effects by sex, the educational needs and programs that drop-outs desire, a communications strategy for getting drop-outs to enter some kind of program, variable effects by Anglophone and Francophone populations, and the effects of part-time student employment on the drop-out phenomenon.

A Comparative evaluation of long-chain quaternary amines as extractants of gold from cyanide leach solutions

by P.A. Riveros. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. 54 p. Bibliogr. (Report ; MSL 88-68(IR)) *Project 30.61.02 gold.*
MICROLOG 88-05510 1 fiche

CANMET is presently attempting to develop a solvent extraction system that can be applied directly to the extraction of gold from leaching pulps, a process which would avoid the costly solid/liquid separation step. A preliminary stage was to identify a gold extractant that would be suitable for the eventual development of a solvent-in-pulp process. Quaternery amines were found to have the best overall characteristics of all the liquid extractants testing. This report summarizes the results obtained with 3 quarternary amines (Aliquat 336, Adogen 481, and Adogen 483) and 2 clarified cyanide solutions from Campbell Red Lake and Tech-Corona Hemlo Mines. Both bench scale and a small continuous circuit were studied.

Comparative properties of rivers and lakes from an Ontario perspective

by R.A. Ryder and J. Pesendorfer. Toronto : Ontario Ministry of Fisheries and Natural Resources, 1988. iii, 42 p. Bibliogr. (Ontario fisheries technical report series ; no. 26) ISSN 0227-986X
MICROLOG 88-05792 1 fiche

In the past, aquatic ecologists in Ontario have directed most of their efforts to the study of lakes. These core studies now represent a mass of ecological information which, when extrapolated to other lakes, is useful for the management of their fisheries. Ontario rivers, on the other hand, have been routinely neglected until recently, with few exceptions. This report presents a general treatment of the morphology, hydrodynamics, temperature, chemistry, trophodynamics and biota of the rivers of Ontario and provide an ecological foundation for future studies of fish production in large Ontario rivers.

Comparison of isokinetic and isoinertial lifting tests as predictors of maximal lifting capacity

by I. Jacobs, D.G. Bell and J. Pope. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 146-153 p. : ill. Bibliogr. (DCIEM research report ; no. 87-P-40) *In European Journal of Applied Physiology*: vol. 57, 1988. On cover: DCIEM publication.
MICROLOG 88-03274 1 fiche

The development of simple and expedient means of evaluating lifting strength is integral to the establishment of occupational physical selection standards for both military and industrial environments. This study compared the relationship between isokinetic lifting (ILT) performance and a maximal operational lifting test (OLT) with that between an isoinertial progressive lifting test (PLT) and OLT. Fifty subjects performed the ILT, PLT and OLT after familiarization trials. OLT was defined as the weight of the heaviest crate that could be lifted to 1.34 m with a progressive, incremental test. ILT performance was the force generated during a single maximal simulated lift on an isokinetic dynamometer. PLT performance was the maximal weight lifted to 1.52 m with a progressive, incremental protocol on a weight stack.

Bibliogr. *Surveillance environnementale des pulvérisations aériennes d'insecticides contre la tordeuse des bourgeons de l'épinette au Québec, en 1985.*
MICROLOG 88-00501 1 fiche

En 1985, dans le cadre du suivi environnemental des programmes de pulvérisation aériennes d'insecticides contre la tordeuse des bourgeons de l'épinette, le ministère de l'Enérgie et des Ressources a évaluer la dérive de l'insecticide biologique *Bacillus thuringiensis*, var. Kurstaki) par voie hydrographique. Cette étude avait pour objectif d'étudier le comportement du Bacillus thuringiensis dans l'eau des rivières et de vérifier sa présence plusieurs mois après la fin des pulvérisations.

Composites '86

Composites '86 (1986). Boucherville, Que. : National Research Council Canada, Industrial Materials Research Institute, 1987. 2 v. : ill. Bibliogr. *In Polymer Composites*: vol. 8, no. 5-6, 1987.
MICROLOG 88-04479 2 fiche (Available on fiche only)

The 6th symposium on polymer composites covered the solid state behaviour of advance, fiber-reinforced composites. The first part addresses the influence of interface on composite properties, interface characterization, and mechanism of fracture and delamination in advanced composites. The second part addresses the current status and future trends in the reinforced plastics, thermoplastics vs. thermosets in advanced composites, and the analysis and performance of composites and composite like materials.

Composition des résidus d'exploitation des arbres entiers et essais du prototype de la fragmenteuse-broyeuse de résidus (LRP)

par W. Novak. Ottawa : Institut canadien de recherches en génie forestier, 1986. v, 24 p. : ill. Bibliogr. (Rapport spécial ; RS-38) *L'éd. anglaise (The composition of full...) sur la même fiche.* ISSN 0706-8468
MICROLOG 88-00254 1 fiche

La fragmenteuse-broyeuse de résidus (LRP) a été développé pour ramasser et traiter les résidus d'exploitation d'arbres entiers à des fins énergétiques. Les résultats des premiers essais permettaient de conclure que nombreuses modifications étaient nécessaire pour amener la machine à un niveau commercial de production. De plus, le MER a accordé ce contrat en vue de mesurer les caractéristiques physiques des résidus issus de l'exploitation d'arbres entiers, et d'évaluer l'aspect économique de l'utilisation du LRP comme alternative au brûlage de ces résidus.

The Composition of full-tree logging residues and testing of the prototype Logging Residue Processor (LRP)

by W. Novak. Ottawa : Forest Engineering Research Institute of Canada, 1986. iv, 24 p. : ill. Bibliogr. (Special report ; SR-38) *French ed. (Composition des résidus...).*
ISSN 0381-7733
MICROLOG 88-00254 1 fiche

In the late 1970s, the Canadian Forestry Service implemented the ENFOR program to encourage the use of renewable sources of energy and to develop the necessary technology to recover forest biomass. In the early 1980s, methods of logging changed and the mass of residues from full-tree delimbing operation were mainly left on roadsides. A machine was developed to deal with logging site residues, and then modified to deal with roadside residues. This report deals with test results from the modified Logging Residue Processor as well as measuring the composition of full-tree residues and assessing the feasibility of using the LRP as an alternative to slash burning, a procedure used in Quebec.

Compte rendu de l'atelier sur la surveillance de l'utilisation des terres du 30 septembre au 3 octobre 1985, Ottawa, Ontario

rédacteurs, Paul C. Rump et Norah M. Hillary. Ottawa : Environnement Canada, Direction générale des terres, Programme de surveillance de l'utilisation des terres au Canada, 1987. x, 160 p. : ill. Bibliogr. (Série de l'utilisation des terres au Canada ; no 28) *L'éd. anglaise (Monitoring for change...) : 88-04025/2.* ISBN 0-662-94262-0
MICROLOG 88-04026 2 fiche

L'objectif général de cet atelier était d'encourager le dialogue, l'échange d'information et la collaboration de sorte que les activités de surveillance des terres puissent mieux contribuer à la prévention et à la résolution des conflits liés à l'utilisation du territoire. Ce document regroupe les exposés et les comptes rendus des ateliers présentés durant cette conférence. L'atelier s'est articulé autour de 3 grands thèmes: la recherche sur la surveillance de l'utilisation des terres et la dégradation de sols (problématique et objectifs); les méthodes et techniques de surveillance des changements d'utilisation des terre et de la dégradation des sols; et les stratégies de coopération.

Compte rendu de la Conférence des perspectives agricoles canadiennes, décembre 1987

Conférence des perspectives agricoles canadiennes (53e : 1987 : Ottawa, Ont.). Ottawa : Agriculture Canada, 1988. 252 p. (Analyse du marché) *L'éd. anglaise (Proceedings of the...) : 88-04167/3.*
MICROLOG 88-04168 3 fiche

La 53e Conférence des perspectives agricoles canadiennes a eu lieu à Ottawa, les 14 et 15 décembre 1987. Ce compte rendu donne les présentations de la 1re séance plénière sur le thème de la conférence: "L'agro-alimentaire: un secteur en évolution". Les conférenciers ont donné un aperçu de l'évolution de la structure de l'industrie agricole et ont examiné ses répercussions sur les orientations futures du secteur agro-alimentaire. Au cours de la 2e séance plénière, ils ont résumé les perspectives quant aux principaux produits primaires, aux revenus des agriculteurs et aux marchés et au commerce des aliments. Le compte rendu renferme aussi les communications présentées par les conférenciers invités.

A Computer model of the tilting pad journal bearing suitable for the micro-computer, part 2 : dynamic analysis

by K.R. Brockwell and S.N. Rogak. Ottawa National Research Council Canada, Division of Mechanical Engineering, 1987. vi, 55 p. : ill. Bibliogr. (Technical report ; TR-TM-005)
MICROLOG 88-04433 1 fiche (Available on fiche only)

Theoretical study on the steady state and dynamic behaviour of the tilting pad journal bearing. A computer model considers the entire bearing and allows for the inclusion of thermal and elastic distortions, variable viscosity, hot oil carry over and turbulence within the oil film. Part 1 of the study considered the steady state analysis and results were verified against five sets of independent data. This second report examines bearing dynamic behaviour and presents stiffness and damping coefficients for the five shoe, tilting pad journal bearing. The effects of changing bearing preload and direction of loading are illustrated. This report also describes the theoretical basis of the computer model and includes a full listing of the program.

A Computer vision system for matching 3-D range data objects

by N.N. Abdelmalek. Ottawa : National Research Council Canada, Division of Electrical Engineering, 1987. v, 98 p. : ill. Bibliogr.
MICROLOG 88-04440 2 fiche (Available on fiche only)

Report on an efficient global system for matching 3-D range data objects. The obtained invariant parameters used for matching purposes are functions of the object centroid coordinates, its volume, its base area, second-order central moments and standard deviations for the object surface and for the contour of the object base silhouette. A simple method is used to restrict the process to the model objects of the same surface type (convex or concave). A separate set of invariant parameters are calculated and stored into the matching library for each stable position for each used object. The matching system is tested on a number of objects including simulated ones, with and without added noise.

Concentrations d'insecticides chimiques détectées dans l'eau potable des bases d'opérations en 1985

par S. Delisle et R. Dostie. Québec : Ministère de l'énergie et des ressources, Direction de la conservation, 1986. iii, 10 p. Bibliogr. *Surveillance environnementale des pulvérisations aériennes d'insecticides contre la tordeuse des bourgeons de l'épinette au Québec, en 1985.*
MICROLOG 88-00505 1 fiche

En 1985, le ministère de l'Energie et des Ressources a réalisé un programme d'échantillonnage visant à détecter la présence de l'insecticide chimique dans l'eau potable des bases d'opérations de pulvérisations aériennes d'insecticides. Ce rapport fait état de l'échantillonnage réalisé sur les bases de Rivière-du-Loup, de Mont-Joli et de Bonaventure et présente les résultats obtenus.

Conception d'un modèle de prévision des flux interrégionaux de marchandises pour le Canada

par M. Los. Montréal : Université de Montréal, Centre de recherche sur les transports, 1980. 26 p. Bibliogr. (Publication ; no. 162) (Cahier ; no 8007)
MICROLOG 88-06434 1 fiche

La demande de transport de marchandises dépend à la fois des caractéristiques du système de transport de fret et des relations structurelles intersectorielles de l'économie. Dans ce document, on développe un cadre conceptuel et une méthodologie fondée sur la programmation mathématique pour prévoir au niveau spatial désagrégé les flux interrégionaux de marchandises au Canada ainsi que l'utilisation même du système de fret. L'approche choisie consiste à intégrer un modèle économique fondé sur la méthodologie 'input-output' et un modèle de transport (affectation-distribution-choix modal); de cette manière les effets de 'feedback' entre le système économique et le système de transport sont explicitement modélisés.

Conception d'un nouveau système de surveillance macrosismique

par A. Makuch. Ottawa : Energie, mines et ressources Canada, Centre canadien de la technologie des minéraux et de l'énergie, 1987. viii, 19 p. Bibliogr. (Publication spéciale de CANMET ; SP86-14F) ISBN 0-660-92171-5
MICROLOG 88-01171 1 fiche (Available on fiche only)

L'incidence récente des coups de toit dans la région minière de Sudbury, soit les 'effondrements de piliers' et des 'coups de faille', a mis en lumière le besoin d'analyses plus poussées dans le domaine des ondes sismiques provenant des coups de toit. Dans ce but, un système d'acquisition de données à haute résolution est requis, de façon à capter en temps réel l'ensemble des ondes sismiques provenant des sismographes. Ces ondes sismiques pourront ainsi être afichées directement sur l'écran de l'ordinateur pour analyse. Dans le cadre du projet de recherche Canada/Ontario/Industrie sur les coups de toit, il a été proposé de créer un 'système de surveillance macrosismique' qui sera installé aux mines Strathcona de la Falconbridge et Creigton de l'INCO, toutes deux dans la région de Sudbury. Le premier de ces deux systèmes sera installé à la mine Strathcona.

Concrete ties : measurement of rail impact forces from stationary drop tests and evaluation of resilient rail seat pads

prepared for Transport Canada, Transportation Development Centre ; J.F. Scott, A. Charenko. St. Laurent, Que. : CN Rail Research, 1985. x, 76 p. : ill. *TP 7352E.*
MICROLOG 88-00302 1 fiche

CN Rail's first major installation of concrete ties, 10,000 ties in 1972 on the Mountain Region, employed a soft rubber pad on the tie-rail seat. This type of pad tends to have a short life span and in later installations of concrete ties, to overcome such deficiencies as pad distortion and work hardening, a harder plastic pad was also used. The scope of this report is the development of a laboratory test method for measuring the impact force that is generated at the head of rail and measuring how much of this force is absorbed by the tie pad. Two tie pad types currently in use on CN concrete tie track, two tie pad types selected from those received for laboratory examination, and one of the above tie pad types modified to secure possible greater attenuation, were used.

La Condition des personnes âgées

par M. Baker. Ottawa : Bibliothèque du Parlement, Service de recherche, 1987. 40 p. Bibliogr. (Etude générale ; BP-164F) ISBN 0-660-92084-0
MICROLOG 88-01815 1 fiche

La condition socio-économique et politique des personnes âgées au Canada a considérablement changé depuis le 19e siècle. Dans ce document préparé à l'intention des parlementaires à Ottawa, on dégage certaines tendances de ce problème. La 1re partie examine les changements intervenus au 20e siècle et les effets de l'industrialisation. Dans la 2e partie, on décrit la situation actuelle des personnes âgées au Canada: tendances démographiques, éducation et emploi, revenus et consommation, santé, style de vie, attitude et variations dues à l'ethnie. Finalement, on fait la liste des programmes fédéraux et non fédéraux destinés aux personnes âgées en matière de soutien au revenu, d'information, de logement, de santé et services communautaires et de culture. Quelques comparaisons internationales sont faites.

MICROLOG 88-04419 2 fiche

Description of the conodont fauna from part of the Whittaker Formation exposed near Avalanche Lake, Northwest Territories. The taxonomic work provides detailed descriptions and illustations of almost 50 species belonging to 23 genera. One new genus and 5 new species are erected. The resulting taxonomic framework is used to provide a correlation with strata of this age in other sedimentary basins in Canada and elsewhere. Relative abundance data are used to indicate biofacies changes within the section. The difficulty of correlating faunas of this age from northwestern Canada with those from eastern Canada (e.g., Anticosti Basin) is discussed in terms of restricted oceanic circulation. This work is part of an ongoing study of the detailed correlation of Upper Ordovician and Lower Silurian strata in Canada, and provides an important framework for hydrocarbon and mineral exploration.

La Construction et la remise en état des routes à faible trafic : technologie et instrumentation

par P. De Montigny. Québec : Gouvernement du Québec, Ministère des transports, 1987. ii, 50 p. : ill. Bibliogr. (Etudes et recherches en transports) *En tête du titre: Technologie et instrumentation.* ISBN 2-550-17673-1
MICROLOG 88-03976 1 fiche

Le but de cette étude était de proposer aux concepteurs de projets routiers des méthodes concernant les données de base touchant la préparation de l'infrastructure, la détermination des épaisseurs des couches granulaires et la fabrication du revêtement. La 1re partie de ce document expose, à partir de quelques notions fondamentales de géo-technique routière, les principes qui doivent gouverner la conception des chaussées et propose une méthode simple de calcul des épaisseurs en regard du trafic et du sol de support. Elle décrit aussi la marche à suivre dans l'étude d'une chaussée en vue de sa réhabilitation. La 2e partie traite des revêtements et fait une évaluation comparative des revêtements à froid et des revêtements à chaud, faisant ressortir les avantages et les inconvénients de chacun.

Control of manipulators : an overview

by I.H. Mufti. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1984. vi, 22 p. Bibliogr. (Technical report ; TR-SYS-002)
MICROLOG 88-04468 1 fiche (Available on fiche only)

An industrial robot is a general purpose manipulator that consists of several rigid links connected together in the form of an open chain, each link being directly coupled to at most two neighbouring links. The robot can be used as a device for generating position of the last link or as a device for exerting forces on the objects being manipulated where 'position' means 'position and orientation' and 'force' means 'force and torque'. The most frequent task encountered in industrial practice is to transfer the tip of the last link of the manipulator from a given initial point to some desired final point in finite time. The point here belongs to a six-dimensional space representing the position of the last link of the manipulator. The control problem is to determine the joint forces that accomplish this task in some reasonable manner. This report reviews techniques based on inverse dynamics, and also those based on model reference and Popov's hyperstability theory.

Control of shift disturbances in the 64-ratio Ker-Train transmission

by J.R.G. Morrison and R.J. Ferguson. Kingston, Ont : Royal Military College, Dept. of Mechanical Engineering, 1986. vii, 18 p. Bibliogr. *TP 7965E.*
MICROLOG 88-00322 1 fiche

In automatic transmissions typically used in passenger cars, disc clutches are used to change the transmission from one kinematic configuration to another. There is no phasing problem in such a simple transmission because the shifting process only involves one element. In the 64-ratio Ker-Train transmission the situation is much more complicated and there is a need to control the operation of the clutches. In these experiments, the transmission was run on a test bed at 1500 rpm and an input torqe of 27.1 N.m. A computerized data acquisition system measured the instantaneous gear ratio during the shifting process. Only single increment shifts were examined. In the second phase of the research, an effort was made to eliminate shift disturbances.

Control of subsurface moisture : report on the use of sand-bentonite backfill

GE Ground Engineering Ltd.. Ottawa : Canada Mortgage and Housing Corporation, Policy, Research and Programs, Project Implementation Division, 1987. 19 p. : ill. Bibliogr.
MICROLOG 88-06471 1 fiche

Swelling/shrinking clay soils, particularly common in many parts of Western Canada, have often caused foundation problems due to excessive soil pressures on basement walls and uplift pressures on basement slabs. It was proposed that the use of an impervious backfill, such as a sand-bentonite mixture, would prevent such problems by reducing soil pressures and water infiltration around basements. A new concrete foundation was installed on bored piles under an existing dwelling being renovated in Regina. A suspended wood floor was used in place of a conventional basement slab, and sand-bentonite backfill was used in place of native clays. The perimenter drain tile system was eliminated. Soil pressures, backfill settlement and soil moisture profiles were monitored over a year.

MICROLOG 88-00800 1 fiche

The increase of refugee status claiming immigrants in Canada has led to a review of the immigration policy concerning this group. This report looks at the weaknesses of current legislation which is linked to the Geneva Convention and its Protocol, studying Canada's past adherence to the rights afforded under its protection. Also discusses public and government opinion on support for a humanitarian and generous refugee policy and questions of balancing efficiency with procedural fairness to claimants. Gives a chronology of events since 1969.

Convention sur l'élimination de toutes les formes de discrimination à l'égard des femmes : deuxième rapport du Canada

Ottawa : Secrétariat d'Etat du Canada, 1988. 148 p. : ill. Bibliogr. *L'éd. anglaise (Convention on the elimination...) : 88-03531/2. CSI 21120.214F.* ISBN 0-662-94744-4
MICROLOG 88-03532 2 fiche

La Convention sur l'élimination de toutes les formes de discrimination à l'égard des femmes est le principal instrument juridique international établissant des normes minimales pour l'égalité des sexes. Le Canada a ratifié la Convention en décembre 1981 et doit soumettre des rapports périodiques sur la mise en oeuvre de ce traité. Ce 2e rapport couvre la période de 1983 à 1988 et fournit, en premier lieu, des informations générales, une analyse statistique et une discussion des progrès et difficultés. Une 2e section traite des mesures adoptées par les gouvernements fédéral, provinciaux et territoriaux dans des sections rédigées par les divers gouvernements. Le document inclut le texte de la Convention.

Conventional oil resources of western Canada : light and medium

Ottawa : Geological Survey of Canada, 1988. xi, 149 p. : ill. Bibliogr. (Paper ; 87-26). *Contents: part 1, Resource endowment -- part 2, Economic analysis.* ISSN 0068-7650 ISBN 0-660-12650-8
MICROLOG 88-03320 2 fiche

Estimates of remaining conventional light and medium oil potential prepared in 1986 by the Geological Survey of Canada, based upon extensive geological, technical and statistical analysis of both present production areas and regions still to be fully explored. This information is used to develop an estimate of future resources expressed in terms of probability. An economic analysis determines the relationship between the wellhead price of oil and the long-term profitability of the undiscovered resources under a set of technical, cost and fiscal assumptions.

The Conversion of methane over selected solid catalysts : final report

by W.E. Lewis. Sheridan Park, Ont. : Petro-Canada Products, Research and Development, 1988. 26, 28 p. Bibliogr. *CANMET contract: OSQ 85-00167*
MICROLOG 88-00762 2 fiche

Since Canada is rich in natural gas resources, there is a strong incentive to develop processing schemes for converting its major constituent, methane, into higher molecular weight hydrocarbons which are preferably in the gasoline boiling range. This report presents information on some of the approaches which have been tried, including pyrolitic methane conversion, oxidative coupling, aluminosilicate catalysts, and superacid catalysts for direct conversion of methane, and microreactor scale studies evaluating a number of catalysts for the conversion of methane or methane/olefin mixtures to higher hydrocarbons. A number of catalysts were prepared by the metal salt impregnation procedure, including silica supported nickel catalysts, alumina and zeolite supported nickel catalysts, metal oxide catalysts, and zeolite supported gallium/nickel catalysts.

Conversion of synthesis gas to distillate over ironborosilicate zeolites : final report

by K. Leen and J.R. Chang. Sainte-Foy, Que. : Centre de recherche industrielle du Québec, 1988. vi, 136 p. Bibliogr. *CANMET contract: 6-9035/01-SQ.*
MICROLOG 88-05986 2 fiche

Report on the modification of a proprietary multi-functional cystalline ironborosilicate zeolite (ZKQ-IB4A) to maximize premium grade diesel production from synthesis gas. Following a brief review of the pertinent literature on the various metals employed in modifying the base zeolite, the methods used in incorporating such metals are fully described and the characterization results are presented and discussed. Twelve catalysts prepared by modifying the ZKQ-IB4A base zeolite with sodium, cobalt and lanthanum, ruthenium and zinc were each tested in a small fixed-bed tubular reactor for 366 hours. The effect of preoxidising the catalyst and the use of Sterotex as a lubricant for facilitating pelletisation of the catalyst on catalytic activity and selectivity is discussed.

Core French in eastern Ontario high schools

by F. Morrison and C. Pawley. Toronto : Ministry of Education, 1987. ix, 65 p. : ill. Bibliogr. *ONTERIS ON 03711.* ISBN 0-7729-2789-8
MICROLOG 88-02286 1 fiche

This study has been carried out under a contract with the Ministry of Education, Ontario. The contract called for testing of the French proficiency of students in core French programs at the Grade 9, 10, and 12 levels in Ottawa and Carleton and in other boards with different core programs. In the 1985-86 school year the Grade 9 students represented the first group taking a required core French course under the new high school diploma requirements for the Intermediate and Senior Divisions (OS:IS, Ministry of Education, Ontario, 1984). The students at the higher grade levels were continuing under the previous regulations, which did not require students to have a credit in French in order to obtain a secondary school graduation certificate.

Cost allocation in combinatorial optimization problems : the TSP case

by M. Dror and J.A. Ferland. Montreal : Université de Montréal, Centre de recherche sur les transports, 1985. 13 p. Bibliogr. (Publication ; no. 435) (Publication ; no. 547)
MICROLOG 88-00533 1 fiche

The Travelling Salesman Problem is the problem of constructing the shortest simple circuit passing through a given set of connected nodes. This paper does not address the problem directly, but examines a derivative of it and extends this study to other related combinatorial problems. This paper is concerned with "cost" allocation in TSP solutions, i.e., given an optimal solution of a TSP, what share of the total length of this solution should be attributed to an individual element-node of the problem? An attempt is also made to sketch appropriate extensions of the results presented here to some other combinatorial optimization problems.

Cost estimates and implications of the effluent monitoring, general and effluent monitoring, petroleum refining sector : regulations for Ontario's petroleum refineries

Toronto : Corporate Resources Division, Policy and Planning Branch, Socio-Economic Section, 1988. iii, 38 p. Bibliogr.
MICROLOG 88-05385 1 fiche

The Ontario Ministry of the Environment has launched the Municipal/Industrial Strategy for Abatement to achieve the virtual elimination of toxic contaminants in municipal and industrial discharge into waterways. The first monitoring regulation applied to all 7 Ontario petroleum refineries. This investigation is part of the total economic assessment component of the MISA program and presents estimates of the magnitudes of the incremental costs on the petroleum industry of the requirements in the effluent Monitoring Regulations. The costs of the monitoring functions that were estimated to be the most cost effective for each individual refinery were used and financial data were available to determine economic impacts of the monitoring costs on 5 out of 6 petroleum firms which operate refineries in Ontario. After a review of an initial draft of this report, the petroleum companies submitted estimates of the costs of complying with the regulations. Industry representatives also provided comments.

Cost-reducing methods for installing residential ground-source heat pumps : report

to the Ministry of Energy ; prepared by Ontario Hydro, Research Division ; principal investigators, F.J. Lenarduzzi, C.B.H. Cragg, D.J. Young. Toronto : Ministry of Energy, 1986. vi, 75 p. : ill. Bibliogr.
MICROLOG 88-04884 1 fiche

Ground-source heat pumps can provide customers with space- and water-heating energy at as little as one-third the cost of conventional energy sources. Many competing drilling methods adapted from other applications are being used for pump installation. This study evaluates almost all available methods and concludes that there are major savings to be had by selecting the proper rig for the local conditions. It also examines the cost-reduction potential of new ground-source technologies, including changes in the design and sizing of present heat pump equipment.

Crack propagation in tough ductile materials, phase I

by R.D. Venter, A.N. Sinclair and D. McCammond. Ottawa : Atomic Energy Control Board, 1987. 73 p. : ill. Bibliogr. (Research report : INFO-0254-1)
MICROLOG 88-01852 1 fiche

Describes the J-resistance curves obtained as a function of crack extension for two representative tough ductile materials, ASTM516 grade 70 and SA106 grade B pipe steel. The results were obtained using the ASTM standard method for determining J-R curves, E24.08, 12th Draft, 25th July, 1985. Both compact tension and three point bend tests were employed for the plate steel tests; only compact conditions using specimens of different thickness and cut from known orientations within the parent material.

Creating fuel oil from sewage sludge

Burlington, Ont. : Environment Canada, Wastewater Technology Centre, 1988. 3, 3 p. (Environmental technology notes) *Bilingual (La production de mazout...).*
MICROLOG 88-04804 1 fiche

Sewage sludge is a by-product of the wastewater treatment processes used to render industrial and municipal wastewaters less harmful to the environment. This note describes a process, based on a technology developed in Germany, in which dried sludge is heated to 300-350C for about 30 minutes in an oxygen-free environment, producing oil, char, reaction water and noncondensible gas, the oil being the main product. Laboratory-scale batch and continual reactor tests of the conversion process were conducted, testing different sewage from Canada, the United States and England.

Creating jobs in the private sector : evidence from the Canadian Employment Tax Credit Program

by S. Gera. Ottawa : Economic Council of Canada, 1988. ix, 88 p. : ill. Bibliogr. *French ed. (La création d'emplois...) : 88-05234/2. CSI 22215.208.* ISBN 0-660-12723-7
MICROLOG 88-04945 2 fiche

From the mid 1970s to the mid 1980s, direct job creation programs have grown in Canada to provide jobs for both the structurally and cyclically unemployed. The Canadian Employment Tax Credit Program (ETCP), was a temporary wage subsidy scheme, offering tax credits of up to $2.00 an hour, designed to stimulate incremental employment in all Canadian regions. This study conducts a comprehensive empirical evaluation of the 1978-81 ETCP with three objectives: to evaluate the efficiency of the program in terms of the social benefits and social costs it generated; to determine the net or incremental employment effect of the ETCP; and to discuss improvements for the employment prospects of program participants.

(819) 770-9928 FAX (819) 770-9265

that will provide effective long-term resistance attack by fungi, insects, and marine borers. The chemical predominantly used in Canada for wood preservation are pentachlorophenol, creosote, and aqueous formulations of arsenic, copper, chromium or ammonia. The wood preservation process deposits or fixes these chemicals in the wood, and the toxic nature of the chemicals effectively prevents the attack of living organisms on the wood. Because the chemicals are also toxic in varying degrees to humans and aquatic organisms, their use in industry must be carefully controlled. This document is intended to provide consistent guidelines for the design and operation of wood preservation facilities in a manner that will protect workers and the environment from harmful exposure to wood preservation chemicals

Culture density and size effects on performance to release of juvenile chinook salmon and subsequent ocean survival : smolt releases from Capilano hatchery in 1980 and 1981

by U.H.M. Fagerlund...et al. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1987. vi, 24 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1572) ISSN 0706-6457
MICROLOG 88-02923 1 fiche

Population density has been shown to affect both feral fish and fish under cultivation. For fish under cultivation, higher densities affect both social demands and the quality of the physical environment, thereby affecting growth rate, body composition, food conversion efficiency, interrenal activity and osmoregulatory capacity of juveniles and return rates of "jacks" and adults. This report describes studies of density effects on chinook salmon reared in a cold water hatchery.

Culture of chinook salmon *Oncorhynchus tshawystcha* in iron-rich groundwater : Stuart Pilot Hatchery experiences, 1981-83

by D.D. MacKinlay...et al. Vancouver, B.C. : Dept. of Fisheries and Oceans, Salmonid Enhancement Program, 1987. v, 45 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1944) ISSN 0706-6473
MICROLOG 88-01596 1 fiche

Chinook salmon were cultured at a pilot hatchery located in Fort Saint James, British Columbia, during 1981 and 1982-3 to test the suitability of the water from a deep, artesian well as a potential source for an enhancement facility to serve local stocks. The water is anoxic and has an iron content averaging 0.5 mg/L, which produces a heavy, red-brown flocculant when it is aerated. A simple filtration system to effectively decrease the iron floc in the hatchery water was developed and tagged fish of two sizes were released to determine overall and comparative survival to adult.

Cumulative seriation and ceramic formula dating : a preliminary study

by R.T. Grange. Ottawa : Dept. of Indian and Northern Affairs. Parks Canada, National Historic Parks and Sites Branch, 1977. 120 p. : ill. Bibliogr. (History and archaeology ; 16) (Histoire et archéologie ; 16) ISBN 0-660-01424-6
MICROLOG 88-04054 2 fiche

Cumulative seriation is a graphic method which permits long site occupation spans, overlapping site occupations and known ceramic type periods of manufacture to be taken into account simultaneously in the construction of seriation graphs for historic sites of known occupation date. Cumulative seriation is not designed to reveal chronology since that is already known. It is instead intended to produce more accurate diagrams of relative popularity of ceramic types than is possible by standard seriation technique. Cumulative seriation diagrams for several historic ceramic types are discussed and dates of peak popularity are estimated. The results are tested by the application of such modal dates in South's mean ceramic dating formula.

Curriculum in the schools of British Columbia

by D.F. Robitaille...et al. Victoria : British Columbia Royal Commission on Education, 1988. iii, 73 p. (Commissioned papers : v. 3) ISSN 0840-5069 ISBN 0-7726-0841-5
MICROLOG 88-05796 1 fiche

This report introduces a three-dimensional model which was developed for this study. Analysis of the current status of the school curriculum in British Columbia is presented and is followed by a discussion of the recommended re-structuring of that curriculum. Also discussed are major issues which the educational system is currently facing; a number of suggestions for change are made. Finally, the paper indicates how the suggestions made might be phased in over a period of time.

Cyprus Crustal Study Project : initial report, holes CY-2 and 2a

edited by P.T. Robinson, I.L. Gibson and A. Panayiotou. Ottawa : Geological Survey of Canada, 1987. 381 p. : ill. Bibliogr. (Paper : 85-29) *Folding lithographic logs not filmed.*
ISSN 0068-7650 ISBN 0-660-12672-9
MICROLOG 88-02278 4 fiche

Because they are portions of the ancient oceanic lithosphere, ophiolites present a full stratigraphy of the oceanic crust and part of the earth's upper mantle. The Cyprus Crustal Study Project to investigate the Troodos ophiolite was approved in 1980 and was conceived as an integrated petrological, structural and geophysical study, involving both field mapping and diamond drilling. From 1980-82, field studies were started and drilling begun, continuing until March 1985 at three sites, at which 5 holes were drilled. This report presents a series of papers, with abstracts, on various aspects of the Project, including field relations, lithological description, petrography and mineralogy, geochemistry, paleomagnetic and rock magnetic properties, physical properties and other geophysical data, and a summary, data tables and core log description.

Darlington GS : evaluation of waiting period for concrete monoliths

by P.K. Mukherjee. Toronto : Ontario Hydro, Research Division, 1987. 12 p. : ill. Bibliogr. (Report ; no. 87-56-K)
MICROLOG 88-01735 1 fiche

The Darlington Generating Station construction specification requires that a filler monolith be placed only after the adjacent monolith have cooled to within 6C of the ambient temperature, to minimize thermal cracking, sometimes resulting in a long waiting period. A question was raised whether or not the requirement of a 6C differential could be raised to a higher value, thus saving in construction time. A limited field stuy was initiated to determine the effect on the concrete of changing the placing criterion from 6C to 12C. This report describes observations made on a few placements.

Darlington Leak Before Break material test program J-resistance curves, volume 1 : general summary : discussion of results and conclusions

by B. Mukherjee and D.W. Carpenter. Toronto : Ontario Hydro, Research Division, 1987. viii, 98 p. : ill. Bibliogr. (Report ; no. 87-232-K)
MICROLOG 88-01725 2 fiche

The Darlington Leak Before Break approach was developed for large diameter (21, 22, 24 inch) SA106B heat transport piping and A105 fittings as a design alternative to pipewhip restraints. To assess the stability of heat transport piping in the presence of hypothetical flaws, the material value of the J-integral associated with crack extension must be known. In this test program, J-R curves were determined from actual pipe heats used in the construction of the Darlington heat transport systems (Units 1 and 2). Test blocks were prepared using 4 different welding procedures for nuclear Class I piping. Two SA105 vesselet forgings were also tested. The test program was designed to take into account the effect of test temperature, crack plane orientation, welding which has influence on fracture properties, and to identify those factors which tend to lower the resistance curves.

Darlington Leak Before Break (LBB) J-resistance curve-test verification program

by B. Mukherjee. Toronto : Ontario Hydro, Research Division, 1987. ii, 93 p. : ill. (Report ; no. 87-262-K)
MICROLOG 88-02030 2 fiche

Ontario Hydro has developed a leak-before-break methodology, based on the J/T method, for application to the large diameter heat transport piping for Darlington Nuclear Generating Station A as a design alternative to pipewhip restraints and in recognition of the questionable benefits of providing such restraints. Tests were conducted in this program, based on actual large diameter heat transport piping, forgings, associated welds and heat affects zones. Because of the importance of the material tests results, it was decided to validate the material test method by comparing 6 test results against tests conducted by an independent laboratory, Materials Engineering Associates of Lanham, Maryland, selected because of their experience in conducting single specimen J-resistance curve tests for the U.S. Nuclear Regulatory Commission and the Electric Power Research Institute. This report compares the tests programs and the results.

Darlington Leak Before Break (LBB) material test program, J-resistance curves, volume 2 : test methods and results

by B. Mukherjee and D.W. Carpenter. Toronto : Ontario Hydro, Research Division, 1987. iii, 798 p. : ill. Bibliogr. (Report ; no. 87-103-K)
MICROLOG 88-02026 9 fiche

The Darlington Leak Before Break approach has been developed for large diameter (21, 22, 24 inch) SA106B heat transport seamless piping because of the difficulties encountered in attempting to provide pipewhip restraints and in recognition of the questionable benefits of providing such restraints. Ontario Hydro's LBB approach is based on elastic plastic fracture mechanics method. In order to assess the stability of HT piping in the presence of hypothetical flaws, the material value of J associated with crack extension, which is also known as a material resistance curve or a J-R curve, must be known. In this test program, J-R curves were determined from actual pipe heats that were used in the construction of the Darlington heat transport systems (Units 1 and 2). Welded specimen test blocks were prepared using the four different welding procedures employed for nuclear Class I piping. Two SA105 vesselet forgings were also tested.

Data analysis and report preparation on a bioenergy self-sufficient system

Ensyn Engineering Associates Inc.. Ottawa : Energy Mines and Resources Canada, Renewable Energy Branch, Bioenergy Division, Bioenergy Development Program, 1987. x, 45 p. Bibliogr. ISBN 0-662-16420-2
MICROLOG 88-06249 1 fiche

A research, development and demonstration project initiated in 1978 was not completed. Although some preliminary data had been collected, the main body of the project work was to be carried out after the integrated sawmill-residue/energy plant had achieved routine, stable operation of all components at full rated capacity. The information contained in this report was obtained from a variety of sources, roughly 5 years after termination of the mill operation upon which the original ENFOR project was based. While some economic information was obtained, the lack of complete cost data, the unusual economic conditions that prevailed, and the significant time lapse since the project termination preclude the development of any economic analyses of value.

A Data package for the validation of a computer model of the CCRL tunnel furnace facility

by P.M.J. Hughes. Ottawa : Energy Research Laboratories, 1988. xiii, 202 p. : ill. Bibliogr. (CANMET report ; 87-4E) ISBN 0-660-12727-X
MICROLOG 88-02643 3 fiche (Available on fiche only)

This report describes the results of a variety of experiments undertaken in the CANMET Combustion and Carbonization Research Laboratory (CCRL) tunnel furnace facility for the generation of a data package. This data package is to be used for the validation of sophisticated computer codes that are capable of predicting the conditions inside the furnace during combustion. The report describes several experiments in the tunnel furnace in which low- and high-volatile coals were burned at two swirl settings and compared to oil. Also described are the measurement techniques and the reliability of the data. The data presented in this report make it possible to compare measured and predicted values for most of the information available from currently used computer codes.

Data record of adult sockeye salmon and other fish species captured by purse seine in Queen Charlotte Strait, Johnstone Strait and the Strait of Georgia in 1985 and 1986

by K. Cooke...et al. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iii, 29 p. : maps. Bibliogr. (Canadian data report of fisheries and aquatic sciences ; no. 680) ISSN 0706-6465
MICROLOG 88-04395 1 fiche

Summary of catch information on the distribution of adult sockeye salmon and other fish species captured by purse seine in Queen Charlotte and Johnstone Straits and the Strait of Georgia during July and August, 1985 and July through September, 1986. The collections form part of a study initiated in 1982 to investigate migratory patterns of sockeye salmon of Fraser River origin. The survey program was designed to provide information on the vertical and horizontal distributions and movements of adult sockeye salmon migrating through nearshore waters by hydroacoustic assessment of relative abundance of fish stocks and radio telemetry studies of individual fish movements. Samples were also collected for stock identification using parasite analysis and scale characteristics. Feeding behaviour of homeward migrating sockeye salmon was studied using stomach content analysis.

Data report on benthic sampling on artificial island at Campbell River estuary, 1982-86

by P.M. Riley...et al. West Vancouver, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, West Vancouver Laboratory, 1987. xi, 69 p. (Canadian data report of fisheries and aquatic sciences ; no. 659) ISSN 0706-6465
MICROLOG 88-02918 1 fiche

Campbell River, on the east coast of Vancouver Island, is a major salmon producing area and the estuary has been actively utilized by various industries. The Campbell River estuary rehabilitation project was initiated with the construction of intertidal marsh islands from 1981-82, followed by marsh establishment with the planting of cores consisting of 2 dominant species, the construction of a dryland log sorting facility and the removal of debris and bark from those areas usually used for sorting. Coordinated studies for 1982-86 were developed to help evaluate the biological responses to estuarine rehabilitation. This report presents data from the study of benthic invertebrate communities from islands 1-4 (artificial) and Nunn's Island (reference).

Day care licensing policy manual

Alberta. Alberta Social Services. Edmonton : The Services, 1987. 189 p.
MICROLOG 88-02578 2 fiche

This manual provides approved policy interpretations of the requirements of the Social Care Facilities Licensing Act and Day Care Regulations which came into effect in November 1987. It outlines licensing standards in order to increase greater consistency in the application of licensing provisions across the province. The first part of the guide covers day care facilities, foster homes and special care facilities, and the latter section refers to policies affecting day care centres, nursery schools and licensed family day homes. Contains definitions of terms and guidelines to licensing requirements, the licensing process, inspections of facilities, enforcement measures, appeal process, non-compliance action, regulation amendments, service of notices or orders, and awards of court costs for appeals. In reference to physical requirements for facilities the manual outlines standards for accommodation, furnishings and equipment, cribs, cots, beds and sleeping mats, and outdoor playspace. Also outlines standards for programs catering to social, physical, intellectual, creative, emotional, and self-concept development, as well as provisions for emergency situations, health standards, nutrition and food service standards, and staffing standards.

Les Déchets hautement radioactifs au Canada : la onzième heure a sonné

Canada. Parlement. Chambre des communes. Comité permanent de l'environnement et des ressources. Ottawa : le Comité, 1988. v, 47, v, 45 p. *Bilingue (High-level radioactive...).*
MICROLOG 88-04421 2 fiche

L'épineuse question de l'entreposage des déchets hautement radioactifs est l'une de celles dont l'issue soulève le plus d'interrogations. A la fin de 1987, environ 12 400 tonnes de combustible irradié étaient stockées dans les centrales nucléaires du Canada. Tout cela prend une grande importance lorsque l'on considère qu'il n'existe pas encore de méthodes éprouvées pour éliminer ces produits hautement radioactifs. Aussi, après avoir entendu 9 groupes de témoins et visité les installations de l'Etablissement de recherche nucléaire de Whiteshell au Manitoba, le Comité présente une analyse du problème, ainsi qu'une série de recommandations. Traite entre autres des sujets suivants: la radioactivité et la radioprotection, la nature et les dangers des déchets de combustible nucléaire, ainsi que le programme canadien de gestion du combustible nucléaire irradié.

The Declining middle and technological change : trends in the distribution of employment income in Canada, 1971-84

by N. Leckie. Ottawa : Economic Council of Canada, 1988. xi, 100 p. : ill. Bibliogr. (Discussion paper ; no. 342) ISSN 0225-8013
MICROLOG 88-02306 2 fiche (Available on fiche only)

The primary goal of this paper was to assess the view that technological change was leading to a declining middle class. It was suggested that the new technologies create both higher-skilled, better paid jobs and lower-skilled, poorly paid jobs while depleting mid-level incomes and skills. Exacerbating this problem was the so-called de-industrialization phenomenon, a process involving employment shifts from the better-paid manufacturing sector to the allegedly lower-skilled, lower wage service sector. Also, changes in the demographic structure -- particularly the influx of low-paid youth and women and the greater utilization of part-time employment -- were contributing to greater income polarization. Through standardization techniques, this paper seeks to disentangle and gauge the impact of these various changes on the size of the middle class and other measures of income disparity. The accent on technological change led to the choice of employment income as the object of analysis.

Decrement in postural control during mild hypobaric hypoxia

by D.E. Eastman...et al. 1987. p. 768-772 Bibliogr. *In Aviation, Space, and Environmental Medicine*: vol. 58, 1987.
MICROLOG 88-01822 1 fiche

The assessment of postural control, as measured by total postural sway, is a sensitive indicator of the direct effects of hyperbaric exposure and alcohol on the central nervous system. In spite of the importance of the vestibular and postural control systems to pilot performance and flying safety, few studies have addressed the effects of mild hypoxia on vestibular end-organ and central nervous system processing of postural control input and output. This study addresses the effects of mild hypoxia on the postular control system of 39 naive subjects by measuring the postural sway with a Kistler force platform, at ground level and at 1 of 4 simulated altitudes: 1,521 m, 2,438 m, 3,048 m, and 3,658 m.

Degradation of magnesia-carbon bricks in argon atmosphere at high temperature

by S.S.B. Wang, D.H.H. Quon and J. Aota Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 24 p. : ill. Bibliogr. (Report ; MSL 87-152(IR)) *Project 30.29.05 electrodes and refractories for steelmaking.*
MICROLOG 88-02656 1 fiche

Magnesia-carbon (MgO-C) bricks were used mainly in converter lining and electric arc furnaces prior to 1978, but have now increased significantly for other steel making applications. As part of the continuing effort to examine the refractory degradation in steelmaking, this study evaluates the performance of the bricks in contact with secondary steelmaking slags and assesses their applicability in argon environments in the ladle. An examination is made of the structural and chemical profiles of 4 types of MgO-C bricks in contact with high and low calcium slags at 1650C in an argon atmosphere.

Demand for non-profit housing in Ottawa-Carleton, 1987

Ottawa : Regional Municipality of Ottawa-Carleton, Planning Dept., 1988. vii, 52 p. : ill.
MICROLOG 88-04217 1 fiche

In 1987, the Planning Dept. surveyed the demand for non-profit housing in the urban part of Ottawa-Carleton. The demand was estimated by analyzing the results of a survey mailed to over 16,500 households. The results are presented for: different types of households (seniors, rental households with and without children) requiring different subsidy levels based on income and household size, and for each municipality as well as the urban part of the region as a whole. This report will form an appendix to the Regional Housing Statement which will examine all aspects of the housing market in the region.

La Demande d'essence au Québec : une étude des formes fonctionnelles

par L. Di Pietro. Montréal Université de Montréal, Centre de recherche sur les transports, 1979. 112 p. Bibliogr (Publication ; no. 154)
MICROLOG 88-06426 2 fiche

Recherche ayant pour objectif l'étude de la détermination conjointe de la forme fonctionnelle et de la spécification de l'erreur pour une fonction économique spécifique. Les transformations paramétriques Box-Cox à puissance directe et inverse appliquées à la partie stochastique du modèle permettent de déterminer une forme fonctionnelle de l'hétéroscédasticité des résidus extrêmement générale. Le modèle présenté utilise les séries chronologiques et de ce fait, la procédure Box-Cox appliquée aux parties fixe et stochastique du modèle est généralisée à une structure d'autocorrélation des résidus d'ordre multiple. L'échantillon utilisé pour la fonction de demande d'essence est constitué de données mensuelles pour la période de décembre 1956 à 1977.

Demonstration and evaluation of blast casting in a producing Canadian surface coal mine : final report

Fording Coal Mine Company. S.l. : Fording Coal Limited, 1988. xiii, 113 p. : ill., maps. *CANMET contract: 6-9022/01/SQ.*
MICROLOG 88-05985 2 fiche

Report on testing program, technical review and data compilation of blast casting in a producing surface coal mine (Fording Coal, British Columbia). The technical review included a literature search, a site visit to 2 operating mines in Colorado, and site visits to the Fording mine, and established preliminary designs for the primary blast sites. The testing program, consisting of 9 blasts, began in the fall of 1986, during which 3 cases of blast casts dependent on physical geometry were evaluated (casting hanging wall waste of steeply dipping seams, topographic blast casting, casting waste into mined-out cuts). During the data analysis, a review of the parameters affecting blast casting was done; blast cast report including introduction, general design information, pattern design information and analysis were produced; and a sensitivity analysis on swell factor, percentage cast for conventional production blasts, drilling cost, explosive costs, and equipment operating costs was conducted.

Démonstrations publiques nord-américaines de la télévision à haute définition : résumé des résultats du sondage

par S.J. Lupker, N.J. Allen et P.J. Hearty. S.l. : Comité pour les démonstrations publiques nord-américaines de TVHD, 1988. 15 p. Bibliogr. *L'éd. anglaise (The North American public...) sur la même fiche.* ISBN 0-662-94933-1
MICROLOG 88-03798 1 fiche

En octobre 1987, près de 7000 observateurs provenant du grand public et de groupes d'intérêts particuliers dans plusieurs villes nord-américaines ont eu l'occasion d'assister pour la première fois à une démonstration de télévision à haute définition et de livrer leurs impressions sur cette technologie. Ce rapport contient le résumé des résultats du sondage réalisé à ce moment. Inclut des informations sur les méthodes, l'élaboration du questionnaire, le matériel utilisé, l'aménagement des lieux et le choix des participants. Présente aussi le sommaire des résultats et leur incidence sur cette nouvelle technologie.

Dense friction course evaluation : 1978 to 1983 contracts

by R.F. McLuckie, P. Korgemagi and D.F. Lynch. Toronto : Engineering Materials Office, Bituminous Section, 1988. v, 90 p. : ill. (Materials information report ; MI-107) ISBN 0-7729-4226-9
MICROLOG 88-04863 2 fiche

In 1974, a series of bituminous test sections were installed on the Highway 401, consisting of open graded and dense graded mixes using a variety of aggregates. Dense friction course mixes are dense graded mixes providing high frictional resistance and containing 45% by mass retained on the 4.75 mm sieve. A change was later made to 55% retained which led to maintenance complaints and a return to the 45% standard. This report resolves the issue of percentage retained 4.75 mm sieve in DFC by documenting the history of development of DFC in Ontario, performance history of both 45/55 and 55/45 mixes, current maintenance procedures and problems on both mix types, and recommendations for future action.

Dense media separation of potash ore using tri-flo dense media separation : Saskatchewan Mineral Development Agreement (50/50 cost shared)

Cominco Fertilizer. Potash Operations. Vanscoy, Sask. : 1987. 155 p. : ill. *CANMET contract: 6-9123-01-SQ.*
MICROLOG 88-01568 2 fiche

Heavy Media Separation (HMS) is a process whereby ore particles of differing specific gravities can be separated by immersing them in a liquid or slurry (media) having a specific gravity between those of the particles being separated. This report presents the results of work done to ascertain whether HMS would be suitable for Saskatoon area ores, to observe and evaluate the performance of small batch, Tri-Flo separator on Saskatoon area potash ore; and to determine the liberation characteristics of potash ore at various points in the concentration circuits, prior to flotation, in an effort to determine the most suitable feed material for a HMS circuit.

Derivation of the ventilation recirculation equations relevant to underground dieselized mines

by E.D. Dainty. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. i, 9 p. : ill. (Report ; MRL 87-157(TR))
MICROLOG 88-03389 1 fiche

Canadian mines operate with the additional considerable expense of mine air heating, usually by propane heaters, during the winter season, to make a suitable workplace. Recirculation of the already heated, used mine air would significantly reduce this expenditure. Linking of the exhaust air and intake air shafts with a horizontal heading in which a fan and control equipment can be installed to effect the required recirculation flow could be done although in dieselized workings this means that the recirculated air would contain a level of pollutants. The following derives expression to recirculating flow in these circumstances, using the CANMET Air Quality Index (AQI) as the criterion for air quality acceptability.

Design and testing of a prototype rock separator for sortyard debris

by M.A. Pottie and A.W.J. Sinclair. Ottawa Pacific Forestry Centre, 1987. 16 p. (Information report ; BC-X-292) (FERIC special report ; no. SR-41) ISSN 0830-0453 ISBN 0-662-15664-1
MICROLOG 88-00715 1 fiche

Field tests were conducted in early 1986 at Nicholson Murdie Machine Limited at Victoria, British Columbia, on a prototype rock separator system. The rock separator consisted of a rubber belt conveyor built so that belt speed, side tile, and slope could be readily adjusted. In earlier projects on biomass processing, it was observed that rocks separated from woody material when rubber belt conveyors were operated at nonstandard slopes and belt speeds. These tests were conducted to determine rock-removal efficiency when a flat, rubber belt conveyor was operated with a side tilt and at belt speeds and slopes above those normally recommended for transport of wood waste.

The Design of a western Canadian real-time system for integrated forecasting of basin specific floods and low flows -- Rev

by J. Whiting and E.E. Wheaton. Regina : Saskatchewan Research Council, 1987. xiv, 108 p. : ill. Bibliogr. (SRC technical report ; no. 195) (SRC publication : no. E-905-6-B-87)
MICROLOG 88-02197 2 fiche

While the Atmospheric Environment Services and other agencies collect and archive a great deal of site-specific information on rainfall values and temperature, a system has not yet been developed to take full advantage of all the avaiable non-standard and non-AES climatological data, nor the AES radar and remote sensing data. As a first step, there is a requirement to identify the characteristic of such a system and to assess what is needed to make such a system successful. This study suggests the directions and the information required to fulfill the data needs and to create the system. In addition, the study results could serve as the basis for an action plan to be carried out over the next 2-3 years and the development of an integrated watershed hydrometeorologic data base for water resource managers in Western and Northern Canada.

Design of an intrinsically safe instrument package for a portable gas chromatograph : final report

by M.A. Dencer. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. viii, 139 p. : ill. *CANMET contract: 7-9020/01SQ.*
MICROLOG 88-06046 2 fiche

Tracer gas measurement in gaseous coal mines where consistent ventilation is a serious problem is both important and useful. To date, trace gas measurements have been limited to time-consuming grab sample techniques with later laboratory analysis requiring one or more days for all samples to be processed. The Cape Breton Coal Research Laboratory has developed a rapid sequential tracer gas analyzer for determining trace levels of SF6 in the air which has been successfully tested in uranium mines but not in a coal mine, which has stricter safety regulations. This report outlines the work undertaken to identify suitable intrinsically safe compounds and all applicable safety standards of the qualification process through a survey of vendors.

Design of multiple-vehicles delivery tours satisfying duration constraints

by A. Langevin and F. Soumis. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. 24 p. Bibliogr. (Publication ; no. 513A)
MICROLOG 88-00026 1 fiche

This paper studies how to determine zones in such a way as to obtain the greatest efficiency of transportation. In the problem under consideration, each vehicle, in a fixed period of time, starts from a central depot (where the sorting center is located), travels to its assigned zone to do the pick-up and delivery of letters or parcels (delivers whatever was picked up during the previous period) and returns to the depot for the sorting of the material picked up. Due to the small number of letters and parcels that a vehicle can collect in a given period, no constraints of capacity on the vehicles are considered. The model applies to the delivery of letters and small parcels in an urban area, a market which has had a terrific growth in the past five years in North America.

Design, build, and evaluate the Forintek moisture sensor for measuring on-line moisture content (MC) in unseasoned lumber and hog fuel

by S.R. Warren, G. Troughton and M. Ward. Ottawa : Energy, Mines and Resources Canada, Renewable Energy Branch, 1987. xi, 31 p. : ill. Bibliogr.
MICROLOG 88-06248 1 fiche

A new plant prototype moisture sensor was designed, built and tested for sorting unseasoned lumber on a commercial scale and to measure the moisture content of hog fuel to ascertain the daily, weekly and monthly fluctuations for boiler operations in the pulp plants. A preliminary mill trial for sorting lumber was conducted at the Weldwood plant (Williams Lake) on November 14 and 15, 1986, to establish the economics of sorting and whether the mill should proceed with a commercial run. The daily, weekly and monthly fluctuations of the hog fuel indicated that the moisture sensor could be used in pulp mills to monitor boiler operations.

Designing and comparing air traffic control consoles

by B.A.M. Turpin...et al. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1987. v, 34 p. : ill. (Technical report ; TR-SYS-013)
MICROLOG 88-04439 1 fiche (Available on fiche only)

In designing a workstation one must consider several factors which invariably affect the performance of the operator. While an operator's cognitive and motor capabilities appear to be unlimited, the total amount of information impinging upon the individual at a given time may actually exceed these capabilities. To this end, assessing human capabilities for a given task, optimimizing the use of cognitive resources, and enhancing efficiency in cognitive and motor processing are important goals for the designer, engineer, and the ergonomist, particularly for tasks in which catastrophic events may occur. Ensuring that controls and displays are readily accessible and that they induce little (if any) error is a high priority. This is a simple matter when only a few controls and displays are required on a console, but becomes quite complex when many controls and displays are used. A few of the numerous guidelines pertaining to control and display selection and design are reviewed, restricted to those aspects relating to the Joint Enroute Terminal System console.

Destress blasting at Campbell Red Lake mine

by A. Makuch...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. iv, 42 p. : ill. Bibliogr. (CANMET special publication ; SP87-8E) ISBN 0-660-12662-1
MICROLOG 88-01545 1 fiche (Available on fiche only)

Destress blasting is commonly used in rockburst-prone pillars in thin steeply-dipping orebodies to fracture the rock and reduce the stresses acting on the pillar. Since 1982, 4 destress blasts have been done in pillars at Campbell Red Lake Mine. This report explores rock mechanics concepts of destressing and identifies the parameters of a successful destress blast; describes the first 3 destress blasts in cut and fill crown pillars and shrinkage boxhole pillars and documents the reasons for destressing, the design, instrumentation used and post-blast observations; and describes the extensive monitoring of the 4th destress blast, including the computer modelling and its comparison with in situ measurement of stress and convergence.

Destressing a rockburst prone crown pillar, Macassa Mine

by D. Hanson, W. Quesnel and R. Hong. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1987. v, 66 p. : ill. Bibliogr. (Report ; MRL 87-82(TR))
MICROLOG 88-03162 1 fiche

Macassa Division, Lac Minerals Ltd., designed a destress blast for the 58-40 crown pillar as previous rockburst activity and underground observations suggested that it was burst prone. The design and implementation of the destress blast involved evaluation of the characteristics of the destress application site, in situ instrumentation application, the requirements of an effective design, and cross-correlation with other methods such as computer mining simulation. The effectiveness of the destress blast is discussed through a comparison of tape convergence results, microseismic source location activity, and a calibrated numerical model simulation of the destress blast.

Determination of hexazinone residues and their fate in a New Brunswick forest

by J. Feng and C. Feng. Sault Ste. Marie, Ont. : Government of Canada, Canadian Forestry Service, Forest Pest Management Institute, 1988. 20 p. Bibliogr. (Information report ; FMP-X-81) ISSN 0833-5540 ISBN 0-662-16378-8
MICROLOG 88-06353 1 fiche

Hexazinone has had temporary registration for forestry use in Canada since 1984, with use currently restricted to ground applications only for both site preparation and conifer release, although its behaviour in the forest has not been systematically evaluated. This study determined the off-site mobility of hexazinone in soil on a slope; monitored the off-site movement in snowmelt, baseflow and stormflow; measured off-target deposit from aerial application, measured the occurrence and disappearance of two primary metabolites; and established a new reporting method for residues in soil on an area basis to provide direct comparison with the rate of application. Two spray blocks were treated in May 1984 at 3.8 kg ai/ha and 3.1 kg ai/ha with aerial application. Deposit samples and soil samples were taken, along with runoff water samples.

Determination of optimum sampling interval in DEM data acquisition : a guide for users

by A.E. Balce. Edmonton : Alberta Forestry, 1986. iv, 58 p. : ill. Bibliogr. (ENR technical report ; T/107) ISBN 0-86499-303-X
MICROLOG 88-04096 1 fiche

Guidelines for determining the optimum sampling interval(s) in data acquisition of digital elevation models (DEM) by grid sampling using photogrammetric methods. Given one or more sample profiles from a stereomodel and an error budget for height interpolation from the DEM data, program RF is run to determine the roughness factor of each sample profile. Knowing the roughness factor, length and sampling rate of a profile, the most suitable program is chosen to compute the optimum sampling interval. Programs SPECTRA3, LOGKV3, LINEAR1 and RF are available for this purpose. Guidelines for using these programs are based upon the test results described in Appendices 1 and 2. These programs are coded in FORTRAN and are operational on the Bureau's VAX 11/785.

The Determination of radiation doses from the intake of tritium gas

Ottawa : Atomic Energy Control Board, 1988. 3, 3 p. Bibliogr. (Consultative document ; C-105) *Bilingual (Détermination des doses...).*
MICROLOG 88-03558 1 fiche

Occupational exposures to tritium in the nuclear industry usually involve tritiated water (HTO), but on occasion tritium gas (HT) is encountered either alone or in combination with tritiated water. Tritium gas is only slightly soluble in body fluids and tissues and hence it is only the tritium gas contained in air within the lung which contributes significantly to doses of ionizing radiation received from inhaled tritium gas. This document presents the Atomic Energy Control Board policy position as presented in the Bioassay Guideline, based on International Commission on Radiological Protection system.

Determination of seafloor topography over the New Phalen colliery, Sydney coalfield, Cape Breton Island, Nova Scotia

McGregor Geoscience Limited. Sydney, N.S. : Cape Breton Coal Research Laboratory, 1988. 54 p. : ill., fold. maps. *CANMET contract: 79018-01-SQ.*
MICROLOG 88-05980 3 fiche

A 35 line-km grid of marine, high resolution echosounder and subbottom profiler was acquired over DEVCO's New Phalen Colliery, Cape Breton Island. The survey was conducted August 23-29, 1987 as the 1st phase of a multi-year program designed to evaluate mining-induced seafloor subsidence by comparing pre-mining seafloor profiles with post-mining seafloor profiles. The principle survey area was above the West Phalen No. 1, No. 2 and No. 3 longwall mine areas. The tracks of survey lines and the echosounder profiles acquired along these tracks were digitized and individual lines, plan and profile panels were produced, detailing the seafloor topography along the pre-mining reference profile lines and displaying the repeatability of line positions and seafloor profile morphology.

Determination of the impregnant concentrations on ASC type charcoal : a magnetic susceptibility study

by S.H.C. Liang, B.H. Harrison and J.G. Pagotto. Ottawa : Defence Research Establishment Ottawa, 1987. xi, 48 p. : ill. Bibliogr. (Report ; no. 973)
MICROLOG 88-03092 1 fiche

It is well documented that the capacity to remove toxic gases by activated charcoal is enhanced by the impregnation of the charcoal with inorganic and/or organic chemicals, called whetlerite. This report contains the design and calibration of a Gouy balance for the purpose of magnetic susceptibility measurements of charcoal. A non-destructive test was developed to monitor the impregnants in charcoal. Correlations between the measured susceptibilities and the concentrations of copper and chromium by a linear mathematical model were established. Some preliminary data on the magnetic susceptibilities of ASC-whetlerites co-impregnated with TEDA are also presented.

Determination of the resistance of concrete to abrasion and impact by ice under offshore and Arctic conditions : final report

Arctec Canada Limited. Kanata, Ont. : Arctec Canada Ltd., 1987. vii, 67 p. Bibliogr. *CANMET contract: OSQ84-00308.*
MICROLOG 88-01191 1 fiche

The objective was to develop a laboratory test to evaluate the effects on concrete of ice impact and abrasion, and to begin to establish a database covering a range of test conditions and materials. In this report, the apparatus, as built, is described. The concrete specimens are described fully, including strengths obtained from compression test results. Four concrete specimens have been tested, the procedures used for testing these specimens and the methods used to measure the wear occurring on the specimens are discussed. The results of these tests are reported and conclusions drawn. Recommendations are made for making a minor modification to the apparatus and for testing the remaining 22 concrete specimens to develop the database.

Determining modal choice and station choice for a rail transit line -- Rev.

by M. Los. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 25 p. Bibliogr. (Publication ; no. 85) (Cahier ; no 7711) *Paper presented at the session on Transit Networks of the Joint National ORSA/TIMS Meeting, November 7, 1977, Atlanta, Georgia, US.*
MICROLOG 88-06329 1 fiche

This paper considers the problem of predicting station choice and modal choice for composite mode trips that involve a trip by private car to a rail transit station and the continuation of the trip to the final destination by a rail transit mode. The choice between car and transit, and between park'n ride and kiss'n ride are both taken into account. One of the models presented takes explicitly into account traffic congestion. The methodology proposed relies on entropy maximization with inequality constraints related to parking capacities at the rail transit stations. The numerical application of one of the models to the Lindenwold High Speed Line is reported.

Deux nouveaux algorithmes exacts pour le problème des M voyageurs de commerce

par K.N. Trinh. Montréal : Université de Montréal, Centre de recherche sur les transports, 1987. vi, 73 p. : ill. Bibliogr. (Publication : no. 570)
MICROLOG 88-04678 1 fiche

Ce mémoire contient la description de deux nouveaux algorithmes exacts pour le problème des m voyageurs de commerce (m-PVC). On a mis au point, pour la construction du premier algorithme, une nouvelle formulation du m-PVC. A l'aide de celle-ci on a élaboré un algorithme de "branch-and-bound" très efficace pour le m-PVC basé sur la résolution à chaque noeud de l'arbre d'un problème de flot à coût minimum. Le deuxième algorithme qui a été construit est une adaptation au cas du m-PVC d'un algorithme déjà connu pour le problème du voyageur de commerce. Ce deuxième algorithme utilise le problème d'affectation comme relaxation à chaque noeud de l'arbre d'énumération. Cet algorithme s'est avéré encore plus performant que le premier.

Development and evaluation of analytical methods for the determination of trace polymers in coal and oil process waters

by R.J. Pandey. Guelph, Ont. : Guelph Chemicals Laboratories Ltd., 1988. 232 p. : ill. Bibliogr. *CANMET contract: 6-9215/01-SQ.*
MICROLOG 88-05988 3 fiche

Report on an economical, rapid and routinely applicable spectrophotometric method developed for the analysis of cationic, anionic, and non-ionic polyacrylamide polymers in coal and oil process waters. Method development studies include the Starch-triiodide method, ultra violet method and the Leuce crystal violet method, with the feasibility of their application and optimization to real coal and oil process water samples made. PAMs were characterized by elemental analysis for carbon, hydrogen, nitrogen, and oxygen, and spiking and recovery studies were carried out at various concentrations of PAM. All three methods were modified and optimized for sensitivity in pH, effect of reagents, chlorides metals, and the effects of organics likely to be present in process water. The application of the developed methods were tested on real samples.

Development of a costing method for trucking activities : summary report

by R. Planche...et al. Ottawa : Transport Canda, Development, 1986. vii, 8 p. *TP 8023E. French ed. (Développement d'une méthode...) on the same fiche.*
MICROLOG 88-00323 1 fiche

In recent years, gradual deregulation and increasing competition in the trucking industry have emphasized the need for companies to be fully aware of their operating costs. The costing method proposed allows for the calculation of the real costs of each movement of a shipment. Grouping these individual costs by weight categories provides the average cost for a given trucking activity, geographical area or customer. This method is applicable to all types of carriers and freight. It is based on the time distribution approach and uses real time, rather than standard or average times. The costing method also aims to improve trucking operations efficiencies related to geographical areas, customers, types of freight or type of vehicle.

The Development of a finite element algorithm for blast modelling

D. Gordon Dunbar & Associates Ltd.. Burnaby, B.C. : The Corporation, 1988. v, 82 p. Bibliogr. *CANMET contract: 79179-01-SQ.*
MICROLOG 88-06077 1 fiche

Blast design is largely an empirical procedure by which the three main concerns of a blast designer, namely breakage, fragmentation, and damage, are estimated using data from full scale instrumented tests, equations derived from such tests, and judgement based on experience. The alternative to the empirical approach is an analytical or numerical model which would predict the effect of a blast. The work reported herein represents the first step toward the development of a computational model of blasting which incorporates some of these recent advances and which is implemented on a microcomputer. A complete blast modelling program together with a user's manual and technical documentation are provided.

Development of a ground resistivity technique for locating buried granular deposits

Bird and Hale Limited ; prepared for J.E. Gruspier. Downsview, Ont. : Ontario Ministry of Transportation and Communications, Research and Development Branch, 1987. vii, 115 p. : ill., maps
MICROLOG 88-00625 2 fiche

Study undertaken to evaluate and develop inductive ground resistivity techniques for identifying and mapping buried granular deposits. The test site was located in Howard Township, Kent County, northeast of Chatham, Ontario, and a survey grid was established. A topographic survey was undertaken using stadia methods and a topographic map was produced. Inductive resistivity surveys were performed at depths of 6 m and 15 m and apparent conductivity readings were recorded at regular intervals along the grid lines. Based on the results of the resistivity surveys, 31 test hole locations were selected and were drilled and logged. Additional information was obtained from documents and personal consultation to determine the quarternary and bedrock geology.

Development of an agglomeration process to beneficiate and transport Alberta coals

Edmonton : Alberta Energy, Scientific and Engineering Services and Research Division, 1988. 14 p. : ill. ISBN 0-86499-514-8
MICROLOG 88-04368 1 fiche

Alberta coals generally contain less sulphur but more minerals than other coals from eastern America or Europe, and are subject to mechanical degradation, leading to the formation of large amounts of fines. To overcome these deficiencies, various beneficiation and fines recovery processes were tried with mixed results. However, a process developed by the Alberta Research Council involving oil agglomeration of raw coal reduces mineral matter and moisture in the agglomerated coal and allows recovery of fines, as well as using pipelines for the mixing and transportation. This summary report describes that process, and gives an economic analysis of it.

Development of an automated fish sorting system using machine vision

by K. McCarthy. St. John's : Newfoundland region, Fisheries and Habitat Management, Fisheries Research Branch, 1988. vi, 26 p. : ill. (Canadian industry report of fisheries and aquatic sciences ; no. 185) ISSN 0706-3694
MICROLOG 88-03296 1 fiche

A prototype Fish Monitoring System (FMS-1000) was developed during 1984-86, installed in a fish processing plant, and tested in a commercial production environment. The system included a conveyor belt, a light table and a system of pneumatically controlled chutes or gates used to route different species/sizes of fish onto appropriate filletting lines. Fish were routed from the plant holding room to the filletting lines via the FMS-1000; passing over the light table each was photographed by a video camera, identified by contour outline, assigned a length/weight category, and routed onto a filletting line. The chuting system and the computer software were modified during testing so that eventually the FMS-1000 was able to adequately supply properly sized-sorted fish to a filletting line system having a peak (day-shift) production rate of 125,000 lb. in an eight-hour period. The system was used primarily on cod. Recommendations for further improvements to the system were developed and the FMS-1000 was removed from the plant to undergo modification.

by D. Thoraval...et al. Ottawa : Defence Research Establishment Ottawa, 1988. vii, 36 p. : ill. Bibliogr. (Report ; no. 962)
MICROLOG 88-03966 1 fiche

The paper, chemical agent detector, 3-way liquid is used by the Canadian Forces for the detection of liquid chemical warfare agents and is supplied by Canada to many Western countries. Unfortunately, two of the three dyes used in the detector paper were found to be mutagenic and thus a project was initiated to find non-mutagenic replacement dyes. This report describes the work leading to the replacement of dyestuff A2, currently used to detect G-type nerve agent liquid droplets. Candidate replacement dyes were either procured commercially or synthesized when not available commercially, and were incorporated into paper, both alone and in the presence of the dyes used for detection of mustard and V-type nerve agents. Various dye loadings were used

Development of paper, chemical agent detector, 3-way liquid containing non-mutagenic dyes : II- replacement of the blue indicator dye ethyl-bis-(2,4-dinitrophenyl) acetate

by D. Thoraval...et al. Ottawa : Defence Research Establishment Ottawa, 1988. vii, 64 p. : ill. Bibliogr. (Report ; no. 963)
MICROLOG 88-03969 1 fiche

Two of the three dyes used in the paper, chemical agent detector, 3-way liquid have been found to be mutagenic. This report describes the work leading to the replacement of the strongly mutagenic indicator dye EDA which is used in the paper to detect liquid droplets of V-type nerve agents. Candidates from several classes of indicator dyes were examined as possible replacements for EDA. These candidate dyes, either synthesized at DREO or obtained commercially, were taken through various stages of evaluation.

Development of reductive precipitation process for production of high purity gold, platinum and palladium powders

by G.P. Demopoulos. Ottawa : Canada Centre for Mineral and Energy Technology, 1988. ii, 68 p. : ill. Bibliogr. *CANMET contract: 69055-01-ST.*
MICROLOG 88-05974 1 fiche

Due to their outstanding conductivity, catalytic activity and corrosion/oxidation resistance, precious metals today are used extensively outside of the traditional jewellry and investment industries. Recently, a new solvent extraction process was developed which makes use of commercially available alkylated derivatives of 8-hydroxyquinoline. This report presents the results of work to determine the technical feasibility of producing gold, platinum and palladium powders by hydrogen reduction of their chloride salt solutions and evaluates the feasibility of selectively precipitating the precious metals by various contaminant base elements that are commonly encountered in the refining industry.

Development of the Special Waste Program for British Columbia : towards a healthier environment

British Columbia. Special Waste Advisory Committee. Vancouver, B.C. The Committee, 1988. 43 p.
MICROLOG 88-04952 1 fiche

The Committee was appointed in February 1987 to review options for a comprehensive special waste management system for the province. Special wastes include such problems as solvents from vehicle service, and the transportation and printing industries; acids and bases from petroleum and chemical companies; and heavy metals and chemicals in sludges from manufacturing facilities, but exclude radioactive and nuclear wastes. This report defines the problem with these wastes; presents options and principles for waste management; identifies public, industrial and municipal concerns; considers needed regulations and enforcement and education; and presents criteria for selection of the operator and recommendations for a site, as well as the need for a community monitoring committee.

Le Développement touristique : notions et principes

par J. Demers. Québec : Ministère du tourisme, 1987. xv, 342 p. : ill. Bibliogr. ISBN 2-551-08445-8
MICROLOG 88-04178 4 fiche

Au Canada, le tourisme représente un secteur de l'économie d'une importance telle qu'on ne peut l'ignorer. Malheureusement, on n'y accorde pas toujours l'attention et encore moins l'empressement que cette industrie exige. Cet ouvrage consigne les notions les plus valables et les mieux adaptées aux conditions touristiques canadiennes et, plus spéfiquement, québécoises. La 1re partie est consacrée à la connaissance du phénomène touristique en général et aux techniques permettant de cerner les facteurs qui régissent cette industrie. On analyse ensuite les principaux éléments concernant le plan de développement et son implantation. Puis on examine les principales composantes du marketing touristique. Finalement, le document analyse quelques aspects économiques du tourisme.

A Dialogue on Saskatchewan income tax reform

Regina : Province of Saskatchewan, Minister of Finance, 1988. 34 p. : ill.
MICROLOG 88-03528 1 fiche

Due to a call for comprehensive reform of Canada's income tax system in 1985, the provincial government has investigated and established a set of guidelines for new income tax legislation. This document sets out the Department's guidelines with an explanation of its basic principles, and a discussion of fiscal, social and economic implications, such as fairness, family support by the state, high tax rate disincentives, investment distortions, and the relative complexity of the current tax system which has created a large industry of tax consultants relying on the systems' complications. Discusses the system's linkages to the expenditure system, the underground economy (unreported income), family unit taxation, and corporate income tax integration. Includes a brief history of the evolution of Saskatchewan's tax system. To all these issues, the report discusses the alternative tax measures being suggested by the Department.

Directed Steiner tree problem on a graph : models, relaxations, and algorithms

by M. Dror, B. Gavish and J. Choquette. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 23 p. Bibliogr. (Publication ; no. 589)
MICROLOG 88-05754 1 fiche

A Steiner problem in graphs is the problem of finding a set of edges (arcs) with minimum total weight which connects a given set of nodes in an edge-weighted graph (directed or undirected). This paper develops models for the directed Steiner tree problem on graphs. New and old models are examined for their amenability to solution schemes based on Lagrangean relaxation. As a result, three algorithm are presented and their performance compared on a number of problems originally tested by Beasley (1984, 1987) in the case of undirected graphs.

Directives régissant la conservation préventive -- Ed. rév.

par J.M. Banks. Ottawa : Bibliothèque nationale du Canada, Conseil des bibliothèques du gouvernement fédéral, Bureau de liaison des bibliothèques fédérales, 1987. 45 p. *Bilingue (Guidelines for preventive...).* ISBN 0-660-53823-7
MICROLOG 88-00846 1 fiche

La conservation préventive vise à retarder le plus possible la détérioration des documents de bibliothèque. Ce document fournit aux bibliothécaires fédéraux un outil des plus utiles pour établir leurs politiques et planifier leurs programmes en matière de conservation, ainsi que pour enseigner aux employés des bibliothèques comment manipuler les documents de façon sécuritaire. Un modèle de conservation préventive est présenté. Les sujets abordés sont: le milieu ambiant, les magasins de livres, la manipulation, la sensibilisation aux problèmes de conservation, le microfilmage préventif, les expositions et la marche à suivre en cas de sinistre.

Directory of labour organizations in Canada, 1987

Ottawa : Labour Canada, 1987. 200 p. *Bilingual (Répertoire des organisations...). CSI 21114.004.* ISBN 0-662-55431-0
MICROLOG 88-01765 3 fiche

The Directory of Labour Organizations in Canada 1987 contains a summary, statistical data on union membership, and an alphabetical list of unions, congresses and other labour organizations. Also included are the names and addressses of principal officers, the titles of union publications, upcoming conventions, and the geographic distribution of union local branches in Canada. Entries in the directory are in five parts. The first part lists international and national unions either affiliated or unaffiliated to a central labour congress and having 50 or more members. Labour organizations consisting of a single unit and having more than 50 members, but not affiliated with any other labour organization, form the second part. The third part lists the central labour congresses, their secondary bodies, and directly chartered, single-location unions. Railway and Printing Trades and other union groups are listed in the fourth section. Part 5 provides information on world organizations of labour and their associated groups

Discovering your community's opportunities and resources

Whitehorse : Canada/Yukon Economic Development Agreement, 1987. 13 p. : ill. Bibliogr. (Community economic development ; booklet 2)
MICROLOG 88-03760 1 fiche

The concept of community economic development bases development plans on local needs and interests, catering to quality of life values desired by the local people with a broadening of goals to include regional, territorial, national and international goals. This document sets out the stages for identifying opportunities and resources at the local level: creating a planning organization, identifying the causes of local economic problems, identifying opportunities and available resources, and identifying options. Includes a list of sources for further assistance and information.
CA CO NO NP PR SA

A Discrete-convex programming approach to the simultaneous optimization of land use and transportation -- Rev.

by M. Los. Montreal : Université de Montréal, Centre de recherche sur les transports, 1978. 37 p. Bibliogr. (Publication ; no. 77) (Cahier ; no 7710)
MICROLOG 88-06324 1 fiche

Discussion of three design problems related to land use and transportation networks. The transportation network design problem with congestion reduces to an all-or-nothing traffic assignment problem under certain assumptions on the congestion function and the investment cost function. The land use design problem is formulated as an extension of the Koopsmans-Beckmann problem and a heuristic is proposed to solve this problem. It is also shown that the seemingly more complex problem of designing jointly a land-use plan and a transportation network reduces to a pure land-use design problem.

Discussion paper : Canada-U.S. trade negotiations : implications for Ontario's agriculture, food and beverage sector

Ontario. Ministry of Agriculture and Food. Toronto : The Ministry, 1987. v, 80 p. *CSI 55101.201*
MICROLOG 88-00598 1 fiche

Examines the potential impact of the bilateral trade negotiations concerning agriculture, food and beverage products within the context of federal and provincial trade objectives, farm and processing group views, government policy commitments, and the structure and performance of this sector. Special focus is on Ontario's competitive disadvantage due to higher costs and lower labour productivity than in the US, created by Ontario's smaller production processing units, government policies and institutional factors. Discusses the limited gains and the potential for farm and plant closures against anticipated lower retail food prices.

Discussion paper on conditional release supervision standards

jointly sponsored by the National Parole Board and the Correctional Service of Canada. Ottawa : National Parole Board ; Correctional Service of Canada, 1987. i, 42 p. *Conditional release supervision standards project, developmental phase. French ed. (Document de travail...) on the same fiche.*
MICROLOG 88-02933 1 fiche

This report presents the options considered in a major review of the standards which govern the community supervision of offenders who are released under the authority of the National Parole Board (NPB). This includes the supervision of released federal offenders by officers of the Correctional Service of Canada (CSC), by provincial officers under federal-provincial contracts, and by voluntary sector workers under contract with CSC. Also covered are the supervision of provincial offenders released by the NPB in the seven provinces which do not have their own parole authority. The issues considered include, striking a balance between CSC's and NPB's assurance of quality supervision and the preservation of each organization's independence, without instituting a single set of standards for both organizations; the need for special standards for special offender groups (Natives, women, offenders in rural areas), whether standards set are minimum standards or standards of

excellence; the articulation of standards; and, making exceptions to a standard in selected circumstances through the use of explicit authority.
CA CI JU

Discussion paper on credit card interest charges

Federal-Provincial-Territorial Working Group on Cost of Credit Disclosure. Ottawa : Consumer and Corporate Affairs Canada, Corporate Services and Research Branch, 1988. 24, 25 p. : ill. *Bilingual (Document de travail...)*. ISBN 0-662-55828-6
MICROLOG 88-03314 1 fiche

In 1986, credit card balances amounted to about $5 billion, and it is estimated that by 1987 approximately 64% of Canadian consumers possessed at least one credit card. However, there are very few terms and conditions in the pricing of credit cards making it difficult for the average consumer to understand the costs associated with the use of their cards. Federal, provincial and territorial Ministers responsible for Consumer and Corporate Affairs have prepared this paper which studies selected aspects of the credit card industry such as partial payments, variations in interest rates, variation in method of interest calculation, the cost of credit card services from financial institutions, retail stores and gasoline credit cards, and travel cards. Discusses provision of information, changes to industry practices and recommends a method of interest calculation. Includes April 1988 pricing features of selected cards.

Discussion paper on the relationship of the Ministry of the Solicitor General with the voluntary sector

Canada. Solicitor General Canada. Ottawa : The Solicitor General, 1987. 31, 33 p. : ill. *Bilingual (Document de travail sur...)*. ISBN 0-662-55419-1
MICROLOG 88-01018 1 fiche

The voluntary sector offers an important avenue for the Ministry to engage in a continuing dialogue with Canadians about social problems contributing to criminality. This paper studies the need for a policy governing citizen participation in developing programs and services for both those who have been victimized by crime and those who have come in conflict with the law. Discusses current experience.

A Discussion paper on wildland/urban interface fire hazards in British Columbia

British Columbia. Ministry of Forests. Protection Branch. Victoria : The Branch, 1988. 8 p.
MICROLOG 88-02099 1 fiche

Briefly discusses the waste generated by private landowners through logging, land-clearing and homesite/subdivision development to develope a comprehensive strategy for dealing with fire problems and prevention. Proposes solutions to improve hazard identification, especially from small operations: a ranking system to help prioritize hazards after they have been identified; and prevention through public awareness and information.

Dispute settlement in the Canada-U.S. trade agreement : an analysis of the dispute settlement provisions of the Canada-U.S. Free Trade Agreement preliminary transcript : background paper

prepared for the Government of Ontario by Philip W. Slayton and John J. Quinn. Toronto : Government of Ontario, 1987. 50 p.
MICROLOG 88-02092 1 fiche

One the most prominent features of the free trade agreement between the US and Canada is the guaranteed access to the US market which has been constrained by US laws and the method of their application. This paper discusses the new bilateral treaty's likely contribution to achieving market access with the protection of the dispute settlement mechanism and concludes that the mechanism does not impose effective controls on domestic US trade remedies that have always prevented Canadian industry access.

Dispute settlement mechanisms : an analysis of the dispute settlement provisions of the Canada-U.S. Free Trade Agreement preliminary transcript : executive summary

prepared by Blake, Cassels & Graydon. Toronto : Government of Ontario, 1987. 3. 2 p. *Bilingual (Les mécanismes de..)*
MICROLOG 88-02091 1 fiche

Brief review of the intent behind the dispute settlement mechanisms of the Free Trade Agreement between Canada and the US. Discusses the failure of the Agreement's ability to impose legally effective limits on national laws and policies that operate to deny market access, the failure to provide remedies and sanctions for non-compliance in order to offset

disparities in political and economic power between the US and Canada and the failure to provide for appropriate participation by all interested parties, including the provinces and the private sector.

Dispute settlement mechanisms in a free trade agreement

Toronto : Ministry of Industry, Trade and Technology, 1986. 14 p. (Ontario trade studies ; no. 2)
MICROLOG 88-01324 1 fiche

Analysis of the problems engendered by the General Agreement on Tariffs and Trade (GATT) which is the framework for free trade negotiations between Canada and the US. Considers inconsistency of trade relations from the volatility and unpredictability caused by measures of GATT and the idea that more certain and objective rules of national conduct are required in order to form better dispute resolution procedures. Identifies legal and political difficulties of bi-lateral trade. Documents a legal history of Canada-US trade disputes and presents comparative experience from European trading arrangements. Examines the dominant factors which should be taken into account in evaluating alternative arrangements for settling bi-lateral conflicts.

A Distributed 'LAG' for spatially correlated residuals

by U.C.H. Blum. Montreal : Université de Montréal, Centre de recherche sur les transports, 1987. ii, 12 p. Bibliogr. (Publication ; no. 512) (Cahier ; 8711)
MICROLOG 88-00543 1 fiche

The increased attention for extracting systematic information from the residuals of a regression equation -- both efficient from a numerical and a statistical point of view -- has led to the definition of DORIC- and NORIC-type models (BLUM and GAUDRY, 1986) distinguishing between residue impact criteria based on data directly ordered by the researcher as opposed to naturally ordered data. Proposed is a regression model accounting for spatial correlation among residuals where the data decides on the level of impact of increasing degress of contiguity.

The Distribution and abundance of Greenland halibut, deepwater redfish, golden redfish, roundnose grenadier and roughhead grenadier in Davis Strait

by D.B. Atkinson and W.R. Bowering. St. John's : Dept. of Fisheries and Oceans, Science Branch, 1987. v, 29 p. : maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences : no. 1578)
ISSN 0706-6547
MICROLOG 88-01059 1 fiche

The Davis Strait area between Baffin Island and Greenland has been the location of a number of important groundfish fisheries since the late 1960s. In 1986, the Newfoundland Region mounted an extensive cruise to survey the ice-free area in depths of 200-1250 m from Cape Chidley in the south to Disko Island in the north. This report describes the distribution of 5 major species of groundfish caught during the survey: Greenland halibut, deepwater redfish, golden redfish, roundnose grenadier, and roughhead grenadier. A stratified-random survey was conducted over 31 days with a total of 194 successful 30-minute tows. Bottom temperature was determined at each fishing station using expendable bathythermographs. Catches were separated by species, then weighed and measured, otoliths collected for aging, stomach contents determined, and gonad maturity stage determined.

Distribution and abundance of larval sablefish *Anoplopoma fimbria* off the west coast of Vancouver Island, April 2-18, and May 10-18, 1986

by W. Shaw, G.A. McFarlane and D. Davenport. Nanaimo, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1988. iv, 130 p. : ill., maps. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1970) ISSN 0706-6473
MICROLOG 88-04791 2 fiche

Two larval surveys were conducted off the west coast of Vancouver Island from April 2-18 and May 10-18, 1986, part of a multidisciplinary study in the La Pérouse Bank region. This year's survey results provide additional information about the annual distribution and relative abundance of sablefish larvae occupying the surface waters off Vancouver Island and will be used towards developing a sablefish recruitment index. To examine the distribution of sablefish larvae with depth, samples were also collected at stratified depths in the midwater to 700 m. This report is the third in a series with the results of the 1984 and 1985 surveys already documented. The results of the surface neuston sampling, bongo sampling and vertical haul sampling are presented. Preliminary information on distribution and relative abundance of other species is also presented.

Distribution and migration, exploitation, and former abundance of white whales *Delphinapterus leucas* in Baffin Bay and adjacent waters

by R.R. Reeves and E. Mitchell. Ottawa : Dept. of Fisheries and Oceans, 1987. vi, 34 p. : ill. Bibliogr. (Canadian special publication of fisheries and aquatic sciences ; 99) *CSI 21105.223.* ISSN 0706-6481
MICROLOG 88-03910 1 fiche

During the 1970s the Canadian oil and gas industry sponsored extensive surveys of wildlife in the eastern Canadian Arctic. The main approach in assessing white whale population was the aerial survey. Historical research also provided a valuable perspective on the current status of wildlife populations. This report presents previously unpublished historical data on white whales in the Lancaster Sound Region, defined here as the area from Peel Sound and Franklin Strait east to northwest Baffin Bay and Smith Sound, including the northern Baffin Island and Queen Elizabeth Islands areas as well as Prince Regent Inlet and the Gulf of Boothia, and off West Greenland. The data, evaluated along with published information, considers aspects of seasonal distribution, stock identity, catch history, and early abundance of the whales.

The Distribution, age and growth and sexual maturity of Atlantic halibut *Hippoglossus hippoglossus* in the Newfoundland and Labrador area of the northwest Atlantic

by W.R. Bowering. St. John's : Dept. of Fisheries and Oceans, Fisheries Research Branch, 1986. iv, 34 p. : ill., maps. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1432) ISSN 0706-6457
MICROLOG 88-02384 1 fiche

The Atlantic halibut is the largest of the flatfish and highest priced of all groundfish along with the closely related Pacific halibut, and is prevalent throughout the North Atlantic on both the North American and European coasts. Data was taken from Canadian, Newfoundland-based research vessels and commercial boats chartered for research purposes from 1972-84, as well as from the Canadian Foreign Observer Program for 1984. Geographic distribution and relative abundance, distribution by depth and bottom temperature, distribution by length and depth, age and growth, growth curves, and sexual maturity were tabulated for each sex.

Divorce, custody, support, enforcement : transferring and sharing jurisdiction

by M.J. Morton. Ottawa : Library of Parliament, Research Branch, 1981. 18 p. Bibliogr. (Current issue review ; 81-13E) ISBN 0-660-12353-3
MICROLOG 88-04030 1 fiche

A relatively unnoticed but important proposal discussed at two federal-provincial constitutional conferences in the late 70s and early 80s involved the divesting by Parliament of its exclusive jurisdiction over marriage and divorce to the provinces, and granting to the provinces the power to appoint judges with superior court jurisdiction over family matters. This move was intended to allow the integration of legislation in the areas of marriage and divorce with relevant legislation and policy in areas already under provincial control. This document discusses current divorce legislation and opposition from women's group who claim that the previous performance of provincial jurisdiction over divorce, alimony, child support and custody orders is already inadequate. Includes an overview of the legislative history of divorce laws since 1968.

Dockside grading project : Canso Seafoods

by M.R. Desantis...et al. Halifax : Canada, Dept. of Fisheries and Oceans, Fisheries Development Branch, 1984. iii, 10 p. : ill. (Canadian industry report of fisheries and aquatic sciences ; no. 148) ISSN 0704-3694
MICROLOG 88-02625 1 fiche

In 1983 an extensive evaluation was conducted to determine the feasibility of a dockside grading program for trawler-caught fish delivered to Canso Seafoods Ltd. in Canso, Nova Scotia. Factors evaluated included: the effect of different handling methods utilized onboard; the effect of different onboard stowage methods; a comparison between the proposed Dept. of Fisheries and Oceans (DFO) dockside grading system and the H.B. Nickerson dockside grading system which had been in operation for over a year; a comparison between H.B.N. end of line inspections and the proposed DFO end of line grade standards, and the relationship between end of line evaluations and dockside grades; and the effect of other variables that impact on quality, such as parasites. Four offshore stern trawlers of a specific design were chosen, with an observer on each to collect 3 samples of cod, one of which was stowed in plastic boxes and the other two in pens. Tow data (area fished, date caught, tow length, tow weight, tow depth, fish temperature, water temperature, air temperature, gutting and handling procedures, washing effectiveness, icing and the lag from the moment the net of fish arrived on the deck until the last fish was iced in the hold) were also recorded.

Document de travail sur les frais relatifs à l'utilisation des cartes de crédit

Groupe d'étude fédéral-provincial-territorial sur la divulgation du coût du crédit. Ottawa : Consommation et corporations Canada. Direction des services ministériels et de la recherche, 1988. 25, 24 p. *Bilingue (Discussion paper on credit...).* ISBN 0-662-55828-6
MICROLOG 88-03314 1 fiche

Les cartes de crédit sont devenues un mode de paiement largement accepté de même qu'une source de crédit flexible. Toutefois, leurs coûts d'utilisation diffèrent grandement dans les modalités et les conditions utilisées pour le calcul des intérêts et des autres frais. En raison de la division des pouvoirs législatifs prévue par la Constitution, le gouvernement fédéral a compétence exclusive en matière d'intérêts et de banques alors que les provinces régissent la propriété, les droits civils et les contrats passés à l'intérieur de la province. Par conséquent, le Groupe de travail a entrepris d'examiner conjointement la question des cartes de crédit au Canada. Le document de travail examine certains aspects du calcul des frais d'utilisation, les coûts du service et l'établissement des politiques.

Document de travail sur les services d'ambulance

Fredericton : Nouveau-Brunswick, Ministère de la santé et des services communautaires, 1988. 6, 6 p. *Bilingue (Discussion paper on...).*
MICROLOG 88-03937 1 fiche

Depuis le début des années 1970, les services d'ambulance dans la province du Nouveau-Brunswick sont passés d'un simple service de transport à une composante essentielle du réseau des services de santé. Ce document expose la situation actuelle en matière de services d'ambulance et propose diverses options ayant pour but de servir de base à des discussions qui conduiront à la définition d'une politique-cadre ainsi qu'à l'élaboration d'un cadre législatif. Fournit des informations sur les rôles et les intervenants, la formation, le financement, les principes d'élaboration des programmes et un modèle de prestation des services.

Document explicatif : la politique nationale en matière de sciences et de technologie

Canada. Ottawa Gouvernement du Canada, 1987. 11, 11 p. *Bilingue (Background paper...)*
MICROLOG 88-00008 1 fiche

On a perçu l'urgence de coordonner les efforts pour faire bonne figure dans un monde de plus en plus concurrentiel, où l'innovation et la technique de pointe dominent les relations commerciales. Les gouvernements provinciaux ont convenus de mettre au point un nouveau cadre de politique fondé sur ces réalisations. Cette politique nationale fait état d'un esprit de collaboration renouvelé entre les divers ordres de gouvernement en vue d'accentuer la mise en valeur et l'utilisation des sciences et de la technologie d'ici ou de l'étranger. La politique porte une attention particulière à l'application des sciences et de la technologie au développement regional et à l'investissement du secteur privé. Des domaines où des mesures immédiates qui s'imposent pour l'intervention du Conseil des Ministres des sciences et de la technologie sont identifiés.

Does neoteny occur in holarctic lampreys *Petromyzontidae*?

by V.D. Vladykov. Ottawa : National Museums of Canada, National Museum of Natural Sciences, 1985. 13 p. : ill. Bibliogr (Syllogeus : no. 57) ISSN 0704-576X
MICROLOG 88-03284 1 fiche

The general biology of the Holarctic lamprey z*Petromyzontidae*) is relatively well-known but details of their reproduction, and especially the phylogenetic relation between parasitic and nonparasitic species, is in need of additional observation. After studying all 36 species of *Petromyzontidae*, it is concluded that, due to the extreme complexity of the lamprey reproductive cycle, the authors who claimed to observe cases of neoteny among lampreys did not give sufficient proof. The present article analyzes objectively their arguments.

Données diverses sur les sédiments, 1966-83

Ottawa : Division des relevés hydrologiques du Canada, 1988. xvii, 248 p. : ill. *Bilingue (Miscellaneous sediment data...). CSI 22296.200.* ISBN 0-662-55726-3
MICROLOG 88-03032 3 fiche

Le principal but des études des sédiments au Canada est de réunir des données sur les transports des solides dans les cours d'eau canadiens. Cette publication présente les résultats des diverses études des sédiments hydrologiques du Canada de 1966 à 1983 pour chacune des stations d'étude des sédiments présentées par ordre alphabétique. On fournit les données descriptives suivantes sur les stations: leur emplacement, leurs latitude et longitude, leur bassin versant, la nature de débit et le type d'instrument de mesure employé.

Le Doré jaune *Stizostedion vitreum mitchill* au Québec : biologie et gestion

par P.-P. Hazel et R. Fortin. Québec : Gouvernement du Québec, Ministère du loisir, de la chasse et de la pêche, Direction de la faune aquatique, 1986. xxx, 417 p. : ill. Bibliogr. (Rapport technique ; no 86-04)
ISBN 2-550-16883-6
MICROLOG 88-01646 5 fiche

Cette étude présente dans une première étape certaine considérations générales sur l'écologie et la dynamique de population du doré jaune, en insistant sur des aspects qui semblent pertinents pour l'aménagement de cette espèce. La 2e étape est consacrée à un bilan des connaissances acquises sur les différents aspects de la biologie du doré jaune. On y traite de la répartition, de la croissance, de la reproduction, de l'alimentation et des déplacements de l'espèce. Dans la 3e étape, on passe en revue les pratiques d'aménagement du doré jaune en Amérique du Nord et au Québec. Finalement, on formule des recommandations de gestion de cette espèce au Québec.

Downstream fry enumeration of the 1985 brood sockeye and chinook escapement to the Horsefly River

by C. Mueller and R. Kent. Cultus Lake, B.C. : Dept. of Fisheries and Oceans, Fisheries Research Branch, 1988. iv, 38 p. : ill. Bibliogr. (Canadian manuscript report of fisheries and aquatic sciences ; no. 1980)
ISSN 0706-6473
MICROLOG 88-05828 1 fiche

Sockeye fry (1985 brood year) were enumerated during their downstream migration in the Horsefly River. Fry were trapped from three sites along the river to estimate fry emergence from three river areas: an experimental transplant area above the impassable Horsefly Falls, a traditional spawning area below the falls, and another traditional spawning area in the lower end of the river. The project took place from early April 1986 until early July 1986.

Downtown revitalization in northern Alberta

a report prepared by the Northern Development Branch in consultation with the Steering Committee on Downtown Revitalization in Northern Alberta. Edmonton : Northern Alberta Development Council, 1987. 128 p. Bibliogr.
MICROLOG 88-04041 2 fiche

This report synthesizes issues and concerns encountered by northern communities and the assistance presently available to communities wanting to revitalize their downtown. Investigates social and economic development, development of communities and service delivery and of government services and programs. In particular the report determines and describes what programs presently exist in Alberta downtown revitalization and identifies any gaps which may surface; analyzes and evaluates programs in other provinces; and determines community concerns and interest regarding revitalization in northern communities and explores the economic results of revitalization.

A Draft fisheries management plan for the Sault Ste. Marie district, 1988-2000

Ontario. Ministry of Natural Resources. Toronto : The Ministry, 1987. iii, 78 p. : maps. Bibliogr.
MICROLOG 88-05263 2 fiche

Summary of fisheries resource information, problems and issues affecting the fisheries resource, and fisheries management direction in the form of objectives, targets, strategies, tactics, and a program implementation schedule. This plan has been prepared using the broad objectives and targets laid out in the District Land Use Guidelines, the Lake Superior Strategic Fisheries Plan, and the Lake Huron Strategic Fisheries Management Plan. It is intended to direct fisheries management activities in the Sault Ste. Marie District to the year 2000. The plan also provides the basis for measuring the success or failure of the fisheries management program by either the public or fisheries managers.

Draft guidelines for guidance services in Manitoba schools : guidance task force report, 1988

Guidance Task Force (Manitoba). Winnipeg : The Task Force, 1988. vii, 43 p. Bibliogr.
MICROLOG 88-05727 1 fiche

These guidelines for guidance services provide direction to school divisions so that they may develop responsive, effective, and accountable guidance services and programs at the local level. They are intended to help school divisions and schools assess where they now stand with respect to the provision of guidance services and to determine directions and goals. They provide definitions, goals, expectations, and service standards at the provincial level within which administrators, educators, counsellors and others can work at the local level to develop specific guidance services and programs.

Drying characteristics in timber frame walls of low-rise residential housing : final report

Rowan Williams Davies and Irwin Inc.. Ottawa : Canada Mortgage and Housing Corporation, Research Division, 1988. 230 p. : ill. Bibliogr.
MICROLOG 88-06477 3 fiche

Report on the development of an analytical model to represent the wetting/drying characteristics in outer portions of walls in low-rise timber frame residential housing. Initiated to improve the understanding of the causes of moisture damage in real walls, the study provides the basis for developing practical design information regarding outer-wall moisture performance. The essential output from the two phases of the research is an analytical computer simulation program called WALLDRY, based on currently available moisture movement theories and supported with key parameters, required in the governing equations, determined from bench top tests. The simulation program was validated with data gathered from laboratory measurements on a full scale timber frame wall assembly.

A Dual simplex algorithm for finding all shortest paths -- Rev.

by M. Florian, S. Nguyen and S. Pallottino. Montreal : Université de Montréal, Centre de recherche sur les transports, 1980. 21 p. Bibliogr. (Publication ; no. 139) (Publication ; no 325)
MICROLOG 88-06399 1 fiche

The analysis of flows in transportation and communication networks is often carried out with the aid of steady state models of the flow during a given period of time, commonly known as traffic assignment models. These models are multi-commodity flow problems with convex, concave, or linear cost functions. The starting point for the work presented in the paper is the observation made by Gallo in his recent (1977) work on the use of reoptimization procedures for the recomputation of shortest paths, when an origin change is made. The paper presents the formulation of the shortest path problem as a linear program and the dual simplex method is recalled; then the dual simplex method is adapted for the reoptimization of the shortest path tree and the properties of the resulting method are demonstrated; the design and the implementation of an efficient code are presented; and some computational results obtained with the code are reported.

Dynamic location-routing problems

by G. Laporte and P.J. Dejax. Montreal : Université de Montréal, Centre de recherche sur les transports, 1988. 24 p. : ill. Bibliogr. (Publication ; no. 578)
MICROLOG 88-04682 1 fiche

Dynamic location-routing problems involve the determination of the least cost sequence of depot, vehicle fleet and route configurations in a distribution system, over a given planning horizon. This paper presents two solution approaches to such problems. The first is an exact method which is appropriate for small scale problems, consisting of representing the problem by a suitable network and of solving to optimality an integer linear program associated with the network. In the second approach, some of the system costs are approximated and a global solution is then obtained by determining a shortest path on a directed graph.
PS SC TR

Dynamic range considerations in narrowband and wideband superheterodyne surveillance receivers

by A. Mudry. Ottawa : Defence Research Establishment Ottawa, 1988. ix, 40 p. : ill. Bibliogr. (Technical note : 88-9)
MICROLOG 88-05139 1 fiche

Examination of the dynamic range performance of narrowband and wideband superheterodyne surveillance receivers, presented through a theoretical review of paramaters indicative of the dynamic range performance of each type of receiver. For a narrowband superheterodyne receiver, the dynamic range performance can be specified using a parameter based on a single tone at the input, while for a wideband superheterodyne receiver, one or more two tone dynamic parameters are needed. These two tone dynamic range parameters are then used to predict the dynamic range performance of a wideband superheterodyne surveillance receiver currently being built. Some anticipated dynamic range problems specific to this system are discussed.

Echantillonnage et conservation des sédiments en vue de la réalisation des projets de dragage

par R. Rochon et M. Chevalier. Montréal : Environnement Canada, Conservation et protection, Région du Québec, 1987. iv, 28 p. Bibliogr.
MICROLOG 88-02064 1 fiche

L'acquisition de données sur la qualité physico-chimique des sédiments est une étape essentielle dans le processus d'évaluation des impacts sur l'environnement. Ce document vise à répertorier les principales méthodes actuellement utilisées pour l'échantillonage des sédiments et à recommander celles qui conviennent le mieux pour l'évaluation des impacts des projets de dragage en milieu marin et en eau douce. Les thèmes abordés sont la planification et la détermination des points d'échantillonage dans l'aire de dragage, le prélèvement et la conservation des échantillons, ainsi que la présentation des modalités d'échantillonage.

L'Ecole française à clientèle pluriethnique de l'île de Montréal : situation du français et intégration psychosociale des élèves

par A. Beauchesne et H. Hensler. Québec : Conseil de la langue française, 1987. xxxii, 585 p. : ill. (Dossiers du Conseil de la langue française ; 25) ISBN 2-551-08884-4
MICROLOG 88-01477 7 fiche

L'application de la Loi 101 a fait que plusieurs écoles d'expression française ont acquis assez rapidement un statut pluriethnique, en raison de l'origine assez diverse de leur clientèle. Dans ce contexte, le problème de l'apprentissage et de l'enseignement du français s'est posé avec une acuité particulière. Après une présentation générale de la problématique et de la méthodologie de l'étude, ce rapport fait état de la situation de l'intégration et de la situation linguistique dans les écoles pluriethniques de Montréal. Dans le dernier chapitre, on met en évidence les facteurs favorables et défavorables au développement du français dans ces écoles.

Ecological zonation of northwestern Alberta

by J.H. Archibald. Edmonton : Alberta Forestry, Lands and Wildlife, Resource Evaluation and Planning Division, 1986. xi, 73 p. : ill., maps. Bibliogr. *At head of title: Integrated resource inventory. Fold. maps not filmed.* ISBN 0-86499-415-X
MICROLOG 88-04019 1 fiche

Ecological classification for the forest ecosystems of Northwestern Alberta extending from latitude 55 degrees north to the Northwest Territories border and from longitude 114 degrees west to the British Columbia border. A total of three ecological zones are recognized: Boreal Subarctic, Boreal Mixedwood and Aspen Parkland. Twenty-six plant associations are described for the three zones in the area including information on vegetation structure, soil characteristics and site factors. Forest productivity is also summarized for most associations. Climate data was analysed for the study area as an aid to delineation of the zones and is presented in an overview for each zone and in detail in the appendix.

Econometric estimation of constrained demand functions for assets

by G.R. Sparks. Ottawa : Bank of Canada, 1974. 30 p. Bibliogr. (Technical report ; 2)
MICROLOG 88-06464 1 fiche

This paper presents a procedure of estimating demand functions for assets subject to portfolio consistency constraints. The basic model is formulated and the nature of the econometric problem is indicated followed by a description of an estimation procedure that is a modified version of the technique for estimating seemingly unrelated regressions. Finally, the problem of introducing lagged adjustments into the model is taken up, and the estimation of constrained demand functions is illustrated.

An Economic analysis of the Shipbuilding Industry Assistance Program

by K.E.A. De Silva. Ottawa : Economic Council of Canada, 1988. ix, 131 p. Bibliogr. (Discussion paper ; no. 351) *CSI 22215.212.* ISSN 0225-8013
MICROLOG 88-05169 2 fiche (Available on fiche only)

Subsidies to shipbuilding in Canada have a history dating back to 1961. Prior to 1975, there were two types of programs, one to assist shipbuilding for domestic users, and the other to encourage exports. The Shipbuilding Industry Assistance Program (SIAP) integrated these two elements under a single policy umbrella. This study examines the effectiveness of the SIAP, whose objective was to promote the international competitiveness of the industry, maintain stable employment, and gradually reduce the dependence of the industry on government assistance.

MICROLOG 88-00265 1 fiche

Outlines an understanding of the importance of trade to the Saskatchewan economy at the traditional level of resource-based industries and more currently its advanced technology industry, as well as promoting the need for information trade. Overviews Saskatchewan's principles in ensuring the education of its population, in job training and in research and development. Also addresses the need for public and private funding of educational programs.

The Education Amendment Act, 1980 (Bill 82) implementation study : board policies and school level practices

by H. Silverman, A.K. Wilson and W. Seller. Toronto : Ministry of Education, 1987. vi, 214 p. Bibliogr. ISBN 0-7729-2856-8
MICROLOG 88-04131 3 fiche

A longitudinal study was conducted in six Ontario school boards to assess the extent to which the boards had implemented the requirements of the Education Amendment Act, 1980. The study also examined the special education delivery models offered in the 46 schools sampled across the six boards, and the impact of differences in policy and practice on teachers' opinions and actions. Teachers and principals participated in the study. Interviews were also conducted with superintendents and board resource personnel. Principals were interviewed to ascertain their philosophical position regarding special education delivery, and the current status of the special education programs and services in their school. A revised provincial IPRC survey is included in the report which described in detail differences between 96 Ontario school boards in the implementation of the IPRC requirements in terms of structural variations, attendance patterns, time commitment, information used and types of decisions made.

Education and caring : Alberta's program for the prevention, management, and control of AIDS

Alberta. Alberta Community and Occupational Health. Edmonton : The Dept., 1987. iv, 30 p.
MICROLOG 88-00860 1 fiche

Currently, AIDS is a terminal disease for which there is no cure and is killing one Albertan every 52 days. This study outlines methods to control the spread of the infection and how best to care for those who are already infected. Gives a background of HIV virus, prevention and treatment, related plans for prevention and control. Discusses a strategic plan for Alberta, prevention and control programs, education of workers, epidemiological surveillance and assessment, laboratory diagnosis and screening, care and treatment programs and research activities.

Education Development Fund report for 1985-86

Regina : Saskatchewan Education, 1987. 11 p.
MICROLOG 88-05026 1 fiche

The Fund was established in 1985 to finance new initiatives for educational improvement. Allocation of funds is made available under three major categories: learning resources, efficiency measures, and program improvement initiatives, including teacher inservice, gifted students, dropouts, basic skills, preparation for life, and use of community resources. This annual report presents a general overview of the projects approved for the fiscal year, combining statistical information with evaluative comments from project leaders.

L'Education et la formation des femmes bénéficiaires d'aide financière

Moncton, N.-B. : Conseil consultatif sur la condition de la femme du Nouveau-Brunswick, 1988. 31, 27 p. Bibliogr. *Bilingue (Training and education...).*
MICROLOG 88-05681 1 fiche

Ce mémoire fait l'étude des besoins des femmes bénéficiaires d'aide financière en matière de formation et d'éducation. On donne un aperçu des principaux problèmes déjà soulevés dans le recherche sur l'éducation et la formation des femmes. Puis, on met en relief les obstacles particuliers des femmes dont le revenu est très faible et/ou dont le niveau de scolarité est faible. Pour chacun de ces domaines, on énonce le problème, les principes de base visant à solutionner ce problème et des recommandations spécifiques fondées sur les dits principes. Inclut aussi une série de recommandations générales.

Effect of alcohol on contrast sensitivity

by Y.I. Noy and S.M. McFadden. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. 12 p. : ill. Bibliogr. (DCIEM research report ; no. 88-RR-18)
MICROLOG 88-05197 1 fiche

In recent years, contrast sensitivity has gained acceptance as a valid measure of visual capability. Contrast sensitivity measures a person's ability to detect low contrast stimuli at various spatial frequencies. This study examines the effect of alcohol on contrast sensitivity at normal levels of illumination. Contrast sensitivity was measured, using the Vistech VCTS 6500 Test Charts, on two groups: an alcohol group with peak Blood Alcohol Concentration (BAC) levels of 0.12% and a placebo group. Both groups were assessed prior to ingestion of alcohol, at the peak BAC of the alcohol group and at five one hour intervals following peak BAC.

The Effect of composition on the properties of hydronium zirpsios

by A.K. Kuriakose...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 13 p. (Report : MSL 87-40(IR)) *Project 30.29.01 : Advanced ceramic materials.*
MICROLOG 88-00756 1 fiche

The technological applications of hydrogen-ion conducting solid electrolytes would be many, if a highly conductive material which is stable to at least 100C were developed. Two attractive candidates in this class of materials are hydronium beta-alumina and hydronium zirpsios. These compounds have the required stability and ionic conductivity in the single crystal form, but the fabrication of membranes of sufficient size has been difficult. At CANMET a new bonding technique has been developed. This report describes the behaviour of hydronium zirpsios as a function of their composition in the bonding process and in other properties such as thermal stability and ionic conductivity.

The Effect of contaminants associated with suspended sediment on water quality in the Toronto waterfront during 1985

by D. Boyd. Toronto : Ministry of the Environment, 1988. ix, 54 p. Bibliogr. ISBN 0-7729-3702-8
MICROLOG 88-06354 1 fiche

Data collected to characterize the physical and chemical nature of suspended sediments at major sources across the Toronto Waterfront and assess their impact on water quality; to assess the variability of water quality both across the waterfront and through time; and to estimate contaminant loadings at major waterfront sources. The study was designed to build upon the results of previous investigations in the Toronto waterfront. Water quality sampling for physical parameters, nutrients, trace metals and trace organics was undertaken at 12 locations; suspended sediment sampling with a centrifuge was undertaken at 6 source stations; and water column profiles of temperature and water clarity (percentage transmittance) were obtained with a Moniteq MTR 25 transmissometer package.

The Effect of landing construction on some forest soil properties : a case study

by W.W. Carr. S.l. : Forest Research Development Agreement, 1987. vi, 20 p. Bibliogr. (FRDA report ; 003) ISSN 0835-0752 ISBN 0-7718-8572-5
MICROLOG 88-02017 1 fiche

In the interior forest regions of British Columbia the conventional method of harvesting timber with ground-based equipment necessitates the construction of skid roads and lands, which alters soil's physical and chemical properties. This report presents the results of a case study to determine the nature of the residual soil material after landing construction, data which is also applicable to skid roads. Soil physical and chemical data were collected to serve as a basis for the development of effective rehabilitation management practices. As well, information on conifer regeneration was gathered to assess the impact of landing construction on forest productivity.

The Effects of crude oil and the dispersant Corexit 9527 on the vegetation of a Nova Scotian saltmarsh : impacts after two growing seasons

by M.J. Crowell and P.A. Lane. Ottawa : Environment Canada, Environmental Protection Directorate, 1988. viii, 51 p. : ill. (Report ; EE-103) *CSI 21111.219.*
MICROLOG 88-04813 2 fiche

Salt marshes are highly productive ecosystems which are of great ecological and economic importance, but are highly susceptible to oil spills since they are regularly inundated by seawater and have low self cleaning potential. In this study, the impacts of Alberta sweet blend crude oil and the dispersant Corexit 9527 were studied in a Nova Scotia salt marsh over the course of two growing seasons. The impacts of experimental crude oil spills were investigated in creek edge, midmarsh and high marsh vegetation zones while dispersant impacts were studied only in the creek edge zone. Oil and dispersant impacts were studied at the community, species and cellular levels of biological organization in order to provide a comprehensive approach to evaluation of the biological effects of the treatments. This is a continuation of a study initiated in 1986 and presents data collected during both the 1986 and 1987 growing seasons following the oil and dispersant applications in 1986.

The Effects of decreasing heavy metal concentrations on the biota of Buttle Lake, Vancouver Island, British Columbia

by J.H. Deniseger...et al. Victoria : Ministry of Environment and Parks, 1988. 44 p. : ill. Bibliogr. ISBN 0-7726-0820-2
MICROLOG 88-04602 1 fiche

Buttle Lake has been subject to long term heavy metal contamination as a result of a copper/lead/zinc mine located 6 km west of the south end of the lake adjacent to Myra Creek. Water chemistry analysis initially identified zinc and copper as the principal hazards to aquatic life throughout the watershed. A number of studies examined Buttle Lake, the mine site, including Myra Creek and downstream waters before the metals problem was identified. Initial studies immediately following the implementation of the remedial measures in 1983 found deteriorating water quality. The present study is the first to cover the transition period from high metal,low plankton diversity to low metals,high plankton diversity. In addition, the predicted 3 year period for return to background metal levels is covered. This study examines the existence, rate and extent of recovery of the lake ecosystem from 1983 through 1986 by examining the water chemistry, phytoplankton, zooplankton, and fish in Buttle Lake.
BC EV LS PR SC

The Effects of emission control devices on the polynuclear aromatic hydrocarbon and mutagen levels in dieselized underground mines

by L.A. Baldisera...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1986. iii, 156 p. : ill. Bibliogr. *Bound with: The determination of the PAH partition ratio and the nature of mutagens generated by catalytic purifiers. CANMET contract: OSV83-00181.*
MICROLOG 88-03905 2 fiche

A Johnson Matthey-Engine Control Systems catalytic trap oxidizer, a fume diluter, a catalytic trap oxidizer-fume diluter combination, a PTX catalytic converter and a Corning Diesel Exhaust filter were tested on Deutz 714 diesels in two different underground mines in order to learn how these devices affect the concentrations of the polynuclear aromatic hydrocarbons and the mutagens in the mine air. The PAH concentrations on board the diesel in the operator's breathing zone were also determined. The devices were assessed with respect to their sulfuric acid emissions and the RCD downstream from the diesel.

The Effects of fertilization on the early growth of planted seedlings : a problem analysis

by R.P. Brockley. S.l. : Forest Research Development Agreement, 1988. vii, 16 p. Bibliogr. (FRDA report ; 011) *On cover: Canada-B.C. Economic and Regional Development Agreement.* ISSN 0835-0752 ISBN 0-7718-8599-7
MICROLOG 88-05569 1 fiche

A substantial amount of seedling fertilization research has been undertaken in British Columbia and elsewhere in recent years, but results have been inconsistent and much has not been reported in the scientific literature. This report reviews and summarizes available seedling fertilization information to identify promising treatments and treatment combinations and to make specific recommendations regarding the direction and scope of future seedling fertilization research and operations. Special reference is made to interior spruce because of its special problems with 'planting check', although many of the findings may apply to other conifer species.

Effects of growth regulators on the number and length of internodes in sprouts formed on trimmed silver maple

by G.P. Arron. Toronto : Ontario Hydro, Research Division, 1987. iv, 21 p. Bibliogr. (Report ; no. 87-148-K)
MICROLOG 88-00154 1 fiche

The trimming of problem trees under distribution lines on city streets and in rural areas is a major problem and expense for electrical utilities. Such operations are routinely performed at intervals of one to eight years depending on the growth rate of the individual species and the amount of line clearance required. In recent years, a group of new growth regulators has been introduced which is effective in controlling the growth of trees without producing noticable injury symptoms. In the present study the effects of trunk injection on sprout growth in silver maple seedlings were investigated.

The Effects of hypoxia on reaction time and movement time components of a perceptual-motor task

by B. Fowler, M. Taylor and G. Porlier. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1987. p. 1475-1485 : ill. Bibliogr. (DCIEM research report ; no. 87-P-26) *In Ergonomics* : vol. 30, no. 10, 1987.
MICROLOG 88-02166 1 fiche

Moderate to severe hypoxia degrades performance on virtually any complex perceptual-motor task. Two experiments were conducted to examine further the nature of this disruption. Hypoxia was induced with low-oxygen mixtures and arterial oxyhaemoglobin saturation was held at a level equivalent to an altitude of approximately 4700m. In experiment one, choice reaction time was measured with a version of the SCRT task that eliminated movement time and in experiment 2 movement time was measured with a reciprocal tapping task.

Effects of population aging and urban dispersion on the use of urban transport in the future

by R. Chapleau and D. Girard. Montreal : Université de Montréal, Centre de recherche sur les transports, 1986. 21 p. : maps. Bibliogr. (Publication ; no. 461)
MICROLOG 88-00029 1 fiche

Since 1970, the Montreal Urban Community Transit Commission has executed 4 large regional origin-destination surveys by telephone interview, on an average sampling of about 5%. The resulting database describes the mobility of the population in spatialized trip characteristics, socio-economic status (sex, age, car ownership) and travel attributes (modes, trip purposes, bus routes). This report uses the database to address global temporal trends in personal mobility and related factors, and specific mobility trends related to spatial segmentation following the development of urban sprawl. The application of a time-series model is then illustrated using these findings.

Effects of target location on the speed and accuracy of tapping

by L. Buck. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1984. iv, 13 p. : ill. Bibliogr. (Technical report ; TR-SYS-004)
MICROLOG 88-04467 1 fiche (Available on fiche only)

Motor skills constitute an integral part of all aspects of human performance, whether this relates to the control of complex systems and processes or, by contrast, to the manipulation of simple tools, and a full understanding of the interaction between any system or tool and the operator who controls it must necessarily include an understanding of the operator's motor processes. The experiment reported here was one of a series concerned with the role of target location in motor control theory. It dealt specifically with the question of whether the effects of target location (measured in terms of boundary distance) in a pursuit tracking task were to be found also in tasks of other kinds, and it examined the effects of boundary distance, movement amplitude and target width on the speed and accuracy of performance in a tapping task.

The Effects of tranquillization : benzodiazepine use in Canada

by R. Cooperstock and J. Hill. Ottawa : Health and Welfare Canada, 1982. 67 p. Bibliogr. *French ed. (Les effets de l'usage..) on the same fiche.* ISBN 0-662-11998-3
MICROLOG 88-04969 2 fiche

During the past two decades, there has been a proliferation of psychotropic chemical agents Some of the most widely used are the benzodiazepines, among them Valium. This is only one of 10 benzodiazepines marketed in Canada, advertised for a variety of purposes and sharing common sedating properties. The purpose of this document is to bring together information on these drugs, including extent of use, appropriate indications, contraindications, and some of the problems associated with their use. These include dependence, polydrug use, overdose, and the risk to some segments of the population who receive large quantities of these drugs. In addition, factors impinging on drug use, such as the structure of the health care system, its philosophical view of illness, and physician-patient relationships, are discussed. Finally, some of the social consequences and meanings of extensive benzodiazepine use are explored.

The interconnection of the City of Duncan and Corporation of North Cowichan sewage treatment facilities through a common discharge to the mainstem Cowichan River in August 1980, raised the possibility of local degradation of an important salmonid spawning and rearing stream. The treated sewage effluent had high concentrations of phosphorus and nitrogen, and moderate biological oxygen demand. This study was undertaken to assess the effects of effluent discharge on the periphyton and zoobenthos, and to infer the possible effects on salmonids, from any observed changes. Inorganic nutrient concentration, periphyton accrual and zoobenthos biomass were measured at one upstream and three downstream sites in the Cowichan River to determine effects of effluent discharge from the upgraded Duncan-North Cowichan sewage treatment plant. Samples were taken during summer months in 1979 and before and after discharge began in August 1980.

Effects of wind speed sampling and averaging intervals on accuracy of wind energy estimates

compiled by C. Brothers, H. Arthur ; for J.G. Keller. Ottawa : National Research Council Canada, Division of Energy, Wind Energy Program, 1985. vi, 36 p. : ill. (Technical memorandum ; TM-WE-030)
MICROLOG 88-04466 1 fiche (Available on fiche only)

The assessment of a potential site for wind energy development requires reasonably accurate prediction of the wind energy available at that site. To make this prediction the wind speed must be monitored or recorded over a period of time. The Atlantic Wind Test Site (AWTS) has available a bank of 1 second data which can be manipulated to simulate various equipment and techniques. In an effort to evaluate different techniques of data acquisition the AWTS was requested to perform analysis on 60 days of 1-sec. wind speed data to compare accuracy of various methods. The AWTS is part of a project being conducted for the Atmospheric Environment Service to carry out a comparison of different types of anemometers.

Efficiency of aquatic habitat inventory surveys in the assessment of fish species present

by J.N. Bowlby and D. Green. Toronto : Ontario Ministry of Natural Resources, 1987. 39 p. (Ontario fisheries acidification report series ; no. 87-08) ISSN 0832-7629 ISBN 0-7729-2535-6
MICROLOG 88-00958 1 fiche

The Aquatic Habitat Inventory Survey (AHIS) program was established by the Ontario Department of Lands and Forests in 1968 to develop an inventory of the physical, biological, and chemical conditions of Ontario lakes and streams. It usually involves a single sampling effort of 3 days to one week. This report is a comparison of AHIS data on fish species presence in lakes with similar data collected from other fish sampling studies to examine biases in the AHIS data set. The more intensive studies were either short term (88 lakes) over 3-5 days, or long term studies (59 lakes) over several seasons or years. The number of species missed by AHIS was negatively correlated with lake area for the short term studies only, and was positively correlated with mean depth for the long term studies.

Efficient frequency domain filtering algorithm for small data sets

by D.W. Welch. Nanaimo, B.C. : Dept. of fisheries and Oceans, Fisheries Research Branch, Pacific Biological Station, 1987. iv, 27 p. Bibliogr. (Canadian technical report of fisheries and aquatic sciences ; no. 1559)
ISSN 0706-6457
MICROLOG 88-01216 1 fiche

This report provides ANSI-1977 Pascal and Fortran source codes suitable for filtering time series of biological data using criteria determined by the age-structure of the population. The codes allow fast and accurate filtering of relatively short time series (less than or equal to 100 points) using a Fourier transform method that circumvents the usual requirement that the time series length be an integer power of two. The codes are designed to be used as subroutines from within the user's own programs. Several test programs are included to illustrate the use of the code.

Efficient implementation of heuristic algorithms for the quadratic assignment problem -- Rev.

by M. Los. Montreal : Université de Montréal, Centre de recherche sur les transports, 1979. 29 p. : ill. Bibliogr. (Publication ; no. 87) (Cahier ; no 7712)
MICROLOG 88-06330 1 fiche

The quadratic assignment problem can be used in many fields, such as plant layout or urban planning, but can only be used with less than 16 activities, leading to the use of heuristic algorithms for practical problems. The steepest-descent pairwise interchange procedure is considered to be the best heuristic technique among the hill-climbing algorithms proposed to data, although it is considered to require too much computational effort to be applied to realistic problems. This paper indicates that if an efficient recursive technique to cut down the time-complexity of the steepest-descent pairwise interchange procedures is used, the computational effort required is not so high. A comparison of the pairwise and three-way interchange procedures and the constructive technique are given, with recursive techniques used to speed up the computational efficiency of the 3 algorithms.

Efficient residential oil-heating systems : a manual for servicemen, designers, and builders -- Revised

by A.C.S. Hayden and R.W. Braaten. Ottawa Energy, Mines and Resources Canada, Canada Centre for Mineral and Energy Technology, 1988. vi, 51 p. : ill. Bibliogr. (CANMET special publication ; SP88-1E) *French ed. (Systèmes efficaces de chauffage...) : 88-04985/1.* ISBN 0-660-12865-9
MICROLOG 88-04984 1 fiche

Guide to improve the efficiency of domestic oil-fired systems, both by proper servicing and by actual physical modifications to the heating system. The guide is aimed at the working, experienced tradesmen and explains both basic servicing and the different aspects involved in real-life furnace efficiency and measurement, giving ways and means of upgrading the efficiency. Detailed calculations for determining efficiency, optimum nozzle size, combustion curves, conversion factors and design data for selected locations are also given.

The Effluent monitoring priority pollutants list, 1987

Ontario. Ministry of the Environment. Hazardous Contaminants Coordination Branch. Toronto : The Ministry, 1988. v, 192 p. Bibliogr.
ISBN 0-7729-2784-7
MICROLOG 88-05336 3 fiche

This report outlines a chemical hazard assessment methodology for the on-going development of an Ontario Effluent Monitoring Priority Pollutants List (EMPPL). This hazard assessment is based on a chemical's environmental persistence, potential to bioaccumulate, acute and sub-lethal toxicity to biological organisms including humans, and potential to exist in effluents discharged to surface waters. This report also identifies 179 chemicals or groups of chemicals which constitute the 1987 version of the EMPPL. The list represents those chemicals that have been detected or are potentially present in Ontario municipal and industrial effluents and pose a threat to the receiving environment.

Effluent monitoring regulations for the petroleum refining sector

Ontario. Ministry of the Environment. Toronto : The Ministry, 1988. ii, 144 p. Bibliogr.
ISBN 0-7729-4100-9
MICROLOG 88-05333 2 fiche

The Municipal/Industrial Strategy for Abatement (MISA) is a program to reduce the discharge of toxic contaminants to Ontario's waterways. Dischargers will be required to monitor and report on the contaminants present in their effluent streams. This document contains all the legal monitoring requirements for Ontario's petroleum refining sector as specified in two regulations. The first regulation provides the technical and scientific methodologies for monitoring, specifying the principles of sampling, analysis, flow measurement and procedures for toxicity testing. The second regulation states the chemical monitoring, toxicity testing, flow measurement, and reporting requirements that each refinery must meet. Also included is a discussion of the MISA approach to effluent monitoring.

Eighteenth-century container glass from the Roma Site, Prince Edward Island

by J. Alyluia. Ottawa : Dept. of Indian and Northern Affairs, Parks Canada, National Historic Parks and Sites Branch, 1981. 206 p. : ill. Bibliogr. (History and archaeology ; 45) *Bound with: Bottle glass from a privy at Fort George Military Reserve, Ontario / Pierre R. Beaudet -- Glassware excavated from Fort Anne, Nova Scotia / Jane E. Harris.* ISBN 0-660-10734-1
MICROLOG 88-04061 3 fiche

The 18th-century container glass from the Roma site has been divided into three main categories, one secondary category and one miscellaneous category on the basis of a combination of features that include glassmaking tradition, country of origin, function and dating. The main categories are: utilitarian blue-green containers of the French wood-burning tradition; darkgreen liquor bottles of the French coal-burning tradition; and "black" glass liquor bottles of the English coal-burning tradition. The secondary category consists of small bottles resembling the French liquor bottles and believed to be their quarter- and half-sized counterparts. Objects unidentifiable by any of these standards are included in the miscellaneous category. A total of 156 identifiable objects were retrieved from the Roma site and are described in this report.

Ejection systems and the human factor : a guide for flight surgeons and aeromedical trainers

by W.R. Sturgeon. Downsview, Ont. : Defence and Civil Institute of Environmental Medicine, 1988. vii, 84 p. Bibliogr. (DCIEM research report ; no. 88-TR-16) *On cover: DCIEM technical report.*
MICROLOG 88-05380 1 fiche

This report outlines the Canadian Forces experience with ejection escape systems and the human factors involvement in their use from 1952 through 1987. It is intended as an introductory guide to flight surgeons and other aeromedical personnel of the Canadian Forces investigating accidents or incidents involving ejection systems, or for personnel responsible for training aircrew in the use of ejection systems. The report analyzes human factors involvement in ejection decision formulation and the medical/physiological considerations of the ejection, descent, landing and survival phases of the escape sequence. Case histories are used to illustrate the hazards involved in ejection escape, and emphasis is placed on ejection statistics for 1972 through 1987.

Elaboration des horaires pour les chauffeurs de véhicules postaux

par S. Taillefer. Montréal : Université de Montréal, Centre de recherche sur les transports, 1987. v, 90 p. : ill. Bibliogr. (Publication ; no 557)
MICROLOG 88-02275 2 fiche

Ce document examine le problème de l'élaboration des horaires pour les chauffeurs de véhicules postaux en milieu intra-urbain. Les chercheurs proposent un modèle de recouvrement avec contraintes supplémentaires et ont développé un algorithme de type heuristique. Cet algorithme est divisé en 2 grandes phases: une phase de génération de journées de travail admissibles et une phase de sélection de journées de travail. Ces 2 phases sont ensuite suivies par une phase de découpage et insertion d'activités à points de demande variables. Finalement, le modèle et l'algorithme sont appliqués sur des données de la Société canadienne des postes.

Electrodes for solid electrolytes : electrode morphology

by J.D. Canaday...et al. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. i, 69 p. : ill. Bibliogr. (Report ; MSL 87-106(IR))
MICROLOG 88-00759 1 fiche

The morphology of the electrodes used in certain types of electrochemical cells is known to affect the performance of these devices. Using the techniques of image analysis, profilometry, gas permeability, mercury porosimetry, and gas adsorption, the morphological properties of porous electrode film (1-100 um) materials are discussed. The materials include platinum paste which is utilized as electrodes for high temperature, oxygen-ion-conducting ZrO2 electrolytes and for low temperature hydronium-conducting Nasicon electrolytes. Also considered are plasma sprayed nickel and perovskite materials. In order to assess the possible correlation of morphological parameters, the measurements of silver membranes are presented. Parameters measured include particle diameter, pore diameter, porosity, three-phase line, thickness, surface texture, gas-flow/pressure, pore area, and surface area.

Electrostatic precipitation of dust resulting from the combustion of coal in power plants fitted with dry SO2 contols : a literature review and preliminary assessment

by D. Mills. Toronto : Ontario Hydro, Research Division, 1987. 14 p. Bibliogr. (Report ; no. 87-199-K)
MICROLOG 88-00134 1 fiche

Electrostatic precipitators currently in use at coal-fired generating stations were designed to collect flyash only. Proposed methods of dry SO2 reduction through the addition of lime or limestone ahead of the precipitators will produce large amounts of high resistivity flyash-sorbent particulate matter, leading to the need for modifications to the electrostatic precipitators to meet emission limits. This report reviews the operation of electrostatic precipitators and outlines various measures proposed for their upgrading.

The Electrowinning of copper arsenide

by D.J. MacKinnon and R.M. Morrison. Ottawa : Canada Centre for Mineral and Energy Technology, 1987. ii, 32 p. : ill. Bibliogr. (Report ; MSL 87-165(TR)) *Project 30.52.05 impurities in copper refining.*
MICROLOG 88-02659 1 fiche

The presence of arsenic in anode copper can result in better cathode purity during copper electrorefining because arsenic promotes increased slime stability and adherence; however, there is a minimum level of arsenic in the anodes which is desirable. This study presents the effects of electrolyte composition, current density and electrolyte circulation rate on the electrowinning of copper arsenide from simulated liberator cell electrolyte. The electrodeposits were characterized using SEM, EDXA and electron microprobe techniques.

Emploi-avenir : perspectives professionnelles jusqu'à 1995 : une perspective

Ottawa : Gouvernement du Canada, Ministre d'Etat à la jeunesse, Système de projections des professions au Canada, 1988. x, 327 p. cartes géogr. *L'éd. anglaise (Job futures...) : 88-04260/4. CSI 21126.202F.*
MICROLOG 88-04261 4 fiche

La gouvernement fédéral, par entremise d'Emploi et Immigration Canada et du ministère d'Etat à la Jeunesse, évalue de façon régulière les possibilités d'emploi dans des centaines de professions dans le but d'aider les jeunes à faire leur choix de carrière. Ce guide est un condensé d'utilisation simple et rapide des "Volumes I et II d'Emploi-Avenir". Les descriptions des cours et des emplois sont brèves et permettent de mieux comprendre le lien qui existe entre le milieu scolaire et le monde du travail. De plus, un aperçu de la situation du marché du travail, qui prévaudra probablement pour chaque groupe professionnel d'ici 1995, encourage les jeunes à poursuivre leurs études et à faire un meilleur choix de carrière.

Emploi-avenir-Québec : perspectives professionnelles jusqu'en 1993, édition 1987-88

Québec : Emploi et immigration Canada, Direction des services économiques, 1987. 295 p. : ill. *L'éd. anglaise (Job futures-Quebec...) : 88-04656/3. CSI 21126.006F.*
ISBN 0-662-94453-4
MICROLOG 88-04651 4 fiche

Ce document présente de l'information par profession pour le marché du travail du Québec. Il offre des renseignements d'ordre statistique et qualitatif sur les différentes composantes du marché du travail, affectant l'évolution des professions. La 1re partie porte sur les professions occupées par les diplômés, 2 ans après leur promotion, pour chacune des disciplines principales d'études, soit de niveau collégial, soit de niveau universitaire. La 2e partie traite des perspectives d'ici 1993 pour 174 professions.

Employer interaction with public colleges and institutes in Canada

by G.A. Thom. Ottawa : Science Council of Canada, 1987. 53 p. Bibliogr. (Discussion paper) *French ed. (Les collèges et instituts...) on the same fiche.* ISBN 0-662-15562-9
MICROLOG 88-01222 2 fiche

Description and discussion of the types, extent and importance of interactions between colleges and or institutes and employers. The paper records examples of contributions that colleges and institutes are making to the economic development of Canada through collaboration with industry and government with reference to training and retraining services which provide for the important transfer of technology to industry. As well, provides examples of effective collaboration for the universities to consider in developing their relationships with industry and makes recommendations.

Employer-sponsored vanpooling in Ontario : an inventory '86

by L. Gallant. Toronto : Transportation Energy Mangement Program ; Ontario Ministry of Transportation and Communications, Transportation Technology and Energy Branch ; Ontario Ministry of Energy, 1986. iii, 60 p.
MICROLOG 88-01830 1 fiche

Update of an annual survey begun in 1983 to determine the extent of vanpooling's diversity among employer-sponsored programs. In 1986, 12 companies operating a total of 151 vanpools responded on their program status, incentives, operational features, van specifications, maintenance costs, and fares. Highights of the programs are given, followed by a more detailed listing by company.

Employment equity for women : a university handbook

Toronto : Council of Ontario Universities, 1988. v, 246 p. Bibliogr. ISBN 0-88799-266-9
MICROLOG 88-03297 3 fiche

This handbook is intended to provide information, suggestions, and guidelines to employment equity practitioners and although it is primarily directed at guidelines for achieving equity for women it also addresses problems for minority groups. Discusses employment systems through hiring, career development, compensation, and employees with family responsibilities. Also addresses non-sexist language and imagery, women in non-traditional areas, safety and security, sexual harassment, and teaching and scholarship in the university environment.

Emporium of the North : Fort Chipewyan and the fur trade to 1835

by J. Parker. Regina : Alberta Culture and Multiculturalism ; Canadian Plains Research Centre, 1987. xv, 208 p. : ill., maps. Bibliogr. ISBN 0-88977-044-1
MICROLOG 88-02055 3 fiche (Available on fiche only)

Fort Chipewyan, the first European settlement in Alberta, was ideally situated for the fur trade, located as it is at the hub of a drainage system. The fort was reached from the south by the Athabasca River, and the streams running to the north and to the west became highways for expansion of the trade. Lake Athabasca stretches to the east. As a base for extending the trade, Fort Chipewyan ranked second, surpassed only by Fort William on Lake Superior. Not only the fur trade benefitted from the establishment of Fort Chipewyan, however, because as the "Grand Magazine of the North" it became the base of operations for land explorers.

Energy conservation in investment casting moulds using Canadian industrial minerals, phase II : final report

submitted to A.K. Kuriakose from K.R. Heath. Mississauga, Ont. : Ontario Research Foundation, 1987. 106 p. : ill. *Compiled by sub-contractor Ontario Research Foundation. CANMET contract: OSQ85-00205*
MICROLOG 88-03128 2 fiche

The development of ceramic moulds for investment casting, used to produce complex metal parts in a variety of alloys with close control of dimensions, has been ongoing for several years. The refractory mould used in the casting process is an important area of study since it represents approximately 25% of the manufacturing cost, is usually from 100% imported materials and its quality is a key element in achieving a high level of productivity. This final report presents the result of work performed from November 1985 - March 1987 in developing shell mould formulations using novel phosphate binders which provided superior shell strength over moulds fabricated with conventional silica binders.

Energy conservation through improved water treatment

prepared by Marvin D. Silbert, Ontario Ministry of Health, Capital Planning Branch, Ontario Ministry of Energy, Programs & Technology Division. Toronto : Ministry of Health, 1987. iii, 85 p. : ill. ISBN 0-7729-2857-6
MICROLOG 88-04885 2 fiche

Water is commonly used to transfer heat within hospital heating, ventilating and air conditioning (HVAC) systems. While water may have excellent heat-transfer properties, all natural water contains dissolved minerals including the nutrients necessary to sustain microbiological life which can lead to the growth of deposits that reduce heat transfer, resulting in increased operating and maintenance costs. This report suggests some methods available for improving energy efficiency in HVAC and boiler systems, monitoring and control to maintain water quality, and their application to hospital systems. In addition, there is a discussion of water and its preparation for use in such systems and recommendations for future installations.

Engineering tests on BRE-Leyland railbus

by W.J. Watson. Ottawa : National Research Council Canada, Division of Mechanical Engineering, 1986. ii, 10, 70 p. : ill. (Technical report ; CTR-VDL-007) *TP7914E.*
MICROLOG 88-00344 1 fiche

An engineering test program was designed to evaluate the perforance of the BRE-Leyland 141 light diesel railbus under Canadian winter conditions. The tests measured engineering performance parameters such as wheel lift, vibration, curving performances, tracking stability, acceleration, braking, as well as passenger comfort criteria such as ride quality, lighting, temperature and noise. The vibration data permits ride quality and tangent track stability analysis. Fully loaded tests were accomplished by placing concrete blocks weighing a total of nearly 4,000 lb (1,800 kg) on-board. Acceleration and braking times were inferred from time history recordings of wheel revolutions. Braking distances were physically measured on the ground. Noise, tracking stability, and ride quality were measured simultaneously up to the maximum speed attainable with the vehicle (60-62 mph, 96-100 km/h). Lateral and vertical rail force measurements were taken from strain gauges that had been applied to the rails at a 4 degree curve, and while the railbus passed through in its loaded condition.

English-French lexicon of surface crown pillar related terms

by M.C. Bétournay. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. iv, 28 p. (Report ; MRL 87-45(TR)) *Bilingual (Lexique français-anglais...).*
MICROLOG 88-03159 1 fiche

This compendium assembles, at the moment of publication, the terms related to surface crown pillars in current use. It standardizes and, in several cases, establishes the terminology particular to those pillars. A common level of communication will be available for its users. This work could also become part of a more elaborate lexicon, covering in detail mining terms related to all of the Canadian mining industry. The lexicon takes into consideration the variation in use of precise terms from one area of the country to another based on user preference, be they mining operators, academicians or researchers. Terms related to currently developing technology were taken into account, as were the linguistic changes and expansions which follow the evolution of languages.

Enquête auprès des pêcheurs de l'Atlantique, 1984

Ottawa : Ministère des pêches et des océans, Direction générale de l'analyse économique et commerciale, Division de l'analyse économique et des statistiques, 1987. ix, 173 p. : ill. (Série de publications de l'analyse économique et commerciale : enquêtes et statistiques rapport : no 37) *CSI 21105.212F.* ISSN 0835-0678 ISBN 94499-2
MICROLOG 88-02941 2 fiche

Le Ministère a entrepris une enquête sur les revenus et sur la situation en matière d'emploi des titulaires de permis de pêche commerciale dans les provinces de l'Atlantique et au Québec en 1984. Les résultats ont été groupés par province, par région du Ministère et en fonction des régions déterminées aux fins de l'analyse par le Groupe d'étude des pêches de l'Atlantique de 1982. Ces 13 régions du Groupe d'étude sont définies à l'annexe I. La méthodologie est décrite à l'annexe II. Finalement, l'annexe III contient les données qui ont inspiré la teneur de ce rapport (les pêcheurs à plein temps, à temps partiel et les pêcheurs actifs).

Enquête sur la rémunération globale des emplois-repères au Québec en 1987

Québec : Gouvernement du Québec, Ministère du travail, Centre de recherche et de statistiques sur le marché du travail, 1987. 118 p. (Etudes et recherches du Ministère du travail) ISBN 2-551-08732-5
MICROLOG 88-05177 2 fiche

Ce document contient les principaux résultats de l'enquête annuelle sur la rémunération globale pour l'année 1987. Les salaires en vigueur au 1er juillet 1987 ont été relevés auprès d'un échantillon d'entreprises et d'établissements représentatifs de divers secteurs d'activité économique. Les résultats du volet salarial sont ventilés selon le secteur d'activité économique, la taille des établissements et selon le statut de syndiqué ou de non-syndiqué de l'emploi apparié. En ce qui a trait à la rémunération globale, on retrouve la même ventilation à l'exception du facteur syndicalisation. Quant aux avantages sociaux, les coûts sont présentés pour l'ensemble du Québec, par catégorie d'emplois et sur une base annuelle. Inclut aussi la liste des emplois-repères.

L'Enregistrement des lobbyistes -- Revu

par B. Carson. Ottawa : Bibliothèque du Parlement. Service de recherche, 1986. 12 p. Bibliogr. (Bulletin d'actualité ; 86-18F) ISBN 0-660-92119-7
MICROLOG 88-00803 1 fiche

En septembre 1986, le gouvernement fédéral annonçait l'établissement d'un système d'enregistrement des lobbyistes payés. Ce document vise à clarifier certains concepts relatifs au lobbying. On y présente la législation actuelle au Canada, les activités des lobbyistes, la réglementation dans d'autres pays et les propositions de solution pour le Canada. Un intérêt particulier est porté au rapport du Comité permanent des élections, des privilèges et de la procédure. Le document se termine par un résumé des principales mesures parlementaires et des notes chronologiques.

L'Enseignement du français, langue maternelle : avis à la Ministre responsable de l'application de la Charte de la langue française

Québec (Province). Conseil de la langue française. Québec : le Conseil, 1987. 60 p. ISBN 2-550-17834-3
MICROLOG 88-02974 1 fiche

Le Conseil de la langue française du Québec examine la situation de l'enseignement du français, langue maternelle, en rapport avec le développement du fait français au Québec et les besoins langagiers des québécois. Il s'agit de l'enseignement du français au primaire et au secondaire, dans les secteurs privé et public et, par certains aspects, de l'enseignement dispensé aux niveaux collégial et universitaire. La 1re partie de l'avis porte sur la participation du système scolaire à l'aménagement linguistique du Québec, tandis que la 2e partie examine les différents facteurs qui influencent l'enseignement du français: les facteurs pédagogiques, les moyens organisationnels et le cadre motivationnel.

MICROLOG 88-04069 1 fiche

This study reviews some of the measures taken by the Government of Canada to ensure ordered development of the environment. Following an overview of parliament's activities and accomplishments, and of relevant constitutional and legislative measures, the study examines specific areas with an important environmental role. Some comments from the recent report of the World Commission on Environment and Development are also discussed.

Environmental aspects of nickel production : sulphide pyrometallurgy and nickel refining

Ottawa : Environment Canada, Environmental Protection Service, 1987. xiii, 121 p. Bibliogr. (Report ; EPS 2/MM/2)
MICROLOG 88-02074 2 fiche

Technical review covering the most commonly used methods of extractive metallurgy and the equipment used to produce nickel and nickel products. It is concerned with the environmental aspects of these technologies and presents information either as found in technical literature or as made available by companies, governmental agencies, and individuals expert in the field.

Environmental aspects of *Salmonella* in humans

by D.M. McLean. Ottawa : National Research Council Canada, Associate Committee on Scientific Criteria for Environmental Quality, 1987. ix, 41 p. : ill. Bibliogr. ISSN 0316-0114
MICROLOG 88-04441 1 fiche (Available on fiche only)

Despite generally good sanitation practices throughout Canada during most of the twentieth century, outbreaks of gastroenteritis due to non-typhoid serovars of *Salmonella* sp. involved 6781 to 11,181 persons each year between 1978 and 1985. Many outbreaks arise from unsanitary food-handling whilst single cases or small clusters of patients may contract salmonellosis through direct or indirect exposure to infected farm animals or domestic pets. Prevalence of particular *Salmonella* serovars has changed through succeeding years, except for that of *Salmonella typhimurium* which has remained high every year. The objective of this document is to assemble a quantitative data base relating the number of human cases of salmonellosis per annum of approximately 40 common *Salmonella* serovars, to the category of location of exposure to the infected environmental source. Costs of health care for infected humans, plus relevant microbiological laboratory investigations for patients and environmental sources of infection, are presented whenever appropriate.

Environmental assessment : what is it? where is it going?

by E. Cotterill. Ottawa : Federal Environmental Review Office, 1981. 10, 10 p. (Occasional paper ; no. 4) *Bilingual (L'évaluation environnementale...).*
MICROLOG 88-05015 1 fiche

Text of an address to the Canadian Environmental Law Foundation tracing the developing role of government and the public in the process of ensuring the safety of the environment. The document outlines the objectives that an environmental impact assessment program must have, and the federal government's Environmental Review and Assessment Process. Makes recommendations.

Environmental assessment program improvement project : an introduction to the project

Toronto : Environment Ontario, 1988. 14 p. : ill. ISBN 0-7729-3900-4
MICROLOG 88-03972 1 fiche

A comprehensive review is being undertaken to examine the understanding and acceptance of environmental assessment and to ensure that the program operates in as efficient and effective a manner as possible. This document presents an introduction to the project to examine the EA program, including the study approach, public involvement, topics to be addressed, and the concept and practice of environmental assessment. A list of policy and administrative improvements currently underway is also included.

Environmental construction guidelines for municipal road, sewage, and water projects

Municipal Engineers Association. S.l. : The Association, 1987. v, 29 p.
MICROLOG 88-00680 1 fiche

Advisory document for designers, construction supervisors and contractors setting out considerations for mitigating possible adverse environmental impacts from construction activities associated with municipal road, sewage and water projects. The document is designed to complement the more detailed standard specifications used by municipalities for constructing these projects. Coverage includes: mud, dust and particulate control; protection of land features and vegetation; site drainage and erosion control; dewatering; groundwater and wells; water crossings and construction through sensitive areas; hydrostatic testing and disinfection; site restoration; and various construction equipment details.

Environmental handbook for pipeline construction

Edmonton : Alberta Environment, Land Reclamation Division, 1988. vi, 90 p. : ill. Bibliogr.
MICROLOG 88-04309 2 fiche

Handbook to encourage effective environmental protection during the construction of pipelines prepared by reviewing and adapting selected descriptions and drawings of preferred environmental protection measures contained in existing industry manuals, government guidelines and published literature, representing a compendium of environmental protection measures currently utilized by the pipeline industry. Coverage includes construction schedule, contingency planning, notification of concerned parties, right of way survey, fences and gates, clearing, grading, trenching, hauling, stringing, bending, welding, coating and lowering-in, backfilling, testing, clean-up, and water crossings.

Environmental impact assessment in Canada

by W.J. Couch, J.F. Herity and R.E. Munn. Ottawa : Federal Environmental Review Office, 1981. 35, 41 p. Bibliogr. (Occasional paper ; no. 6) *Bilingual (Evaluation des incidences...).*
MICROLOG 88-05017 1 fiche

This paper presents an examination of Canadian approaches to environmental impact assessment. First it examines the factors existing in the late 1960's that led to the formal adoption of an EIA process in Canada in 1973. Then it looks briefly at the nature of Canada and its government structures so as to understand how the various procedures have evolved. This leads into a discussion of the key features of Canadian EIA processes, from project screening to formal public review; the relationship of EIA to planning and regulatory activity; the status of scientific methodology and the people-related issues of social impact assessment and public participation.

Environmental law and its impact on the CANMET conveyor belt test facility

by G. Lobay. Ottawa : Canada Centre for Mineral and Energy Technology, Mining Research Laboratories, 1988. ii, 19 p. Bibliogr. (Report ; MRL 87-178(TR))
MICROLOG 88-05518 1 fiche

In its efforts to enhance mine safety through a testing and certification program for certain mining products and applications, CANMET operates a conveyor belt test facility in which large samples of conveyor belting are burned. A byproduct from this test is copious amounts of odorous smoke, which is discharged to the atmosphere, and renders the CANMET facility, its operators and management subject to the provisions of the Ontario Environmental Protection Act as well as the soon to be legislated Canadian Environmental Protection Act. This paper provides information as to how the law is applied to the provisions of the Act, and how the law can be expected to impact on the CANMET conveyor belt test facility.

Environmental management and impact assessment : some lessons and guidance from Canadian and international experience

by D. Marshall...et al. Ottawa : Federal Environmental Assessment Review Office, 1985. 28, 42 p. (Occasional paper) *Bilingual (Gestion de l'environnement...).*
MICROLOG 88-04970 1 fiche

Environmental Impact Assessment (EIA) is a major activity in project planning and resource management in Canada. It encompasses the assessment of biophysical and socio-economic impacts induced directly or indirectly by either small scale or large scale developments. This background paper examines certain deficiencies in impact assessment and introduces some of the approaches being pursued in Canada to tackle them. The paper is organized into three main sections: an overview of problem areas in EIA and possible solutions; the specification of five steps for improving the effectiveness of EIA, including the areas of decision-making integration and public consultation; and some suggestions on the next step for advancing the field, including the application and dissemination of enabling conditions to developing countries.
